Helena, MT 59620-1711

Dear Director Livers and the Honorable Rep. Kimberly Dudik,

In accordance with §17-7-202(2)(e), MCA, we respectfully submit the enclosed 2020 Facility Inventory & Condition Assessment Report which is the product of a collaborative effort among the Architecture & Engineering Division, multiple state agencies, and the University System.

Sincerely,

John Lewis, Director
Department of Administration

Russ Katherman, Administrator
Architecture & Engineering Division

Report Summary

This report continues the process of providing the Office of Budget and Program Planning and Legislative Finance Committee the current status on the State-Owned Facility Inventory and the LRBP-eligible building Facility Condition Assessments as required in §17-7-202 MCA, which provides an opportunity to foresee and strategize ways to address the inevitable deterioration of built assets. Using data collected by qualified assessors, condition information and the associated cost of repairs/replacements or capital renewal needs can be prioritized to timely mitigate deferred maintenance liabilities. The passage of HB 553 by the 66th Legislature created the "Major Repair Account" to provide consistent resources for prioritized corrective action rather than being deferred into a more expensive or crisis-management stage in the future (a.k.a. deferred maintenance backlog). Completing backlog projects combined with future assessments will help determine the adequacy of the 0.6% of Current Replacement Value level of funding provided in 17-7-222 MCA.

Agencies must support the needs of their mission, either through the use of existing facilities or through the fiscally responsible construction of new facilities. Management of existing real property involves both facility sustainment and recapitalization. Whereas sustainment focuses on keeping facilities operational through preventative maintenance and repair; recapitalization includes the restoration, modernization, or replacement of facilities or their structural components to extend or restore a facility's lifecycle.

Achieving inventory-wide Facility Condition Assessment (FCA) goals;

- Ensuring that all State facilities are capable of meeting mission requirements and providing a reasonable quality of work life support to personnel using them; and
- Establishing methods to identify and remediate within a reasonable timeframe any "failing facilities," i.e., facilities in poor physical condition; through demolition, replacement, or repair.

Considerable investment has been made by the State to construct its vertical infrastructure portfolio and it is anticipated the Facility Condition Assessment process for LRBP-eligible buildings will confirm the LAD and LFD perspectives on the need to establish a definitive and consistent level of funding into the LRBP to address the increasing deferred maintenance backlog.

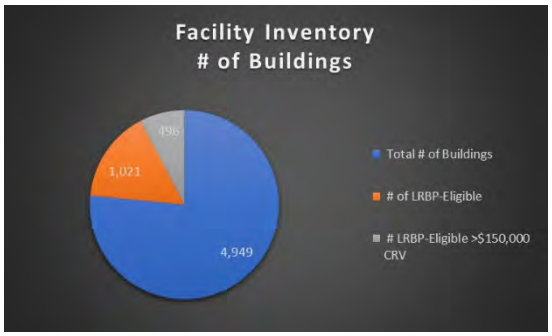

The Architecture & Engineering (A&E) Division of the Department of Administration is tasked with the primary responsibility for establishing and conducting the Facility Condition Assessment (FCA) program as well as managing LRBP "Major Repair" account funds for projects as they are appropriated each legislative session.

The following provides a brief summary of the detailed content, status, and progress provided within the body of this report:

Current Status

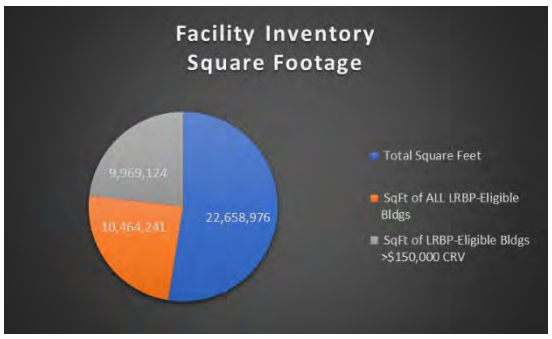

State agencies continue to collaborate and assist A&E with review of current inventory data, analyzing the scope needs of the FCA, and help define a strategy to address the requirements in §17-7-202 MCA. Current FCA summary data is provided in Appendix D.

In Aug 2020, A&E Division was able to procure the Archibus Sustainment Management System (SMS) software. This platform will allow for a more consistent and accurate collection of inventory data across the Agencies providing a better understanding of the overall facility portfolio. It will also benefit the State in the long-term through easier access, better data control, and integrated functions.

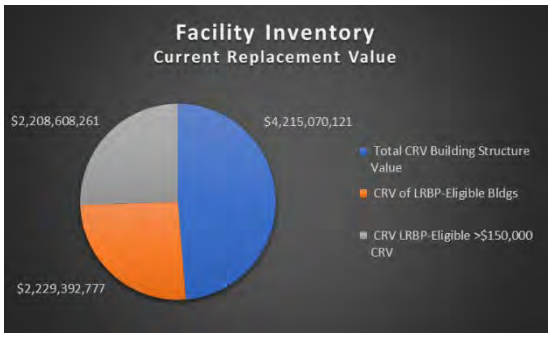

Initial review of the 2020 Risk Management & Tort Defense (RMTD) database indicates (2018 values in parenthesis):

1) A total State-Owned inventory of:
   a) 4,949 buildings (4,787);
   b) 22,658,976 square feet (23,520,636); and,
   c) currently valued at $4,215,070,121 ($3,932,908,713).

2) Buildings meeting the definition of LRBP-eligible (excludes the Capitol complex):
   a) 1,021 (976);
   b) 10,464,241 (9,444,522) square feet; and,
   c) $2,229,392,777 ($1,861,876,122) in replacement value.

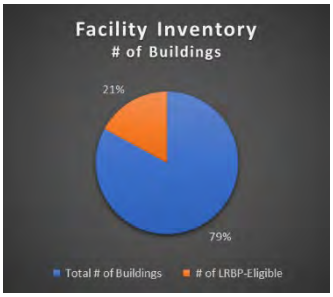

3) Of the LRBP-eligible buildings:
   a) 496 (470) are greater than $150,000 in current replacement value and are now statutorily required to have condition assessments conducted;
   b) Consisting of 9,969,124 (8,987,009) square feet; and,
   c) $2,208,608,261 ($1,842,294,330) in replacement value.

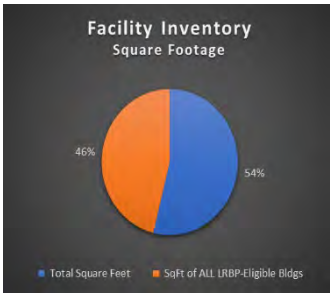

MINIMUM FUNDING FOR MAJOR REPAIR, 17-7-222 MCA

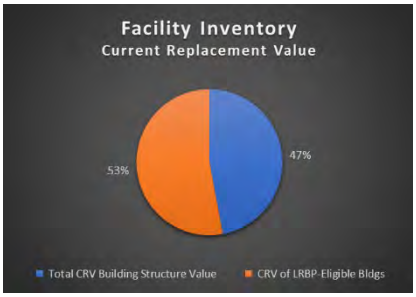

The minimum level of funding for major repairs is 0.6% of the current replacement value of all LRBP-eligible buildings for each fiscal year. The funding level to be met in the Major Repair Long Range Building Program account for projects for the upcoming biennium is:

($2,229,392,777 X 0.6%) X 2 fiscal years = $26,752,713

4) Though 21% (20%) of the total inventory, LRBP-eligible buildings comprise 46% (40%) of the total square footage in the inventory and represent over half (53%) the State's total building infrastructure value.

Action Plan

A&E and the working group are continuing their efforts in the following areas:

1) Continue collaboration with all State Agencies and fully incorporate facility inventory data into the Archibus database and complete facility inventory assessments for LRBP-eligible buildings to establish unbiased and consistent data;
2) Using Archibus generated data (e.g., Facility Condition Index, Facility Replacement Value), review of the inventory data for verification and consideration of how insured current replacement cost values and project cost replacement values may or may not differ;
3) Analysis for the Long-Term Action Plan matrix of options and possible strategies available.

Acknowledgements

The content of this report is the work of a dedicated collaboration across state government. It is not the product of the A&E Division alone, but the concentrated effort by many individuals and representatives of Departments and the University system who are interested in the care and condition of state assets.

A&E wishes to acknowledge and thank them for their participation and contributions. Team members:

Current Status of Statewide Inventory & Condition Assessments

This report provides the Legislature and Office of Budget & Program Planning with status information on the size of the overall inventory of State-Owned facilities and the progress made by the Department in establishing a program for condition assessments of those buildings that have the Major Repair Long-Range Building Program fund as an option to address deferred maintenance issues. As provided in §17-7-202, assessments are not mandatory on State-Owned buildings unless they receive a portion of general fund dollars for operations and maintenance or serve as part of the academic mission of the university system.

The Archibus software application was developed to help engineers, technicians and managers decide when, where and how to best maintain existing infrastructure. Because assets are so vast and diverse, a "knowledge-based" philosophy drives the SMS process. The process starts with the automated download of real property data, and then more detailed system inventory is modeled and/or collected which identifies components and their key life cycle attributes such as the age and material. From this inventory, Condition Index (CI) measures for each component are predicted based on its expected stage in the life-cycle. Objective and repeatable inspections can then be performed on various components to verify their condition with respect to the expected life-cycle deterioration. The level of detail and frequency of these inspections are not fixed like other processes; they are dependent on knowledge of component criticality, the expected and measured condition and rate of deterioration, and remaining maintenance and service life. This "knowledge-based" inspection focuses attention to the most critical components at the time. In addition to these condition assessments, functionality assessments can be performed to evaluate user requirement changes, compliance and obsolescence issues. This provides a comprehensive picture of the overall performance of assets and their key components.

Expectations of §17-7-201 MCA

While all State-Owned buildings, facilities, or structures valued greater than $150,000 must be included in the inventory, §17-7-201(4), provides a definition that makes certain State-Owned facilities eligible for funding from the Major Repair Long-Range Building Program (LRBP) account. An LRBP-eligible building is one:

- "for which the operation and maintenance are funded with state general fund money; or
- that supports academic missions of the university system and for which the operation and maintenance are funded with current unrestricted university funds."

Many projects from many funding sources are approved through the Long-Range Building Program (typically House Bill #5). This is the proper location for all State-Owned facilities projects to

received legislative consideration, appropriation, and/or authorization, regardless of the funding source.

However, all other State-Owned facilities that don't meet the eligibility definition are excluded from getting funds from the Major Repair account if the operation and maintenance is entirely funded with state special revenue, federal special revenue, or proprietary funds; or that supports nonacademic functions of the university system and for which the operation and maintenance are funded from nonstate and nontuition sources.

Expectations of §17-7-202 MCA

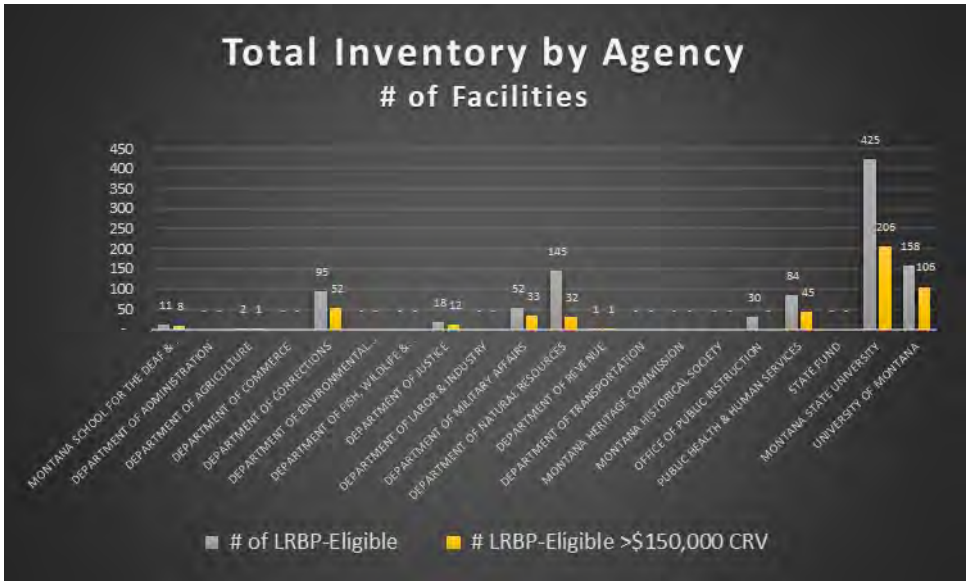

For every State-Owned facility, §17-7-202(2), requires the statewide facility inventory to include:

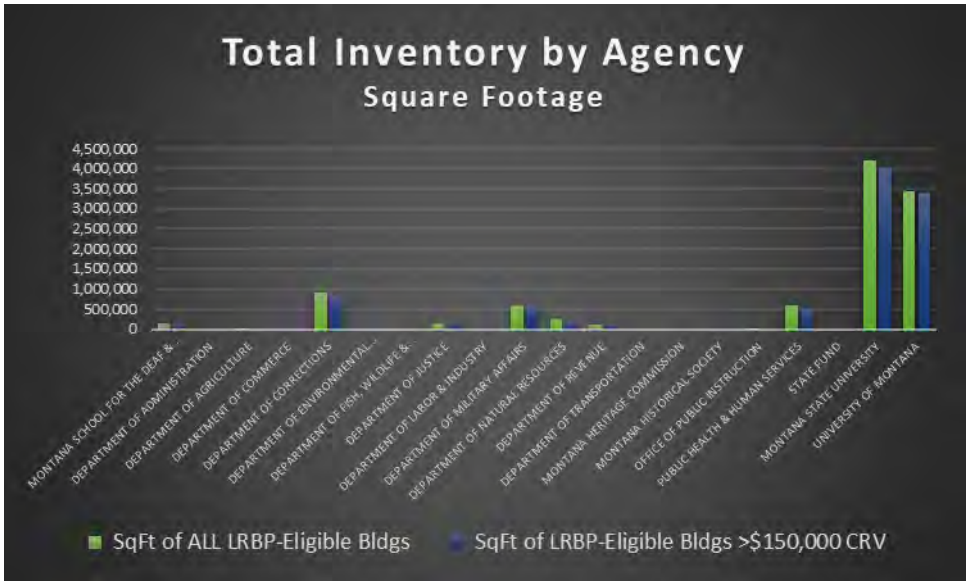

1) its location and total (gross) square footage;
2) agency or agencies using the building (w/ square footage allocated to each);
3) its current replacement value (CRV) and each agencies portion; and,
4) whether or not the building is LRBP-eligible.
   (The full inventory is provided in Appendix B)

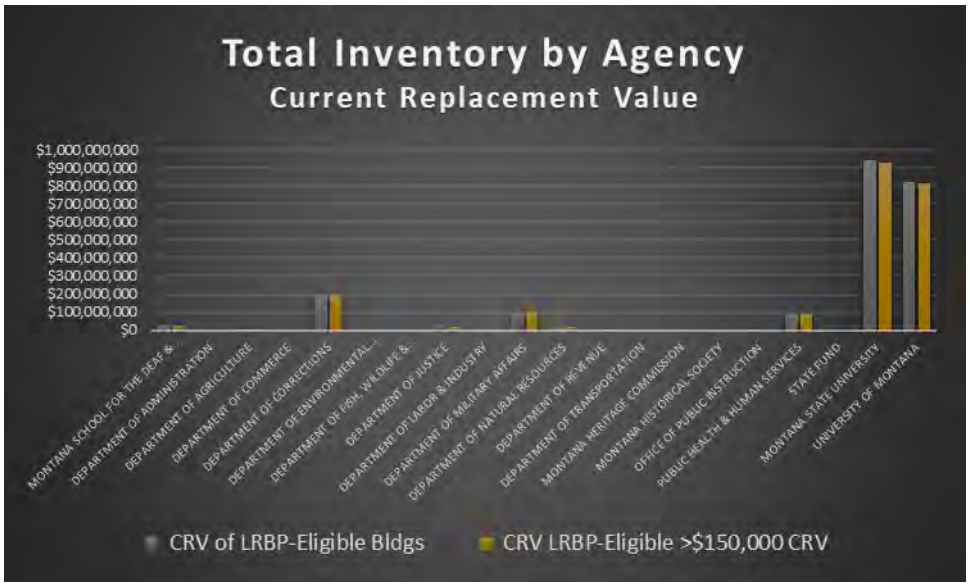

If a building is LRBP-eligible, along with the above inventory information, the following must also be included and maintained by the Department

1) a facility condition assessment (FCA) of the building and an itemized list of the building's deficiencies; and,
2) comparison of the building's current building deficiency ratio to its deficiency ratio in the previous biennium.
   Current assessment information is provided in Appendix D.

Inventory Summary & LRBP Eligibility for Assessments

Facilities not Included in Inventory

Any State-Owned facility that is uninsured is not in the RMTD database and is not included in this inventory report. Uninsured facilities may consist of inaccuracies in the agency self-reported data or abandoned/unused/under-used buildings.

Further inventory adjustments are also anticipated as the A&E Division works with agencies to identify buildings that are not in the RMTD list but should be part of the recorded inventory. See the Action Plan portion of this report.

Building Location Data Inaccuracies & Resolution Process

Given the nature of many buildings in the RMTD inventory, some do not possess a physical, postal address. These may consist of some multi-building campuses or remote facilities within the Departments of Fish, Wildlife & Parks or Transportation. For instance, some state parks buildings may be identified similarly to those at the Blackfoot/Clearwater wildlife management area: "40 miles east-northeast of Missoula on State Hwy 200."
The A&E Division intends in the Action Plan that GIS data or latitude/longitude information be used to identify exact location of facilities. Archibus is capable of this function and can accommodate it visually using platforms such as Google Earth. The RMTD database is not able to accommodate this requirement.

Deficiency Ratios (i.e. Facility Condition Index, FCI)

To have confidence that a deficiency ratio reliably represents any building's overall condition, it is extremely crucial that three components in the calculation are accurate:

- Trained assessors to accurately rate/rank a deficiency of each individual element;
- Level 3 per-unit replacement cost for each deficiency of each individual element analyzed (to be provided by software through a recognized cost estimating source, such as RS Means Data); and,
- A defensible Current Replacement Value (CRV)

The overall building deficiency ratio (or FCI) can then be calculated:

FCI = total cost of all deficiencies divided by CRV

The reasons for any inaccuracy in the three components noted above are:

1) Untrained or unqualified assessors may subjectively rate/rank a deficiency too high or too low;
2) This will subsequently cause the total cost of all deficiencies to be too high or too low; and,
3) The CRV must be a true representation of a building's value in today's dollars.

Inaccuracies in any of the above will misrepresent a building's condition as either too negative or too optimistic rather than a true representation of conditions as well as a mistaken deferred maintenance backlog.

Deferred Maintenance Backlog

Deferred Maintenance is usually defined as "an amount needed but not yet expended for repairs, restoration, or rehabilitation of an asset." Also, as the unplanned or planned decision to allow physical assets to deteriorate by postponing prudent, major repairs until funding and a replacement schedule are determined.

While it is possible to provide an itemized listing of Level 3 deficiencies once assessments have been conducted, it is not possible to provide the total deferred maintenance backlog of the LRBP-eligible inventory or any individual building without accurate unit cost resources.

The A&E Division is unable to provide a full statewide deferred maintenance backlog until such time as Archibus has been fully implemented and accurate unit cost data is available, assessment teams are trained and in-place, and one full cycle of all buildings inspections has been assessed. See the Action Plan portion of this report for a listing of options.

List of Assessed & Unassessed Buildings by Agency

Prior assessments using the MSU methodology are available in the appendix of this report for portions of the Montana University System and the Capitol Complex.

However, these assessments are able to show only ratios or percentages deficient in the categories of the MSU format and should not be relied upon for replacement or renewal cost backlog information. This is because it consists of an invalid backlog costing data base (i.e. the cost support module is obsolete).

The lone exception is the Department of Military Affairs (DMA) who is mandated by the federal Department of Defense to use the Corps of Engineers' "Builder" platform. DMA uses federally contracted vendor services to conduct the assessments. DMA indicates that all of the 35 State-Owned, LRBP-eligible facilities have been included in the Builder assessments performed to date (with the exception of two that will be disposed of in the near future).

Application of the Definitions in §17-7-201(4) MCA

For many biennia, the legislature has adopted the well-conceived method of appropriating a portion of LRBP funding in a lump-sum manner under the title of "Life Safety, Code, Deferred Maintenance – Statewide." This has allowed the A&E Division to rapidly adjust projects to address critical facility issues as they arise.

HB 553 of the 66th legislature adjusted this method of LRBP funding and separated it into two processes:

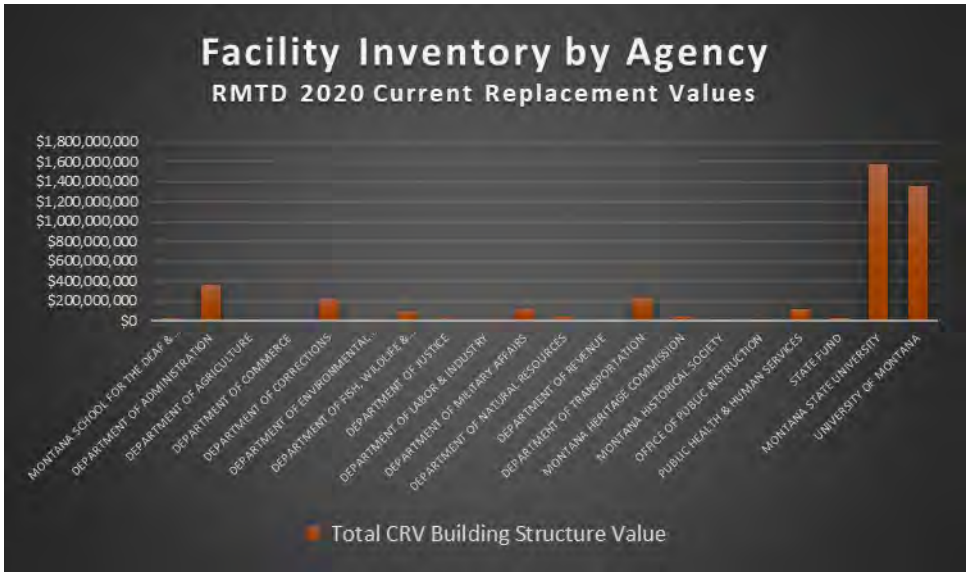

- The Major Repair LRBP account, 17-7-221

    - For renovations, alterations, replacement, or repair project less than $2.5M or a new facility less than $250,000;
    - Projects must be prioritized by the A&E Division and submitted to the Governor by November 15th; and,
    - This Facility Condition Assessment Report forms a portion of the project prioritization.
- A Capital Developments LRBP account, 17-7-209
    - For renovation, construction, alteration, site, or utility project greater than $2.5M or a new facility greater than $250,000;
    - The Major Repair LRBP account must be fully funded per 17-7-222 prior to appropriating any Capital Development projects.

The definition of an LRBP-Eligible building established in the 65th session is proving to be problematic as it affects the use of Major Repair LRBP funds on the Capitol Complex.
The Department of Administration, General Services Division's operations and maintenance budget is identified as a proprietary fund comprised of rent payments from agencies who occupy space on the Capitol complex. Though this rent is established in a rate structure approved
by the legislature and regularly contains general fund dollars, the fact that it becomes a proprietary fund through rent payments appears to eliminate the ability to use Major Repair LRBP funds to respond to projects on the Capitol complex (including the Capitol itself). It is believed this is an unintended consequence of the definition of LRBP-eligible building established in 2017.
It is recommended consideration be given to modifying the definition in §17-7-201(4) to match the intent of Senate Bill 43, which was to obtain condition assessments of buildings wherein LRBP funds could previously be used (e.g. the Capitol and surrounding complex) prior to 2017.

Current Replacement Value (CRV)

For buildings roughly <$1,000,000, the RMTD insured CRV is generated on a cost-per-square foot per building-type basis.
For buildings approximately >$1,000,000, the RMTD insured CRV is generated through an appraisal process approximately once every five (5) years.
CRVs also frequently receives inflationary adjustments to the inventory portfolio.
The insurance-appraised CRV is not necessarily equivalent to a total project cost (total project cost will typically be higher). See difference between insured CRV and a project cost CRV in the appendices.

Archibus System overview and Implementation Status

We are at the forefront of establishing a State-wide Built Infrastructure Assessment (BIA) process that institutes standard processes throughout the Agencies for all built infrastructure. The ability to anticipate built infrastructure weaknesses, thereby minimizing deterioration and failure as part of daily operations, is on the horizon and will significantly change how we budget, plan, and prioritize built infrastructure requirements.

A&E Division is actively managing the State-wide implementation of the Archibus Sustainment Management System (SMS), a suite of web-based software applications developed to help leadership, facility engineers, and technicians decide when, where, and how to best maintain the State's built infrastructure.

Individual implementation plans are being developed to address the specific tasks associated with implementing each of the specific Archibus SMS component systems. The overall purpose of this plan is to coordinate all SMS efforts with the outcome being standardized processes as an integral part of day-to-day business practices resulting in accurate and consistent asset data across the State portfolio.

Roles and Responsibilities

Roles	Responsibilities
A&E	A&E will provide policy and guidance and advocate for resources as appropriate. Additionally, A&E will provide: • Provide Sustainment Management System program oversight • Integrated information technology solutions

	• Assist the Agencies in executing facility inventory assessments of real property assets and input data into SMS • Track status of program implementation & compliance
Agencies	• Populate and maintain, with support and assistance of A&E, SMS with complete, current, and accurate asset data needed to generate sustainment, maintenance and repair requirements for the Agency's built infrastructure • Incorporate ongoing built infrastructure asset data collection, validation, and management into day-to-day operations and maintenance activities • Assist A&E with verifying/addressing SMS data issues • Ensure technicians accomplishing maintenance/repair work provide the needed updates to asset inventory/condition, including equipment/components, in the appropriate SMS format

Action Plan

Accomplished to Date

- Archibus SMS and supporting software acquisition.
- Developed a strategic communication plan to consistently provide current and accurate information to all levels of the State enterprise to continually emphasize the purpose for SMS and to advise on developments.
- Establishment of all-agency collaborative work group for Archibus implementation, data review, analysis, scope, and strategic planning.
- Collection, initial review and migration of existing agency methodology and inventory information handling.
- Determinations to:
    - Utilize RMTD inventory information;
    - Verify inventory information through future review processes;
    - Standardize all assessments on the Uniformat II method
- Facility Assessment preliminary inspection schedule for LRBP Eligible assets.

Explanation of CRV Increases Number of Buildings to be Assessed

As previously stated, the CRV as provided in the RMTD data is an insured replacement valuation appraisal based upon certain market assumptions (see appendices for further explanation) and will form the initial foundation for establishment of the FCA system.
In the event of a loss, this insured valuation does not impact RMTD's or the state's insurance carrier(s) from covering a project's cost. But, it is important to note that it is also not necessarily equivalent to a Project Cost Replacement Value for an entire facility nor does it represent the cost of an individual project to address any particular set of deficiencies.

Data Structure: UNIFORMAT II, Level 3 Approach

The building community needs a classification framework to provide a consistent reference for the description, economic analysis, and management of buildings during all phases of their life cycle. This includes planning, programming, design, construction, operations, and disposal. The elemental building classification UNIFORMAT II meets these objectives. Elements are major components, common to most buildings, that usually perform a given function regardless of the design specification, construction method, or materials used. Examples of elements are foundations, exterior walls, sprinkler systems, and lighting.
UNIFORMAT II is the elemental classification proposed in this report because it was developed through an industry/government consensus process and has been widely accepted as an ASTM standard.4 A

"standard" set of elements that are uniformly applied is essential to achieve the benefits of the elemental system approach. Shared databases of historical elemental costs, for example, are of little help in estimating future costs unless the user defines elements the same as the categories in the database.

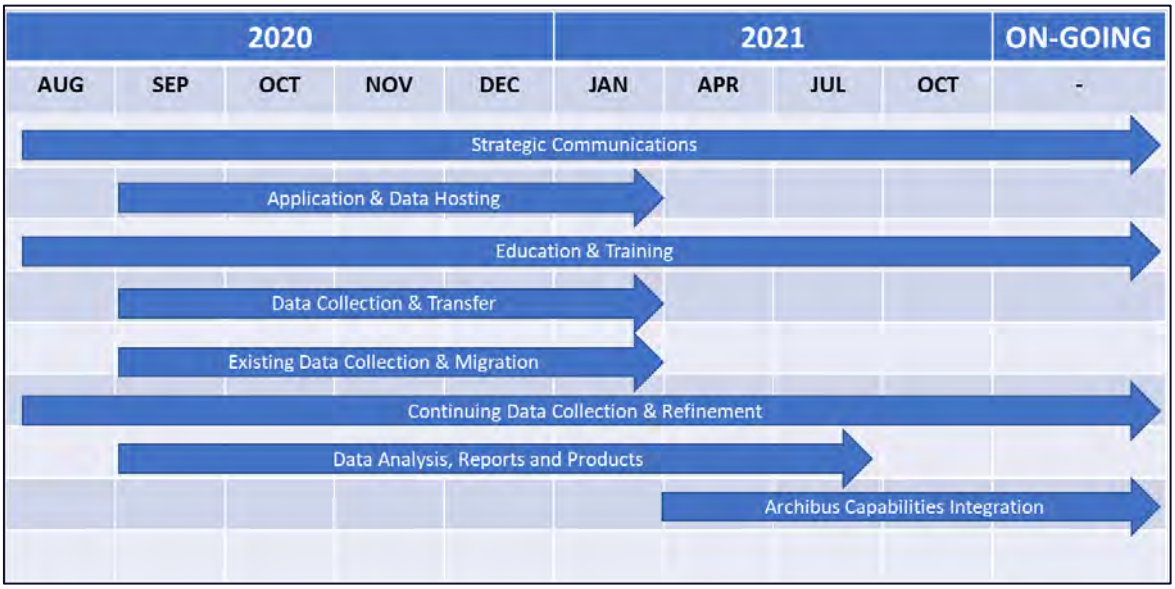

Schedule and Milestones

Archibus SMS implementation begins now. All real property assets shall have a validated FCI by September 2021. Implementation of SMS across State assets will be an on-going effort for years to come since the various Agencies inventory assessments are at differing levels of maturity and it will take some time to fully work through the process changes.

- By Dec 2020:
  - Archibus Facilities data will be adequately populated to enable generation of infrastructure requirements to support development of the LRBP
- By Sep 2021:
  - Sustaining, managing, and refining of SMS data will be fully incorporated into daily facility maintenance and repair activities.
  - Each LRBP **eligible** asset in the State built infrastructure portfolio will have a facility condition index properly recorded into Archibus based on inspections conducted using the SMS standard process completed for all facilities and facility components as required by §17-7-202 MCA.

Tasks

The following tasks outline the plan by which SMS will be implemented across the State enterprise:

Conclusions and Recommendations

SMS provides State enterprise-wide asset visibility of condition and geographic data, enabling higher levels of leadership to project long-term built infrastructure requirements. A&E Division can also supplement or validate requirements models for the development of the facilities deferred maintenance budgeting process and assist in the development of projects for inclusion in the Major Repair LRBP account. The State can apply asset management principles to its real property portfolio based on current data, which is essential in a highly resource-constrained environment.

Currently, the Agencies use different methodologies (e.g., AIM, BUILDER) for assessing the condition of its assets. Disparate condition assessment systems result in an inability to accurately plan, program, and budget work for facilities. Further, it blurs the connection between asset management best practices and benefits, such as reduced workloads and project funding based on more refined future year requirements. There is an immediate need to provide guidance (i.e., a standard assessment process) to the field to achieve the mission of standardizing, collecting, analyzing, validating, and maintaining accurate vertical infrastructure data to support resource allocation and operational decisions. A&E Division is actively incorporating this guidance and expects full implementation as described in the Action Plan of this document.

Bottom-Line is that SMS represents a shift toward a proactive versus reactive asset management strategy. Instead of keeping assets operational throughout their lifecycle by relying primarily on corrective repairs, this strategy focuses on condition-based repairs, which can be planned prior to an asset's failure with the support of Archibus. This results in higher performing assets at lower lifecycle costs. When fully developed, Agencies will experience a powerful, user-friendly tool to support daily operations. In the near future, A&E Division will achieve enterprise-wide asset visibility to inform wide-scale resource allocation and strategic planning. SMS establishes a knowledge base that makes built infrastructure data more complete, consistent, reliable, and accessible.

FACILITIES CONDITION ASSESSMENT SUMMARY REPORT

DEFICIENCY RATIOS & BUILDING CONDITION AS OF AUGUST, 2020

GSD GENERAL SERVICES

1310 East Lockey Avenue, Helena Montana, 59620 | (406) 444-3060 | www.gsd.mt.gov

GENERAL BACKGROUND

The General Services Division team has conducted over 100 Facilities Condition Assessment (FCA) audits since 2014. Each building on our campus is assessed every three to five years. GSD manages six percent of the State's building portfolio.

GSD's FCA program is modeled after the Facility Condition Inventory application and process built by Montana State University.

GSD conducts FCA's to establish spending priorities and to track the deferred maintenance backlog for our building portfolio. This tracking effort allows us to identify where deficiencies are, report on them, target the most prudent repairs, and take care of safety issues. The FCA allows General Services to understand the physical condition that our facilities and assets are in. Condition comparisons are made by using deficiency ratios.

DEFICIENCY RATIO

Each deficiency recorded on our audits has an associated remediation or repair cost. A deficiency ratio is found by taking the estimated cost of repair work and dividing it by the estimated cost to replace the entire building. These values are automatically calculated using MSU's FCI application.

DEFICIENCY BACKLOG

The total dollar value of maintenance projects and repairs that are postponed due to budget constraints.

ABOUT THIS REPORT

The following table, chart, and graphs show key building condition data collected by General Services. The team is currently in its third audit cycle.

FCA AUDIT BUILDING DEFICIENCY RATIOS: (CYCLE 1 2014 – 2015)

FCA BASELINE DATA: CYCLE ONE DEFICIENCY RATIO BY BUILDING AS OF AUGUST 2018

A COMBINATION OF CYCLE TWO AND THREE DATA (2016-2020)

KEY TAKEAWAYS | TOTAL DEFERRED MAINTENANCE BACKLOG AS OF AUGUST 2020

The deferred maintenance backlog for the Montana capitol complex is approximately 60 million dollars, based on data from the Facility Condition Assessment (FCA) cycle one process. Cycle three is currently underway but not yet completed. The deferred maintenance consists of many life safety and critical infrastructure issues. Exterior envelope components such as roofs, skylights, windows, doors and exterior finishes have deteriorated over time due to age and are in need of replacement. Interior systems and finishes, such as Heating, Ventilation, Air Conditioning (HVAC), flooring, fire protection, central alarming, building controls and wall finishes have deteriorated to a level requiring replacement. Exterior site improvements have also been deferred for a period of time which has had catastrophic results on parking lots, drainage, and campus accessibility.

Removal requested.	*Deteriorated condition and past EUL.*	$3,000
5467 UPPER CALVING BARN		
Envelope		
Replace exterior door seals		$2,000
5468 CATTLE RESEARCH SCALE HOUSE		
Roof System		
Spray foam insulation		$10,000
NWARC		**$387,100**
6402 RESIDENCE		
Envelope		

MAES Structure Deficiency Summary

From April-July 2020 Facility Condition Assessment

System / Deficiency	Commments	Sum of Est. Cost
640 Extend siding to grade		$4,000
Install siding on exposed concrete basement walls		
Replace basement windows		$1,500
Foundations		
Investigate condition of foundation		
Site		
Add mow strip to perimeter to house for protection		$2,000
6403 RESIDENCE GARAGE		
HVAC		
Add gable vents to improve ventilation		$1,000
6408 CROPS RES/OFFICE/LAB		
Roof System		
Add entrance canopy to east door.		$5,000
Site		
Move lab to building 6410. Create new wrk space	*Create new staff and grad work room and space.*	
6410 GARAGE/TWO WET LABS		
Electrical System		
Add lighting (LED)		$2,000
Envelope		
Add doors to equipment storage.		$10,000
Replace exterior windows	*Qty 5*	$3,500
Replace siding		$20,000
Finishes		
Add interior door between adjacent labs		$1,500
HVAC		
Add Air Conditioning		$5,000
Add separate controls for both labs and furnace.		$2,000
Roof System		
Replace gutter and add heat tape		$3,000
Replace roof		$20,000
Site		
Renovate wet lab spaces.	*This project will meet today's research needs.*	$100,000
6411 SHOP		
Envelope		
Replace existing siding with composite siding.		$25,000
Replace exterior windows.		$2,000
Replace overhead doors	*qty 2*	$8,000
Roof System		
Build retaining wall on east side.	*Project will prevent erosion on east side.*	$5,000

MAES Structure Deficiency Summary

From April-July 2020 Facility Condition Assessment

System / Deficiency	Commments	Sum of Est. Cost
641 Replace roof		$20,000
Replace roof insulation	*Infested with mice.*	$6,000
6412 Equipment Storage		
Electrical System		
Add electric outlets along walls		$2,000
Add LED lighting		$15,000
Finishes		
Repaint door trim every five years		$100
Floor System		
Replace dirt floor with concrete		$7,500
Site		
Relocate loft to east side of storage space.		$2,000
6416 CHEMICAL STORAGE/HANDLING FACILITY		
Site		
Investigate reuse as pumphouse	*for new irrigation system or storage.*	
6417 MACHINE SHED		
Electrical System		
Add electrical outlets along all walls		$3,000
Add lighting		$20,000
Envelope		
Replace exterior siding		$40,000
Replace slider doors with overhead door	*Windows preferred on overhead doors.*	$8,000
Floor System		
Replace dirt floor with concrete		$25,000
Site		
Add mow strip around perimeter		$2,000
6424 GREENHOUSE		
Electrical System		
Upgrade lighting to LED	*6 fixtures*	$10,000
6426 SEED & PLANT PROCESSING RESEARCH, WET LAB		
Roof System		
Add snow and ice guards	*Ice will brake soffit vents*	$2,000
6429 PESTICIDE BUILDING		
Envelope		
Monitor condition of exterior beams	*Consider painting soon*	
Site		
Add mow strip around primeter		$2,000
6430 VEHICLE REPAIR SHOP		
Site		
Add mow strip around perimeter	*Gravel or washed rocks*	$2,000

Foundations		
Monitor foundation spalling		
3467 DRYING ROOM EAST BARN COMPLEX		
Envelope		
Paint exterior siding		$10,000
Roof System		
Replace roof		$40,000
WARC		**$315,300**
7401 BIO LABORATORY/LUNCH ROOM		
Electrical System		
PLAN B: Install built-in serge protection at panel		$1,500
HVAC		
PLAN B: Upgrade HVAC System	*AC and duct work needed for lab air flow/temp*	$6,500
Site		
PLAN A: Convert to student housing	*Labs would have to be relocated into new Chem Lab*	$80,000
PLAN B: Add sink and more wet lab benches		
PLAN B: Create space for wet lab.		
PLAN B: Updates for lab with minimum functionality	*Building does not adequately support lab functions*	
7402 RENTAL HOUSE/OFFICE		
Envelope		
Replace concrete steps to north entrance with smal	*12x12*	$5,000
Replace windows with operable		$10,000
Roof System		
Add gutters and down spouts		$2,000
Replace roof	*Low priority as of year 2019 record*	$10,000
7403 MAIN OFFICE		
Envelope		
Replace siding		$25,000
Replace windows		$8,000
Finishes		
Replace floor finishes		$12,000
Roof System		
Install roof insulation		$6,500
Replace roof covering		$15,000
Site		
Investigate permanent solution to pest entry		

MAES Structure Deficiency Summary

From April-July 2020 Facility Condition Assessment

System / Deficiency	Commments	Sum of Est. Cost
7404 TOOL SHED & COLD FOOD STORAGE		
Electrical System		
Replace lighting and fixtures with LED		$4,000
Floor System		
Add vinyl flooring in cold storage.		$1,500
Plumbing System		
Install hand wash sink	*Includes drain and water supply.*	$12,000
Roof System		
Replace/add gutters and down spouts	*Currently no gutters exist on north side.*	$1,000
Site		
Rebuild/Relocate loft.	*Poor accessibility and location.*	$5,000
Regrade exterior to slope away from foundation		$3,000
7405 GRIND RM/GREENHOUSE		
Envelope		
Poor insulation		
Rotted siding with holes in walls. Pest issues.		
Sill plate rotted in multiple locations		
Windows rotted, leaking and uninsulated		
Finishes		
Lead paint and likely asbestos floor tiles.	*Seal and cover.*	
Foundations		
Building is sloped - Monitor foundation issues		
HVAC		
Active gas lines in seed storage and main room.	*Lines are active and may cause fire danger*	
Insufficient ventilation/air filtration		
Roof System		
Roof sagging on south side		
Site		
Insufficient place to work.	*Work often moved outside*	
PLAN A: Demolish grinding rooms	*Deteriorated condition and past EUL.*	$10,000
PLAN B: Temporary plan to improve function/safety		
7406 HORTICULTURE AND SOILS LABORATORY		
Envelope		
Extensive rot in eaves and siding.	*Demolish requested - not worth repair*	
Siding does not seal exterior from pests	*Demolish requested - not worth repair*	
Sill plate rotten in several locations		
Floor System		

MAES Structure Deficiency Summary

From April-July 2020 Facility Condition Assessment

System / Deficiency	Commments	Sum of Est. Cost
740 Failed/rotten floor supports in basement.	*Demolish requested - not worth repair*	
Floor insulated with sawdust and poorly sealed		
Foundations		
Concrete floor in N. Addition is poorly supported	*Demolish requested - not worth repair*	
Plumbing System		
Poor insulation. Pipes freeze in sub zero temps	*Demolish requested - not worth repair*	
Roof System		
Roof sagging on both east and west sides	*Demolish requested - not worth repair*	
Site		
PLAN A: Demolish		$20,000
PLAN B: Minor updates to temporarily use lab space	*Demolish requested - not worth repair*	
7409 TRACTOR/EQUIPMENT STORAGE & MACHINE SHOP		
Electrical System		
Upgrade lighting distribution and install LEDs in	*In shop.*	$8,000
Envelope		
Provide/Install New Siding		$10,000
Remove dividing center shop wall and add ext. Door		$5,000
Repair north and west walls	*Damaged siding*	$1,000
Replace exterior shop windows		$1,500
Plumbing System		
Replace compressed air piping		$1,200
Upgrade Water Supply Line	*Connect to line 30' North*	$2,000
Roof System		
Insulate shop		$4,000
Investigate structural repairs to tractor shed	*Roof trusses sagging.*	$5,000
Provide/Install Gutters		$3,000
Site		
Add gas heat to Shop	*extending gas line is $2700*	$6,000
Tractor shed space inadequate and not large enough	*Consider replacing with large equipment shed*	
7410 BIO LAB/GREENHOUSE		
Envelope		
Repaint exterior of enterance enclosure		$1,000
Plumbing System		
Add utility sinks to facility to wash pots, etc.		$5,000
7411 FERTILIZER/PAINT STORAGE		
Envelope		

MAES Structure Deficiency Summary

From April-July 2020 Facility Condition Assessment

System / Deficiency	Commments	Sum of Est. Cost
741 Repair water damage on exterior of North wall.		$1,000
Replace trim and seal.	*1500*	
HVAC		
Relocate space heater closer to main supply line	*Frost protection for water system inadequate*	$500
Plumbing System		
Add cold water exterior frost free spigot		$1,500
Does french drain meet code?		
Replace pluming features and fixtures		$2,000
Roof System		
Add gutters on North side and connect to drain.		$1,500
Replace roof.		$2,500
Replace window (1)		$600
Site		
Convert south side to fruit processing		
Regrade around exterior	*Deficiency covered by road maintenance.*	$1,500
7412 Pump / Well House		
Electrical System		
Provide/Install New Electrical Heater	*Currently Using Heat Lamps*	$1,500
Finishes		
Repaint exterior		$1,000
7414 STORAGE SHED		
Roof System		
Replace roof		
Site		
Remove and patch west door	*West door limits space and functionality*	
7417 HOOPHOUSE #1		
Plumbing System		
Add frost-free hydrant and water supply.		$1,500
7418 FUEL TANKS		
Site		
Replace gas pumps		$8,000
7419 HOOPHOUSE #2		
Plumbing System		
Add frost-free hydrant and water supply.		$1,500
WTARC		**$124,000**
0 FUEL TANKS

Strategic Master Planning Report

MONTANA STATE DEPARTMENT OF CORRECTIONS

FINAL DRAFT REPORT | JUNE 29, 2020

Montana State Prison, Aerial

DLR Group

Cushing Terrell

- SECTION 3.0 -

EXISTING PHYSICAL CONDITIONS

INTRODUCTION

State prison facilities require a relatively robust security environment to ensure public, staff, and inmate safety in their operation. Depending on the security classifications of the in-custody population, construction materials and finishes have higher requirements than typical commercial or institutional grade construction. Moreover, prison utilization is 24 hours a day/ 7 days a week and is subjected to relatively hard use.

In assessing existing physical conditions in master planning, the primary focus is the physical condition in terms of long term utilization building by building. The objective is to develop information for the state to determine the relative viability of each building over a twenty-year planning horizon. Additionally, the objective is to develop and evaluate options for system configuration to accommodate additional bed capacity over time. As part of this process, a range of options need to be considered – from maximize /expansion reuse through minimum reuse/ new construction to allow informed decision making on the part of the state. In conjunction with this a phased plan addressing immediate critical needs and future needs to permit incremental implementation.

APPROACH

Based on discussion with Central Office and Facility Stakeholders, the approach to the overall physical condition assessment process were identified as follows:

1. Table top review of the CGL 2008 Master Plan to develop an understanding of the physical conditions at that point in time. With a few exceptions, the existing buildings at the Montana State Prison (MSP) and Montana Women's Prison (MWP) are relatively unchanged, other than being 12 years older.
2. Refinement of prior Facility Condition Inventory (FCI) forms to reflect the specific aspects necessary to assess Montana Prison facilities. For any current capital project initiative, the FCI's are a required element in such requests for funding. The point of beginning was the FCI forms recently used to assess school buildings across the state.
3. Based on the effort in 1 and 2 above, the approach utilizes on site survey by architects and engineers to verify current physical conditions – broken down into standard construction elements (e.g. structure, exterior envelope, HVAC systems and the like). The information required for completion of the FCI forms is significantly more detailed than typically required in a system-wide correctional master plan. Documenting building information on a systems basis allows us to separate the renovation/upgrade costs of physical elements from utilization fit out for continued use or re-purposing for adaptive reuse.
4. The on-site survey effort is also intended to verify the utilization of each building, recording the functional component elements located by building by floor. This is verification of what the utilization was recorded as in the CGL 2008 Master Plan, with a focus on identifying any changes.
5. A DLR Group database will be used for documentation of summary conditions of the various building condition elements, then calculation of the relatively viability of each building for continued long term use. The internal database calculations will produce ratings of maintain, renovate, or replace – measuring the relative cost to extend utilization for another 20 years versus the cost of replacement.
6. Based upon the bed capacity "shortfall" between projected in-custody population and existing viable capacity, options will be developed (from maximum reuse to minimal reuse) with a specific focus of having the right kind of housing units for the anticipated inmate characteristics/ classifications. The conceptual options will be developed to reflect phased implementation consistent with anticipated inmate population growth.

SITE/UTILIZATION PLANS

As a first step, the DLR Group/Cushing Terrell team developed site/utilization plans from Google Earth aerial images that show the physical configuration of each facility and locate the distribution of operational functional components by building. These are incorporated on the following pages.

In order to verify existing physical conditions, Montana has a requirement to provide on-site physical condition survey information. As a first step, base floor plan drawings must be developed for each building to be surveyed. To the extent possible, general building utilization plans from the 2008 CGL Master Plan Appendix were used as a point of beginning; plans for buildings not in that document were developed from various drawings provided by the State.

As an essential part of the field survey work is recording the utilization of each building in terms of functional component areas related to each. Again, this is looking at variations/changes from the 2008 CGL Master Plan.

For Phase 1, the physical condition assessment is being limited to physical assessment of buildings of consequence at MSP and MWP. Those buildings include the following:

MSP

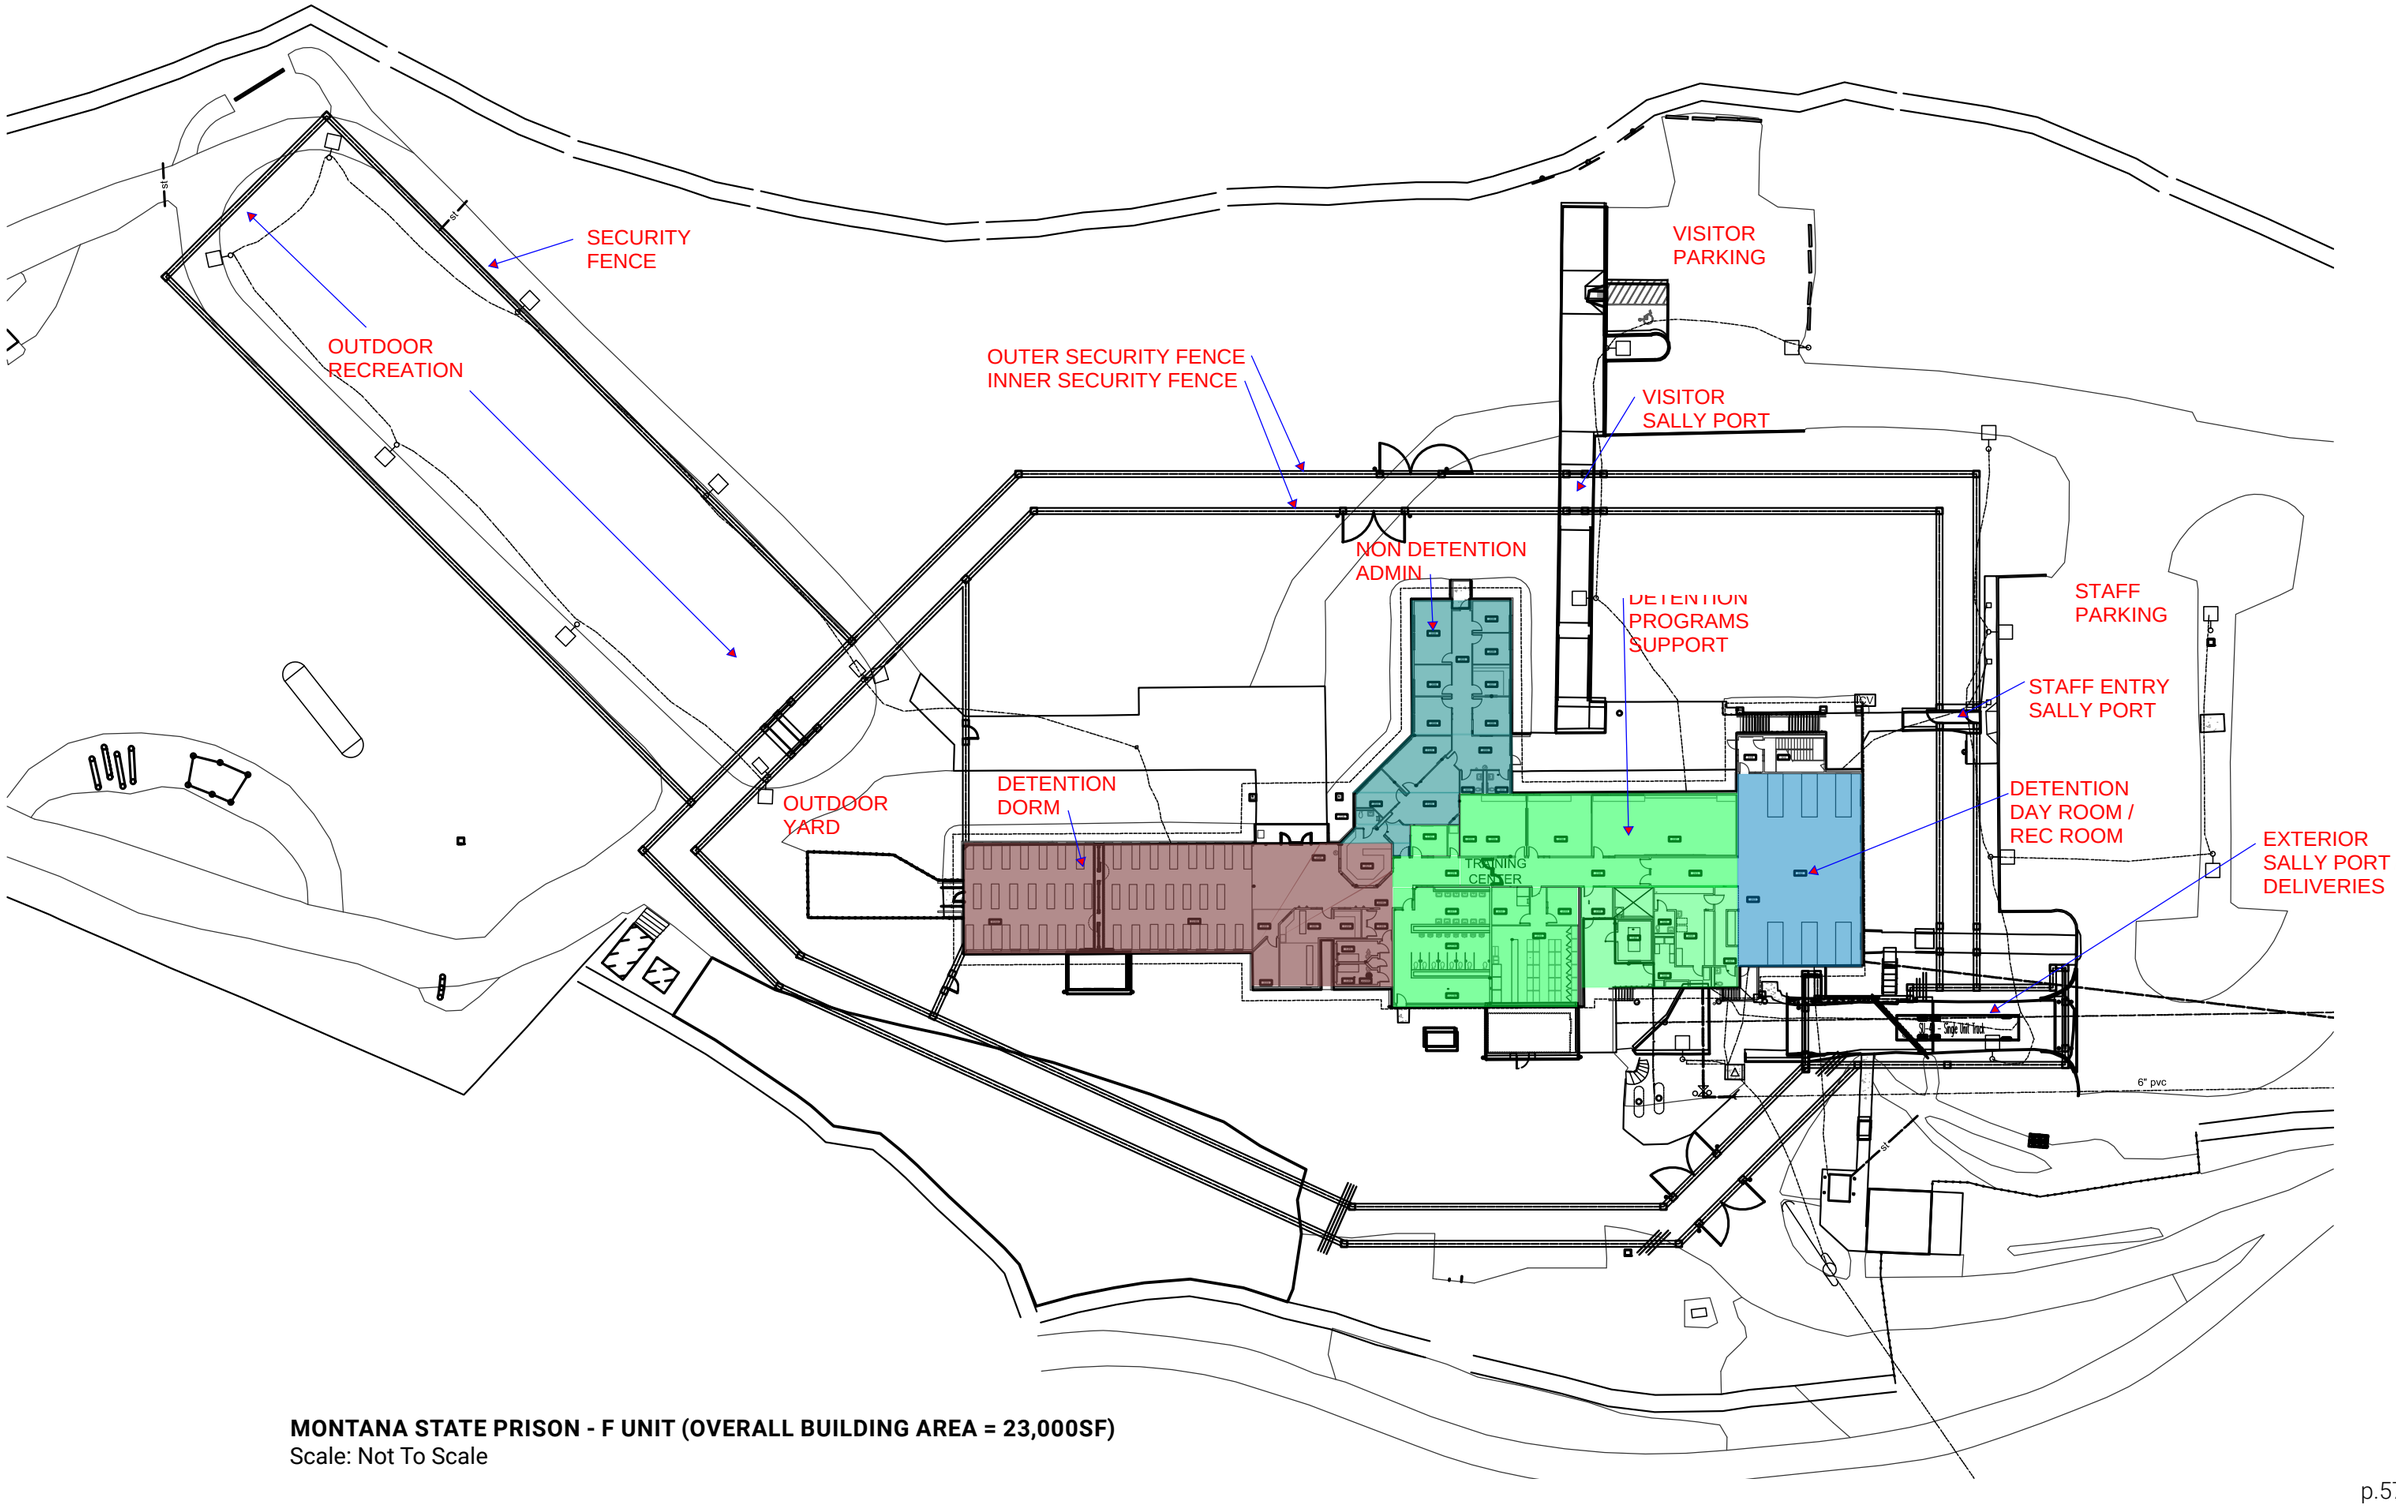

Bldg. Number	Building Name	Year Built
B1	Martz Diagnostic and Intake Unit (MDIU)	2004
B2	Wallace Administration Building	1979
B3	Support Reception Building	1968
B4	Infirmary Building	1985
B5A	High Side Food Service Building	1976
B5B	MCE -High Side Laundry	1996
B6	High Side Restricted Locked Housing Unit 1	1986
B7	Unit F Work Dorm/Expansion	1995
B8	Close Unit I	1979
B9	Close Unit II	1979
B10	High Side Restricted Locked Housing Unit 2	1986
B13	DOC Training Center/Armory	1963
B13A	MSP Armory	1968
B14	High Security Support / Visiting	1982
B15	Low Security Support (Rothe)	1968
B16	Main Prison Warehouse	1988
B17	Religious Activity Center	1979
B18	Warehouse/Canteen	2009
B19	High Security Gym / Staff Gym	1950
B20	Low Security Gym	1984
B21	MSP-Maintenance Complex	1965
B21A	MCE - Motor Vehicle Facility	2001
B21B	MCE - Industries: Furniture Shop-	
B22	Low Security Housing Unit D	1990
B23	Low Side Unit A Housing	1976
B24	Low Side Unit A Commons	1974
B25	Low Side Unit B Housing	1976
B26	Low Side Unit B Commons	1974
B27	Low Side Unit C Housing	1976
B28	Low Side Unit C Commons	1974
B29	Central Kitchen (Food Factory)	1998
B30	MCE- Tag Print Shop-Sign Shop Bldg.	1984
B31	Work Release Center (WRC) Dorm	2000
B32	MCE- Tin Cup Bldg.	2015

MWP

Bldg. Number	Building Name	Year Built
B1A	MWP Main Building	
B1B	Gym/Property/Visiting	
B2	Industries/Chapel	
B3	Intake/Secure Housing/Infirmary	

BUILDING UTILIZATION PLAN

A sample Building Utilization Plan is incorporated on the following page. One example is incorporated in the Draft Phase 1 Report because Covid-19 significantly delayed the ability to get on site and perform this work, which is still in progress. The facilities listed above will all be incorporated once the field survey work has been performed and the FCIs completed. The FCIs will be incorporated as an Appendix.

MONTANA STATE PRISON - F UNIT (OVERALL BUILDING AREA = 23,000SF)
Scale: Not To Scale

For capital projects in Montana, there is a requirement for comprehensive physical condition information for each existing building by building system. From prior work in the Montana, the original format utilized for schools across the state has been refined for buildings in this project. A single sample copy of the Facility Condition Inventory (FCI) used on this project is incorporated on the following pages.

While the FCI format documents detailed information by building system/element, summary information is needed for master planning purposes. This requires the field survey team architects and engineers to consider all the information they gathered and make some basic summary conclusions on the overall condition for each building element/system. Based on that effort, the results of that consideration will be entered into the database.

Sample data entry forms (and preliminary data for MSP Housing Unit F) are incorporated on the following pages.

Basic Site Information

Location/Address: 400 Coney Lake Road

Building Area: 22435

Deer Lodge MT 59722

General Building Information

Initial Construction Date: 1995 | Facility Age: 25 | No of Floors: 2 | ☐ Modular/ Temporary

General Facility Description:

Historically, this facility was the Treasure State Correctional Trainiing Center. It has been previously used as a boot camp facility for low security inmates. It was reconfigured to be Housing Unit F for minimum security treatment programs.
While part of the overall capacity of the Montana State Prison, it is located a couple miles away from the main facility complex.

Major Renovations/Expansion Projects

Facility Completely Renovated? ☑ | If yes, Date of Last Major Renovation: 2017

	Year	
1	2017	Upgrades to dorm, life safety improvements, energy/mechanical system improvements, and security perimeter improvements.

2: Strucuture: Steel Frame/ Concrete Floors | Condition (0-5): 1

Building Frame Type:
- Wood Frame
- Steel Frame
- Concrete or CMU
- Concrete Moment Frame
- Unreinforced Masonry Wall
- Other/Indeterminate

Description of Structure: Floor system is steel frame with concrete. Primary strucutural elements are wood framing. The roof system is wood framed.

Structure Condition Comments:

3. Exterior Envelope: Exterior Material Type: B | Condition (0-5): 1

Level A= Tilt-Up,Dryvit, or Painted CMU
Level B= Precast, Brick, or Middle of the Road Curtain Wall
Level C= High End Curtain

Wood framed and steel exterior wall assembly finished with hardwood siding, EIFS systems and metal fascia trim panels.

Comments on Condition of Exterior Envelope:

Overall wall assemblies and trim in good condition. General maintenance items of sealant around windows and openings to be addressed.

Level A= Modular or Shingles
Level B= Built-Up/Single Ply
Level C= Ornamental Metal,Tile

4: Roof Type Material (Level A, B, C) A | Condition (0-5): 5

Roof Description and Comments: Original asphalt shingles that are weathering, tearing, and lifting in areas due to weather. The shingle roof needed to be replaced two years ago.

5: Interior Finishes: Condition (0-5): 1

Interior finishes in the dormiotory and programs areas upgraded in 2017, while subject only to low/minimum security use. Administrative area finishes are good.

Rating Codes
0= Not Applicable
1= Normal Maintenance
2= Minor Renovation
3= Moderate Renovation
4= Major Renovation
5= Replacement Required

Interior Finishes Comments: Current use will require renewal and refurbishment of finsihes 5 to 10 years out.

6: HVAC Systems Condition (0-5): 2

HVAC systems for Dormitory housing area of the building were upgraded to meet current ventilation requirements.

HVAC Evaluation Comments: No major issues.

7: Building Plumbing Systems: Condition (0-5): 1

Common toilet shower areas in inmate living areas plus staff toilet areas.

Plumbing System Evaluation Comments: No issues noted.

8: Building Fire Protection Systems: Condition (0-5): 1

New installation in 2017 to provide a fire sprinkler system throughout the building.

Fire Protection Evaluation Comments: No issues noted.

9: Building Electrical Systems: Condition (0-5): 1

Electrical systems are 1995 technology with minot upgrades over time.

Building Electric Evaluation Comments: No significant issues noted.

10: Vertical Transportation Condition (0-5): 2

Stairs only.

Vertical Transportation Comments: Some finishes need renewal.

of Elevators: | # of Stairs: 2 | # of Floors: 2 | # of Escalators:

11: ADA Compliance Condition (0-5): 3

ADA compliance from Visitor parking to administrative areas provided in 2017 renovation. Inmate areas compliant. Some staff areas don't meet ADA compliance.

Life Safety Evaluation Comments: Door hardware upgrades required for staff area compliance.

12: Life Safety Systems: Condition (0-5): 1

Firm Alarm and Fire Sprinkler Systems were upgraded in 2017.

Life Safety Evaluation Comments: No problems noted.

5= Replacement Required

13: Comm/Tech Distribution Condition (0-5): 4

AIPHONE System technology of 25 years ago.

Comm/Tech Evaluation Comments: Outdated, antiquated system for voice communications needs to be upgraded.

14: Electronic Security Distribution Condition (0-5): 4

Security system/ CCTV cameras is an old AIPHONE system utilized for control of security gates and communications.

Security Electronics Evaluation Comments: Security system is outdated, needs majjor upgrade.

Expandability/Adaptability

If this element of the MSP were to be expanded, there is adequate site areaa to do so. The building is only amenable for minimum security offender use.

General Master Planning Comments

Any expansion will need to address Utilities, Eletric, Water, and Sewer services upgrades. The rated capacity is currently limited due to infrastructure considerations.

BUILDING CONDITION EVALUATION

As part of the overall master planning effort, the existing physical condition of each facility/ building was assessed based upon prior studies and reports, combined with an on-site tour to validate current conditions of each building element. The physical condition of each major architectural, structural, and engineering system of the building was evaluated on a scale of 1 to 5, with a rating of "1" equating to "normal maintenance" condition; and a rating of "5" equating to a need for complete replacement of that element. A rating score of "0" was used to signify that the element was "not applicable" or "not required". These ratings in turn reflect a range of percentage upgrade required, which equates to the cost to upgrade each system rated.

Using this approach, a rating of "1" is equated to 0% of total replacement cost required; a rating of "2" equated to 25%; a rating of "3" equated to 50%; a rating of "4" equated to 75%; and a rating of "5" equated to 100%. Elements rated "0" are deemed not applicable and are dropped from consideration. The rating then, expressed as a percentage, will be multiplied by the building gross area and the applicable unit cost to develop a weighted approach to evaluating each major building system and the building as a whole. Based on this analysis, an overall building rating will be calculated as a percentage of equivalent new (replacement) construction as a way to determine a cost/re-use potential from the perspective of the physical condition of the building.

The total rating for the building is the sum of the ratings described above and is a composite percentage “score”, calculated as 1 minus (the total cost to renovate these systems divided by the cost to replace). This percentage is viewed as the value of what currently exists in terms of capital plant, with the difference between this value and 100% representing what is necessary to bring all systems to adequate condition for continued long term use. Using this approach, a total Building Physical Rating summary less than 40% is deemed "Inadequate" overall and is recommended for replacement; from 40% to 59.99% deemed "Marginal" and recommended for renovation; and 60% or more deemed “Adequate” and recommended for ongoing maintenance for purposes of this Study.

It should be noted that there is no “excellent” rating. The objective here is to determine only what building systems are adequate (or better) for their intended purpose. Further, for system aspects rated 1 or 2, no comment on condition is required. For system aspects rated 3, 4, or 5 a condition comment is required to indicate the basis for that rating.

A sample two-page summary viability rating report is shown on the following pages.

NEXT STEPS

Phase 1 work will provide a general assessment of the major buildings at MSP, and MWP in terms of accommodating current use, and assessing the viability of each for continued use for the next 10-20 years. Information on the general physical condition assessments will also be used to consider what the highest and best use for each building in terms of the long range Master Plan. This information will also be compiled with respect to the functional/operational assessment of each building to determine their combined assessment.

A further objective in Phase 2 will be identification of detailed immediate actions that should be undertaken to maintain current secure facility operations, which only be estimated at this time.

Montana Women's Prison, Symphony at the prison

- SECTION 4.0 -

EXISTING OPERATIONAL CONDITIONS

INTRODUCTION

In assessing an existing correctional environment, there are two primary aspects to consider – physical conditions and operational conditions. These are of equal importance in terms of having an effective correctional environment. The objective of a master plan is to make up the difference between projected needs and what the existing resources are to accommodate those. We call this a "Shortfall Analysis". In addressing future needs, we also want to incorporate the best practices from across the industry to reflect the ways in which the Montana DOC wants to operate their facilities effectively.

MASTER PLAN FOCUS: OPERATIONAL PLANNING AND DESIGN

The potential capital construction cost to add system capacity and renovate/replace existing buildings can represent really significant costs – especially if you are looking at expenditures to maintain/expand the system over the next 20 years. However, in any life cycle cost analysis, the total operational cost experienced year after year makes the capital cost pale by comparison.

As shown in this graphic, Capital Construction Costs and Fees represent approximately 10% of the 20-30 year life cycle cost analysis. This demands a focus on improving operational efficacy as an integral part of the master planning process. To assess existing operational conditions, we first break the complex nature of correctional facilities down into functional component areas (e.g. each type of housing units, food service, medical/ mental health, and so on) to understand current operation, document issues, and generate ways to enhance facility operations along with addressing infrastructure needs.

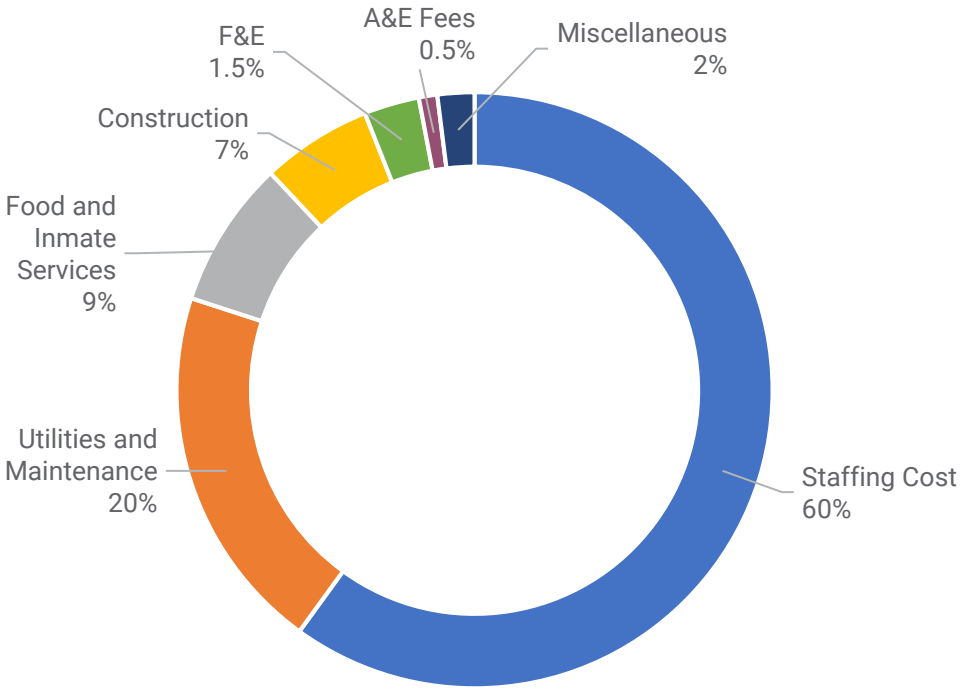

Note Bene: This Section is summary of the operational assessments performed in Phase 1.

ENHANCED OPERATIONS

- HOUSING UNIT CONFIGURATION
- INMATE MOVEMENT
- SITE LINES
- SECURITY
- SPECIAL NEEDS
- STAFFING EFFICIENCIES

ENHANCED INFRASTRUCTURE

- BUILDING SYSTEMS
- DAYLIGHTING
- MATERIALS

MONTANA STATE PRISON [MSP]

KEY ISSUES

Based on discussion with Central Office and Facility Stakeholders, overall operational issues were identified as follows:

1. Additional male capacity is needed; they are at full capacity and new intakes are backing up in the Martz Diagnostic Intake Unit (MDIU) awaiting beds to be available in the designated security level they need to go to.

   Similarly, state-ready inmates are backing up in the County Jails.

2. Infrastructure: Older buildings throughout hinder operation and require constant maintenance. There is significant deferred maintenance. Also, new statutes (locked housing, ADA, mental health) are not easily accommodated in outdated building designs.

3. The large Campus Plan configuration requires significant movement between security zones; with the required escorting staff intensive.

4. Staff recruitment and retention are hampered by the remote location of the facility and relatively low pay scale, particularly for skilled and craft positions.

5. Staffing is really lean; there is a need to increase the use of technology to improve efficacy; current technology needs major improvements.

6. MSP doesn't have the type of housing units designed for special needs inmates - namely acute and step-down mental health; therapeutic communities. They are using "standard" housing units for these purposes.

7. They don't have the physical space and staffing to achieve their target program assignments, which leaves inmates idle.

8. Recent changes in the law for restricted housing and non-compliance in all respects for ADA accessibility standards are recent actions that drive the need for physical and operational changes.

FUNCTIONAL COMPONENT ASSESSMENTS – NON-HOUSING AREAS

Component 00: Site Development
Rating: Marginal

MSP has a campus configuration within an overall perimeter security system that is internally subdivided into fenced security zones reflecting the security level of inmates housed there. Basically, there is a high side and a low side, with some support functions located between them. Outside the overall security perimeter are separate secure fenced compounds for the Martz Diagnostic Intake Unit (MDIU) and the Montana Correctional Enterprises/ Maintenance/ Motor Pool. A separate "free world" access compound is provided for the Food Factory, Laundry and Warehouse. F-Unit (treatment / programming unit) is located nearby outside the primary security perimeter.

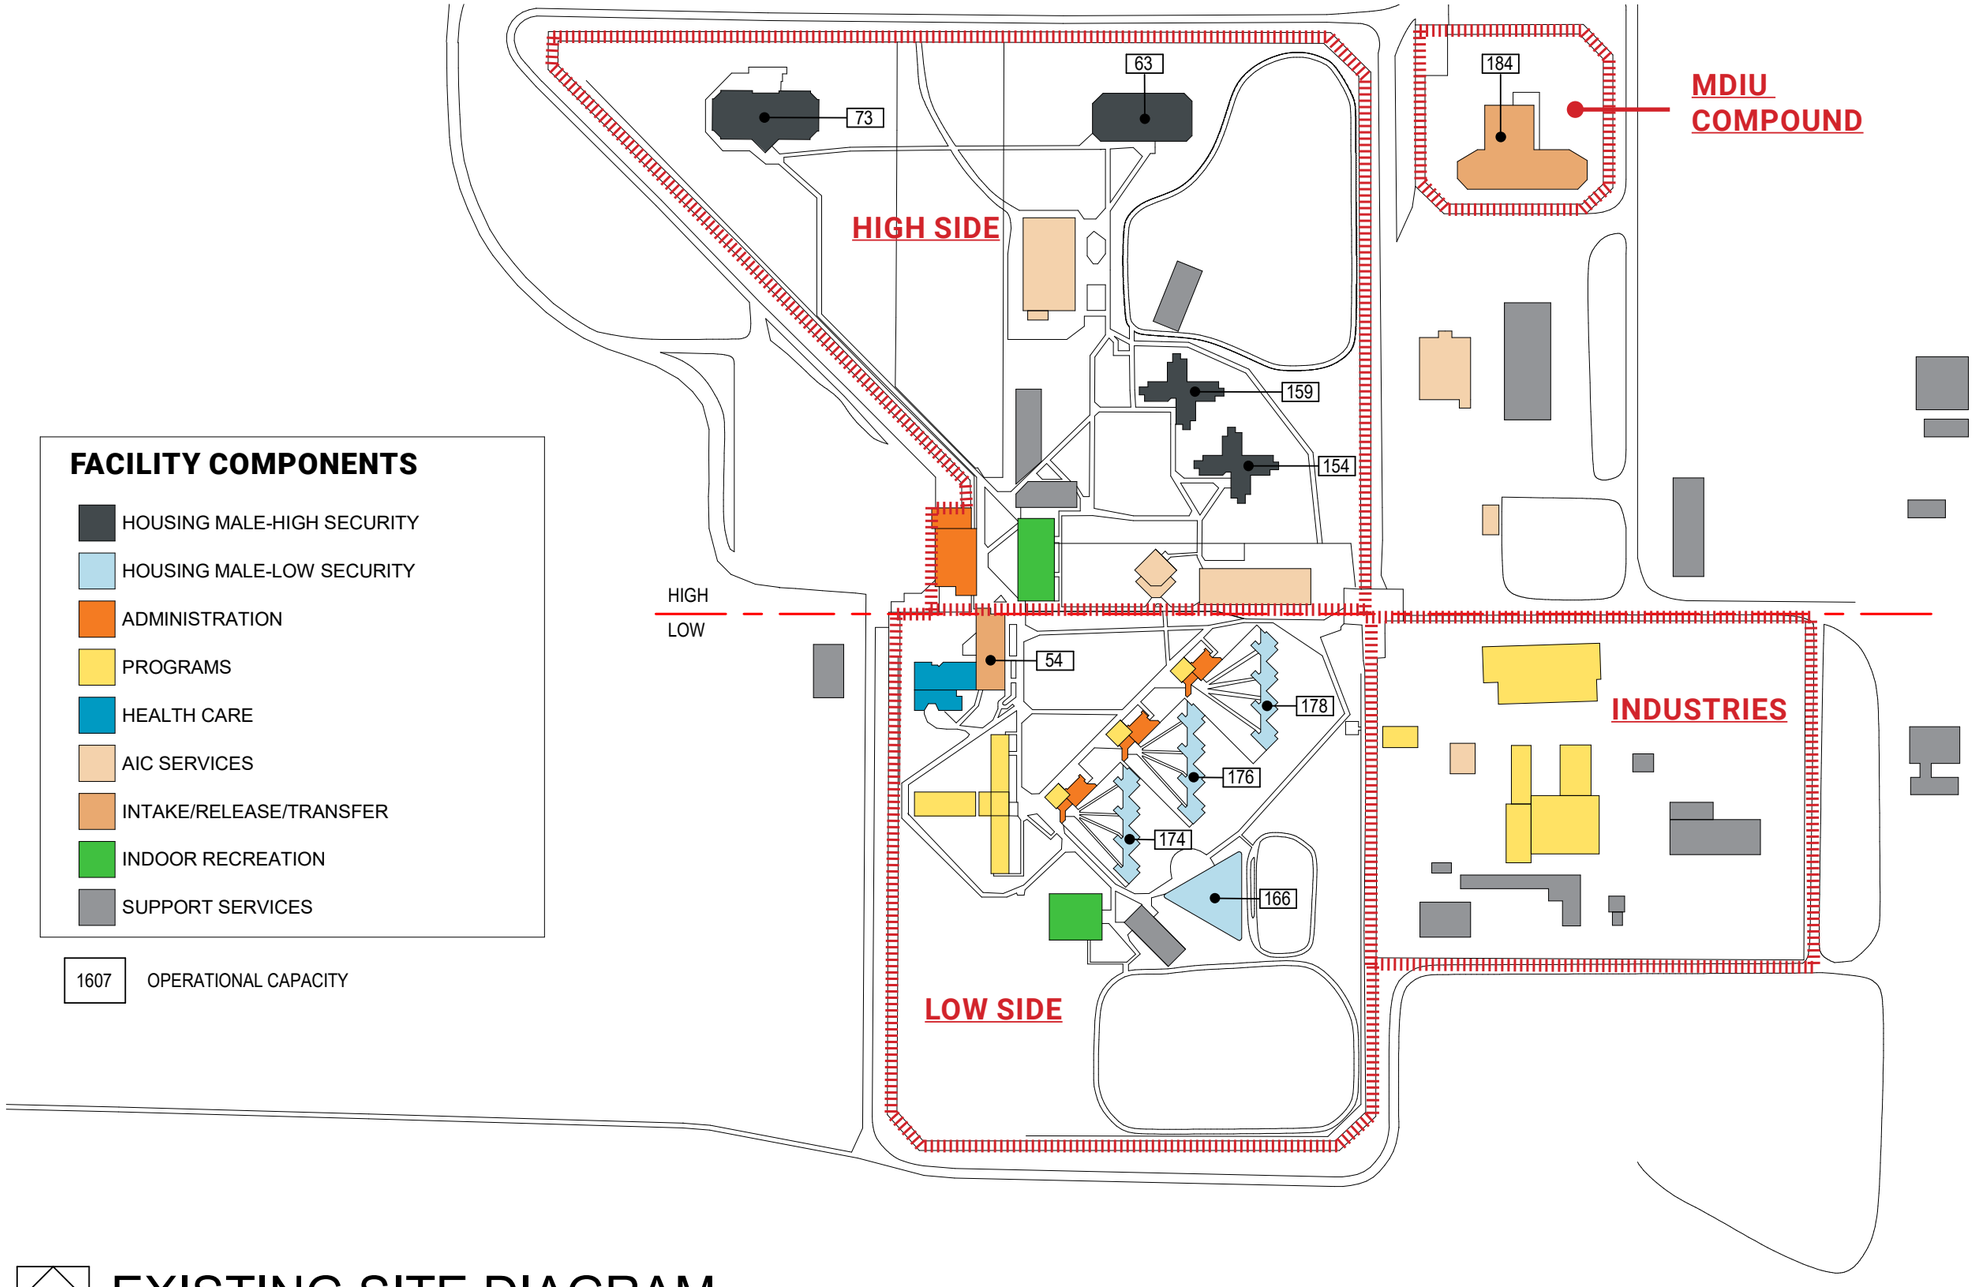

The overall site is approximately 38,000 acres. Vehicular traffic to the facility is varied and frequent. Staff, Visitors in cars; Inmate transportation to/from MDIU, Commercial traffic to/from the Warehouse, Laundry, and Food Factory areas; and farm equipment to/from the large farm areas. One issue is the condition of the access roads, particularly at the culvert crossing on the main access road. Internal access roads also need attention.

Separate parking areas are provided for staff and visitors, with sufficient parking for the overlap of two shifts. There remains undeveloped area on the High Side.

There is a double fence primary security perimeter that needs to be upgraded.

Five wells supply water to large capacity storage tanks; potential expansion will have to deal with all primary utility systems. Historically there have been issues with water pressure. Any expansion/ reconfiguration will require associated site work for natural gas, sanitary sewage treatment. The current lagoon infrastructure is maxed out now. Clay pipes were used.

Page intentionally left blank.

Component 01: Facility Administration
Rating: Marginal

Facility Administration is located in the Wallace Building outside the overall facility security perimeter, which is also the point of access for inmate family/attorney visitors. The building is comparatively new in comparison to other building on site, but the limited entry area jams up when visitation and shift changes occur. This compromises security processing. There isn't sufficient office and support space for current utilization.

Component 02: Staff Services & Training
Rating: Deficient

Staff working inside the security perimeter enter the facility enter at the Wallace Building. MSP utilizes three shifts starting at 6:00am, 2:00pm, and 10:00pm. Current staffing is approximately 300 uniformed, 300 civilian personnel (70% male). Lockers are very limited; staff is encouraged to leave personal articles in their vehicles. Staff is permitted to bring food in, inside a clear plastic bag. There is no designated staff work out area; staff use inmate recreation facilities when not in use by inmates, which is another issue.

Staff recruitment is hampered by the relatively remote location of the facility and compensation levels. Depending on position, new employees have 3-6 weeks of training when hired, 40 hours annually in service. On-site training is provided in the Wallace Administration Building. The facility is short on classroom space and size. This area is inadequate for the size of the facility staffing.

Component 03: Central Control
Rating: Deficient

Control functions are managed by a combine of a Command Post and the Main Control Room. The Command Post oversees all security aspects of the facility, and the Main Control Room implements gate and door controls, along with issuing radios, keys, etc. There are also local housing control rooms/ cages in high security areas; Main Control cannot take these over in an incident. Radios are the primary means of security communication. Security electronics equipment is outdated and needs major upgrades, including additional CCTV cameras to compensate for the lean staffing and large areas to supervise.

There is an Armory Building outside the security perimeter, which includes space for the Inner Perimeter Security Team (IPST).

Component 04: Custody Administration
Rating: Adequate

Custody Administration for shift management and control is located both inside and outside of the overall security perimeter. Custody Administration staff routinely circulate through the facility.

A Muster Area is located just outside the main entry sallyport to the secure part of the facility. Staff assignments are pre-assigned prior to staff coming to work their shifts. More space and equipment would be welcomed, but they get by on what they have.

Component 05: Reception/ Release
Rating: Adequate

Intakes are brought into the MDIU compound, screened and classified here. This is a relatively new building (15 years old) with its own security zone and sallyport access. Typical intake processing is 45 days; lately this is running up to 90 days, due to the lack of available beds in the designated type of classification requirements. Incoming inmates also wait (and sometimes back-up) here and in a separate temporary housing building until a bed is available at the facility they are to go to.

Inmates receive Initial Classification, Medical, Mental Health, Chemical Dependency and PREA screening. Classification is based of 7 risk elements that are given numerical values ranging in scores from 7 to 1. The more areas of risk, the higher score and security classification.

Release at MSP, could be picked up by family or MSP Transportation drops off at Bus Station. This occurs at the Security Services Building on site. Releases also occur at lower security facilities in the system (e.g. Reentry Facilities) if they have worked their way down in terms of security classifications.

Component 06: Visitation
Rating: Adequate

Visitors make an appointment on line for in person visits, also for video visits. Inmate family visiting takes place Thursday through Sunday from 2:15pm to 7:30pm. Attorney and Volunteer visits can occur as needed.

Visiting locations at located in the various security zones within the security perimeter; this requires movement of visitors to those inside locations. MSP has in person contact visit and video visits, non-contact in RHU and SAU - visitors have to be taken by van to F-Unit. The amount of scattered physical visiting space is general adequate for the level of visiting they experience.

Component 07: Counseling/ Case Management
Rating: Marginal

Case Managers get involved early on in the Intake process. [See Component 5 above] and maintain a caseload of inmates for periodic review of institutional behavior and potential classification changes.

Component 08: Education/ Library/ Law Library
Rating: Marginal

Education provides TABE to assess learners to determine the best course of study. Education offers HiSET, Parenting, Life Skills, Special Education and education goal setting and counseling. MSP also has legal and general library in all custody levels. The potential assignment to education programs begins at assessment in MDIU.

Seventy percent (70%) of all inmates entering MT DOC do not have a verifiable high school education, so that is MSP's target audience. They service 200 students at this time in all custody levels and have 150 on the waiting list for HiSET. Inmates under 22 years old are a priority. Cadre assignments are not made until completion of HiSET. All programs are under one umbrella. Services are provided by DOC employees (volunteers are rare). HiSET is a priority, especially for those under 22.

Additional teaching venues and staffing are required to meet target program assignment levels. Lack of adequate space represents an issue to be addressed.

Component 09: Vocational/ Technical Training
Rating: Marginal

Similar to Education, Vocational Education falls under the MCE umbrella and program and includes classroom education, lab, and on-the-job experience in automotive technology, auto body repair, welding, machining, commercial driver's license, Computer Aided Drafting (CAD), Adobe, Microsoft, Plasma CAM and other vocational areas.

In term of Training and Work Programs at MSP, MCE offers on-the-job training in Industries, Agriculture, Food Preparation, Laundry, and other industry-type programs. The programs include a range cattle ranch operated on 38,000 acres of DOC ranch land, Dairy, Milk Processing, Furniture, Upholstery, Print, Sign, Motor Vehicle Maintenance, Commissary, Laundry, Cook Chill, Bakery, Auto Repair, Wild Land Fire Crew and Community Work Programs.

Space inside of the Industry Compound is limited, and additional programming in this location is not feasible. In addition, the Industry and Motor Vehicle Maintenance buildings do not have proper air control, fire suppression and dust control systems required to meet industry standards. Approximately 400 inmates work with 30 staff in these operations.

Component 10: Program Services
Rating: Deficient

Small groups (10-12, 6-8, 2-4) are typically used to deliver these services. There is insufficient space for confidential individual and small group discussion. Focus is on clinical treatment (e.g. sex offenders, chemical dependency).

High Security housing units are a real challenge to provide these services to - due to lack of appropriate space in close proximity to the housing. Staff office space is at a premium throughout the entire facility.

Component 11: Religious/ Cultural Services
Rating: Adequate

Basically OK; but various religious groups would like more spaces dedicated to their religion. Currently, the religious space is located in the RAC between the high and low security zones. Groups served primarily by volunteers include Catholic, Christian, Odinist/ Astru, Wicca, Buddhist, Muslim, Jehovah Witness, LDS, and Native American Spirituality (including a sweat lodge) religious interests.

Component 12: Commissary
Rating: Adequate

The Montana Correctional Enterprise Commissary is located adjacent to the Facility Warehouse. The Commissary provides compilation of Commissary Orders for the entire Montana Prison system.

Weekly orders are received from all State and Contracted facilities through electronic orders made on tablets or kiosks or bubble sheets that are scanned to the Commissary. Once the orders are placed, the inmate's available funds are checked. Orders are processed on site. Completed orders are delivered to the MSP units and other facility orders are sent by MSP/MCE delivery trucks for distribution there. There is a $60 limit on weekly orders: however, clothing and electronics are not included in the limit. Those items must be in-line with the MSP Personal Property policy and fit into a four cubic square feet storage container, provided for personal storage. The items available on the Commissary order form are dependent on the Security Classification of the inmates. Approximately 18 staff work with four civilian supervisors in the Commissary operation.

Component 13: Recreation
Rating: Adequate

There is a Gym and Recreation Yard on both the High Side and Low side, so that all general confinement inmates are offered access to Recreation. There is a separate Yard area only for Restricted housing unit inmates (RUH and SAU). However, staffing is an issue to maintain supervision.

Component 14: Health Administration
Rating: Adequate

The Medical Health Services component is located within its own security zone inside the overall facility security perimeter close to the Wallace Administration Building. This area was renovated/ expanded in 1999.

Component 15: Outpatient Clinic/ Pharmacy
Rating: Adequate

The Outpatient Clinic and Dental Services areas were renovated and expanded in 1999, along with Mental Health and Medical Health administration areas. This component is located between the high and low security zones, with separate entry points and exam rooms, infirmary beds for each side.

Component 16: Dental Services
Rating: Adequate

Two Dental Chairs are provided between, and shared by the high and low security sides.

Component 17: Inpatient Infirmary
Rating: Marginal

The Infirmary has a total of 14 beds. There is no security presence out and about in the MSP main medical unit. Staff presence is limited to an officer in a cage and they stay there to control doors with the computer system. This is an area of significant concern. Infirmary beds are split (separated) between the high and low security sides. For a facility of this size, the number of infirmary beds is marginal at best and there are no negative pressure cells.

Component 18: Mental Health Services
Rating: Marginal

The staffing and capabilities of the Mental Health component is robust. The major limitation is having the office and counseling (one-on-one and small group) space available to provide their services. This is especially an issue on the high side. Mental Health staff provide programs for Substance Abuse, Sex Offender, Psychiatry, and general mental health counseling.

Component 19: Food Service
Rating: Adequate

A central system Food Factory is located at MSP, utilizing a Cook-Chill process. Three hot meals a day are served at MSP. A separate dining hall is provided within the MCE compound to minimize the down time for inmates working in that area. Current production load is 13,500 meals a day. Higher security inmates eat in their cells; the next level down is in dayrooms. The F-Unit and Treatment Units typically use family style dining. Employees are entitled to one meal per shift. Staff Dining Areas are provided inside at the High and Low security zones. The Food Factory has a $3 million loan in for expansion.

Component 20: Laundry
Rating: Adequate

The Montana Correctional Enterprise Laundry is located inside the high security compound of Montana State Prison and services facilities in the western part of the state within 120 miles. Soiled laundry is brought in, weighed, sorted, cleaned and folded, bagged and returned to housing units or customers with paperwork. Inmate personal laundry is attached to a laundry loop and secured with a zip tie by security staff, sent to the laundry, cleaned and returned to the sending unit. The laundry was created by legislation to centralize the laundry functions at Montana State Hospital and Montana State Prison. The laundry opened in 1996 and the current tunnel washer and associated equipment has not been updated since that time. MCE is asking for a long-range building proposal to update approximately $1.3 million to upgrade this equipment.

Laundry being received from the Montana State Hospital is delivered outside the facility and brought in through the rear-guard station for processing. A laundry scanner purchased twenty years ago, used to scan the laundry for contraband to ensure that it did not have to be handled. The scanner is no longer operational but is important to the overall security of the laundry and the MSP facility. Laundry staff pick up and deliver inside the compound. These pick up and delivery services are impacted when inmate movement is restricted. In addition, security lock-downs in the high security compound severely restrict this operation and the overall function of the laundry. Approximately 25 inmate workers used in this component.

Component 21: Maintenance
Rating: Marginal

The Maintenance Building is located outside the overall security perimeter as uses DOC staff and limited inmate workers to address this aspect of MSP. A Work Order system is used to schedule work. Staff can handle most problems; but outside contractors have to be used for major repair/ renovation work.

The aging physical buildings at MSP generate a lot of maintenance work; resulting in a lot of deferred maintenance. The level of maintenance required exceeds budget allocations, which requires the facility to find the money somewhere else in their budget. Craft positions are very difficult to hire and retain.

Component 22: Warehouse
Rating: Marginal

The facility Warehouse is located outside the overall security perimeter, and is used to store food, clothing, janitorial goods, and similar items. Located on the “free side” daily deliveries are made to the Warehouse. When warehoused items are needed, they are brought inside.

Current storage capacity needs to be expanded – especially if additional bed capacity is added here. The location away from urban areas has an impact on the purchasing and delivery process.

Component 23: Central Plant
Rating: Marginal

The is no Central Plant at MSP - rather HVAC and associated primary utility connections and systems are distributed by building around the campus area.

Component 24: Montana Correctional Enterprises (MCE)
Rating: Marginal

MCE Industries are primarily focused on teaching and training eligible inmates in trade crafts for them to learn marketable skills in order to have a higher likelihood of finding gainful employment upon release. Their skills are utilized in producing products for internal and external customers and the proceeds from the sale of these products support the operation of the program.

The MCE Industries at MSP are located inside a separate single wire secure compound adjacent to the prison called the Low Side Industries Compound. It has its own dining facility for workers to eat lunch at without having to go back through a security check point in order to eat.

MCE products include:

- Furniture: produces hand-made wood furniture – 46 inmates
- Rustic: produces hand-made craft furniture from unprocessed lumber – 12 inmates
- Sewing: produces inmate clothing, bedding, toweling, etc. – 5 inmates
- Upholstery: produces office and guest seating, custom upholstery repairs – 12 inmates
- Print: produces printed material and a variety of media – 5 inmates
- Sign: produces signage in a variety of media – 7 inmates
- Novelty: produces novelty items out of recycled license plates - 3 inmates
- Warehouse: supports the logistical and supply needs for all of the MCE Industries at MSP Prison - 7 inmates

The facilities that house MCE Industries at Montana State Prison are extremely outdated and have been re-purposed for current programs without figuring out work and manufacturing flow properly. The two buildings that house the MCE shops are in dire need of remodeling/ upgrading capacity to meet various compliances and extent of use.

FUNCTIONAL COMPONENT ASSESSMENTS – HOUSING AREAS

Component 25: Segregation/ Special Housing Rating: Deficient

Maximum Security Housing Unit 1 provides special housing for segregation and predatory/ assaultive inmates. Operational capacity of 159 beds.

Maximum Security Housing Unit 2 provides special housing for segregation, vulnerable, and acute mental health inmates. Operational capacity of 154 beds.

Designed primarily for single bunking, these units are significantly double bunked. Additional purpose designed housing is needed for this population.

Component 26: Mental Health Housing Rating: Deficient

Acute Mental Health inmates are housed in the same housing unit buildings as segregation and assaultive behavior inmates in HSU2 above. Additional purpose designed housing is needed for this population.

Component 27: High Security Housing Rating: Marginal

Locked Housing Units 1 & 2 provide restricted high security housing for PHC/Detention, Max Status, and some Isolation cells – with an operational capacity of 136 beds. An issue is the housing unit design vs. current utilization levels.

Component 28: Medium Security Housing Rating: Marginal

Housing Units A, B, C and D provide a total operational capacity of 386 beds. However, the design of these aging units provide poor safety and security supervisions.

Component 29: Low Security Housing Rating: Adequate

F-Unit (treatment / programming unit) is located outside the primary security line, and provides a total operational capacity of 198 beds.

Housing Unit F, also outside the primary security line, is limited to 56 single occupancy beds due to infrastructure issues.

Component 30: Community-Based Housing Rating: NA

Other off site facilities, state owned and contracted, accommodate individuals with appropriate institutional behavior closer to release and/or treatment needs.

Component 31: Guest Housing Rating: Adequate

A dwelling on the site provides interim housing for up to 6 new employees as they go through orientation and on the job training.

Component 41: Video Courtroom Rating: Adequate

MSP uses this capability to reduce inmate travel off site for minor matters.

MONTANA STATE PRISON FINDINGS AND RECOMMENDATIONS

Based on functional component assessments, the following findings and recommendations have been generated:

1. Additional bed capacity is required now and in the future, with a focus on purpose built special needs housing, especially for Acute Mental Health, Suicide Watch, and Substance Abuse programs.
2. There is a lack of office and direct housing support program and small group meeting space throughout the facility. This is particularly acute in the High Side due to the difficulty of escorting high security inmates to locations that are not adjacent the housing units.
3. Major security electronics upgrades are required, especially in terms of the number of CCTV cameras.
4. Annual maintenance budgets need to be increased to gain on handling existing deferred maintenance work.
5. Additional Warehouse space is required.

MONTANA WOMEN'S PRISON [MWP]

KEY ISSUES

Based on discussion with Central Office and Facility Stakeholders, overall operational issues were identified as follows:

1. The facility is located on a land locked site, surrounded by urban streets and traffic. There is limited area for expansion.
2. MWP is at full capacity now; they will need additional capacity over time.
3. MWP has an aging infrastructure and deferred maintenance items that require significant maintenance work and add to overall upgrade costs.
4. There is a lack of program space for education, vocational/technical, and Correctional Enterprises (compared to MSP).
5. There are limited purpose built specialized housing capability - Infirmary; Mental Health, Chemical Dependency Units.
6. Outdated, limited technology (internet, phone…); limited power outlets, bandwidth – all of which makes it more difficult for staff to perform their duties.

FUNCTIONAL COMPONENT ASSESSMENTS – NON-HOUSING AREAS

Component 00: Site Development
Rating: Marginal

The facility is located in downtown Billings, surrounded by local urban streets on all sides. The total site area is 3 acres. Adjacent uses include a Refinery, DMV, the Chamber of Commerce, and the Main Post Office. Local traffic, including semi-trucks and Postal carriers pass along front; Mail and UPS Deliveries are made at front entrance, which is a very limited area. There are daily deliveries of all types. The sallyport for receiving for food delivery is not large enough for full size semi-trucks (gate won't close}. Delivery for MCE canteen truck through a fence at the back of building. Trash is picked up daily (still limited in size of containers. One outside perimeter).

Adequate state owned parking is an issue; Some parking areas is leased from DMV; Visiting is street parking; Small lot for staff that fills up quickly. The Recreation Yard doubles as a storm water retention area.

Typically, there is a double 8'-0" high fence, no climb material (aged); at the recreation yard also has concertina wire. There is a single fence at MCE delivery with Y Tops and receiving has a 12'-0" high fence. The immediate proximity to public sidewalks on all sides is a security issue. City requirements for fence construction must be followed, which dictate height and appearance. Similarly, there are municipal limitations on the level of site lighting permitted.

Basically, the exterior of the building delineates the primary security envelope, with controlled penetrations. For staff and public, there is a Sallyport at the front entry. For Intake, there is a fenced Sallyport at the front of the building adjacent to that component area. For food service, commissary there is a fenced Sallyport in the east side of the building on the front side. For MCE there is a manual gate at the rear of building by the Industries Building. For visitors; there is an access point at the rear of the building with a screening area during visiting hours. There is also manual gates to the garden area. Within the building, the Central Control Room (CCR) controls internal sliders to the housing pods in the new building area; manual pod door control in the old portion. In restricted housing, CCR can operate, with proxy card for staff as override.

The location in an urban area permits ready access to primary utility systems. One issue is limitations on use of natural gas in very cold conditions.

ALLEY VACATION

MDOC has confirmed the alley along the main MWP building from the eastern garden land is vacated. The garden is built on land owned by MDOC, and may be assessed as constructible area for expansion of the existing MWP building. Existing easements through the alley shall be considered and protected for access. It is anticipated cost of relocation of utilities exceeds the allowable value and shall remain as-is.

ROW 3705192
05/13/2014 02:43 PM Pages: 1 of 3 Fees: 5.00
Jeff Martin Clerk & Recorder, Yellowstone MT

RESOLUTION NO. 12-19223

A RESOLUTION OF THE CITY OF BILLINGS, MONTANA, DISCONTINUING AND VACATING **alley within Block 228 of the Billings Second Addition.**

WHEREAS, a proper petition was filed with the City Council of the City of Billings, Montana, as per Section 22-601 BMCC, requesting discontinuance and vacation of **alley within Block 228 of the Billings Second Addition** as described hereinafter; and

WHEREAS, a public hearing was properly noticed and held as required by law.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF BILLINGS, MONTANA, AS FOLLOWS:

1. DISCONTINUANCE AND VACATION. Pursuant to Sections 7-14-4114 and 7-14-4115, M.C.A., **alley within Block 228 of the Billings Second Addition** more particularly described as follows:

   A tract of land situated in the SE1/4 of Section 3, T. 1 S., R. 26 E., P.M.M., in the city of Billings, Yellowstone County, Montana; more particularly described as follows, to-wit:

   Beginning at a point which is the southeast corner of Lot 24 in Block 228 of the Billings Second Addition; thence, from said Point of Beginning, along the easterly line of Lots 13 through 24 in said Block 228, N 34°39'08" W a distance of 300.00 feet to the northeasterly corner of Lot 13 in said Block 228; thence, N 55°20'52" E a distance of 20.00 feet to the northwesterly corner of Lot 12 in said Block 228; thence, along the westerly line of Lots 1 through 12 in said Block 228, S 34°39'08" E a distance of 286.25 feet to the southerly most corner of Lot 1 in said Block 228; thence S 00°16'38" E a distance of 16.66 feet; thence S 55°20'52" W a distance of 10.60 feet to the Point of Beginning; said described tract having an area of 5,935 square feet.

   Is hereby discontinued, abandoned and vacated and shall revert to adjacent property owners within Block 228 of the Billings Second Addition.

2. PUBLIC INTEREST. The discontinuance, vacation and abandonment of the above described **alley within Block 228 of the Billings Second Addition** is in the best interest of the public and can be done without any public detriment.

PASSED by the City Council and APPROVED this 24th day of September 2012.

I certify that this is a true and correct copy of the original resolution on file in my office.
Cari Martin
City Clerk

NORTH

EXISTING SITE DIAGRAM - LEVEL 1

SCALE: 1" = 60'-0"

DLR Group © DLR Group	**E02.1** 26-20101-00 Issue Date	**MONTANA WOMEN'S PRISON - L1** MONTANA DOC STATEWIDE MASTER PLANNING

Page intentionally left blank.

Component 01: Facility Administration
Rating: Marginal

Administration is in the original single story building; Warden, Assoc. Warden, HR, Records, Accounts, PIO, MH Office; Case Managers, Grievance. Some administrative areas are scattered around the facility (PIO), and the three MH offices should be closer to the inmate areas. From the public entry point, individuals have to go through the entire facility to get to the Warden's Office. The limited amount of space available and poor adjacencies are issues.

Component 02: Staff Services & Training
Rating: Deficient

MWP is viewed as a great place to work - fewer population concerns, less violence than MSP; 12 hour shifts (3-4-3-4); night shift OK, schedule is good balance; good support to Officers, who are provided meals on shift (with food truck options also available), activities with staff (events, holidays, recognition, etc.); Review of policies & work groups involve officers that will have to implement the procedures. Staff participation / buy in is sought. Only Officers are union at MWP - a different union than MSP; good working relationship with their Union. Associate Wardens are strong leaders and make the facility successful. Jail pay at the nearby County Jail is $3/hour higher than the prison, but it's a different environment. This a complaint at MWP, but doesn't seem to be a motivator to go work there. Recruitment is not an issue.

Staff enters the facility at the front entry/lobby, which is small and congested. There are very limited Staff Facilities; as well as very limited Training areas. MWP has 46 sworn officers, 6 lieutenants; Inmate capacity 253 rated beds; current headcount is 232. The existing program for On the Job Training (OJT) includes Officers get 7 weeks of training. Within a year, new employees will go to the Training Academy (4 weeks long). The goal is to provide an average of 40 hours of in-service training annually.

Staffing was developed for an in-house capacity of ~130 inmates; and staffing not been increased in spite of having a current in-custody population of about 230+.

Component 03: Central Control
Rating: Deficient

The Central Control Room (CCR) is located on the 2nd floor above shift Briefing Area; and only overlooks A and B pods. Within the building, the Central Control Room (CCR) controls internal sliders to the housing pods in the new building area; manual pod door control in the old portion. In restricted housing, CCR can operate, with proxy card for staff as override. Movement through the Entry area is controlled from the Reception Desk.

The original use of this facility was as a Youth Treatment Center - so there were limited security provisions; housing was typically open dormitories. Current overall security of the facility perimeter is not what would be desired; therefore, the building security capability must be relied on. The newer part (3 story) is more secure in physical building security capability than the older portions. The CCR was upgraded 11 years ago, not to speakers or doors, but a “modern” system.

What Armory space they have is a "glorified broom closet" off the Staff Break Room behind the Reception Desk (no lethal equipment), with a small adjacent "Ready Room".

Some upgrades done 11 years ago; not on doors or speakers. The is a severe lack of CCTV cameras throughout the facility, including MCE areas. The older existing cameras were analog. Montana facilities have shifted to from the old analog to digital cameras, with recording capability. MWP uses a lot of mirrors to help comply with PREA and good supervision practices. Another issue is the difficulty to install new cameras where there is no existing electrical conduit (e.g. gym).

Component 04: Custody Administration
Rating: Adequate

Custody Administration for shift management and control is located both inside and outside of the overall security perimeter. Custody Administration staff routinely circulate through the facility. The entire facility uses the direct supervision model.

Compact, interconnected layout permits good response times; however, there is a disadvantage for keep separate and classification separation requirements - which is a security issue. On the plus side, the facility is small and compact enough that staff has a good feel for what is going on.

Component 05: Reception/ Release
Rating: Marginal

Intake - coming from County Sheriffs, transport from MSP, and CCCS. Entry is through a Sally Port, into a very small Intake area. This area handles all in and out movement of offenders. The small configuration has 1 shower, 3 cells (1 dry,2 regular) to hold people 3-4 hours then individuals are moved to F Pod for classification. Typically, new intakes are in restricted housing to begin with.

Transport - Release or transport goes through the same area. Intake is done here for all women coming into the system.

There is limited space in the Intake/Release area, but flow is good for the scale and amount of intakes. MWP can manage 5 individuals at one time without major issues. Clinical Assessment is separate, usually after individuals go into general population for full medical assessments. Short medical/mental health screening is conducted early in the intake process.

Average length of stay here is 11 months. Release at MWP is back through Intake Area, release paperwork by the IPPO to get them out; security packs up; and escorts out the door. Released individuals may take a bus or be picked up by their family.

Component 06: Visitation
Rating: Adequate

Individuals that want to visit offenders go through a background check to go on an approved visitor list. Families can send checks, money to inmate accounts. Special visits in the parenting area for kids scheduled throughout the week, set up by parenting programs; work with child custody, CFS programs.

Inmate family visiting is scheduled for Tuesday, Thursday, Friday 7-8:30 pm; Saturday, Sunday 8:30-1030 am, 1:00-3:00 pm; holiday visiting matches weekends. 1 day a year is family day allowing up to 5 visitors, conducted in recreation yard. The Visiting Room can accommodate approximately 45 people, and is used for multiple other uses when not in use for visiting. Visitors go to the back of prison away from front entrance; the website gives directions to the visitor point of entrance.

Via phones, offenders can also access video visitation. While this is not an adequate substitute for in person visiting, the current limitation is that MWP only has sufficient tablets for 50% of the population.

Component 07: Counseling/ Case Management
Rating: Adequate

New intakes are housed in F pod, which has 3 Case Managers total for the facility, each with a workload of approximately 75 inmates. The IPPO focuses on Probation requirements for release. Collectively, they deal with court paperwork as well as other inmate needs. MWP is looking for a more gender specific classification needs assessment, with the objective of shortening that process to less than 1 week. Compensation differences between MSP and MWP are an issue.

Component 08: Education/ Library/ Law Library
Rating: Adequate

The facility has a central Library/Law Library, with 2 Lexus computers. Education services are provided through Billings School District #2. Two teachers utilize two classrooms and a computer lab., which are reasonably well equipped. There is no wait list for HighSet; a large May Graduation is held, with a ceremony, diplomas, and cake.

Staff and facilities seem adequate for the current service loads, although the range of program opportunities are somewhat limited.

Component 09: Vocational/ Technical Training
Rating: Deficient

There is limited Vocational Education provided through Montana Correctional Enterprises due to not having adequate space for such programming. Currently, there is a dog program and an embroidery program.

Component 10: Program Services
Rating: Adequate

Case workers have early involvement in the Intake process (see Component 5 above); and follow-up with all inmates – particularly in terms of getting information together for release,

Component 11: Religious/ Cultural Services
Rating: Adequate

The Activities Coordinator clears all volunteers through her. Everything is volunteer based; background checks, proposal for what they want to share; multi-denominational; Sources community volunteers;

The facility has a Chapel next to Industries Building, which is also used for other activities.

Anyone can attend religious services if they are not in restrictive housing - Maximum & Segregation are the only ones that cannot. They can request 1 on 1 services if desired, with the volunteer escorted to that housing unit.

Component 12: Commissary
Rating: Adequate

Commissary for MWP comes from MCE at MSP. Order from a bubble sheet submitted, financial checked, compiled, delivered once a week. MWP trying to go to tablets for this, but they don't have enough tablets. This approach is used at all facilities that have adequate tablets.

Some gender based restrictions on items based on facility; restrictive housing has some limitations. When the commissary orders come in, thy are checked and labeled, delivered to housing units the same day. If there was adequate space, MCE would like to provide Commissary for the eastern part of the state.

Component 13: Recreation
Rating: Marginal

There is a Gym and Recreation Yard for general population inmates, with regular daily access. Due to the limited site area, the Yard is not as large as it should be. There are security issues due to proximity to public sidewalks.

There is a separate Yard area only for Restricted housing unit inmates, which is too small. Staffing is an issue to maintain supervision. Restricted inmates have to descend a stairway to get to the Maximum Security Recreation Yard.

Component 14: Health Administration
Rating: Marginal

Medical services function from the health services area on the 1st Floor level of the 3 Story Building. Nursing staff is on duty 7 days / week, 12 hours; there is no coverage after 6PM. There is insufficient area for management staff – mixed in with Clinic area.

Component 15: Outpatient Clinic/ Pharmacy
Rating: Marginal

The MWP Clinic has two Exam Rooms. Basic services provided by staff, with outside contractors used for X-ray, Dentist, Optician as required.

Medications are contracted locally, stored in the Medication Room, these are distributed to inmates from a service window or from a Med Cart depending upon classification.

Component 16: Dental Services
Rating: Adequate

There are 2 Dental Chairs off the Clinic area in a single space. Dental Services are contracted as needed. Dental services are considered adequate for the present service load.

Component 17: Inpatient Infirmary
Rating: Deficient

There is no Inpatient Infirmary at MWP. If someone needs more than temporary observation for a couple hours, they are escorted to the hospital a few blocks away. Typically, there are only 0 - 4 inmates needing 24-hour Infirmary hospitalization; However, inmates at the hospital require continuing security staff presence during their stay. MWP would prefer an Infirmary on site, but this would increase the medical staffing to cover the 3rd shift.

The major deficiency is that there isn't adequate short term holding space for individuals requiring short term medical supervision. This is currently accommodated in the Intake area.

Component 18: Mental Health Services
Rating: Marginal

Once a female offender comes to MWP, a suicide screening tool is administered by officers in Intake; If the offender scores five or more, mental health staff make contact with offender. Referrals also come medical staff.

Nursing staff conduct an initial PREA Assessment. The female offender is asked if they want to be seen by mental health during this assessment. If they say yes, the clinical therapist has 14-days to make contact with the female offender in regard to the PREA Assessment.

Based off the female offender's WRNA score and needs addressed in assessment, they are referred for mental health groups (Beyond Violence, DBT and Moving On), CD groups (Seeking Safety and Helping Women Recover), Psychiatric Evaluation with the Tele-Psych provider for mental health medication management and individual therapy.

The staffing and capabilities of the Mental Health component is adequate. The major limitation is a lack of space to meet with offenders for individual therapy and group sessions.

Component 19: Food Service
Rating: Marginal

MWP uses cook serve 3 time a day; typically, 3 hot meals a day; sometimes 2 hots with a cold breakfast. Central dining accommodates 90-100 seats; with rolling use by housing unit; Restricted housing inmates eat in their cells.

Staff eat with the inmates and allowed to eat twice depending upon their shift [breakfast/lunch or dinner/breakfast]. The only deficiency is a lack of Warehouse/Storage space – thereby requiring daily deliveries from the urban area they are situated in.

MWP has a fire kitchen crew for Eastern Montana.

Component 20: Laundry
Rating: Deficient

Institutional laundry done on in the Laundry Area (3 dryers, 2 washers). There is a washer/dryer on each housing unit for personal items. The Kitchen has their own washer/dryer for their needs. Inmates are issued 3 sets of uniforms; and 1 bedding set - which is exchanged weekly.

8am-10pm (2 shifts) operated weekdays to keep up with service load. Laundry service is same day - In in the morning, back later that day. The existing Laundry has to run 2 shifts, representing on overloaded condition. The Laundry is maxed out; Moreover, there are a lot of equipment break-downs.

Component 21: Maintenance
Rating: Deficient

Maintenance work is done by a small in-house staff, with limited inmate workers. Due to the age and condition of the buildings, extensive maintenance work is required. A modest area is available for the maintenance crew.

When a large or complex effort is required, it has to be contracted out. This forces the facility to squeeze funds out of another line item, since the annual maintenance budget is not sufficient.

Component 22: Warehouse
Rating: Deficient

MWP doesn't have one. Things are ordered on a frequent schedule so things aren't stored. The area above Visitation has some extra storage (mattresses, large supplies) but it is not easily accessible because requires stairs. Emergency delivery can come from Billings.

Warehouse storage capacity needs to be provided – especially if additional bed capacity is added here.

Component 23: Central Plant
Rating: Marginal

The main Central Plant space was constructed with the 3-Story Addition. The high pressure boilers require certified operators, which the facility has. Heating utilizes natural gas, with a limitation on that use on very cold days – they have to switch to fuel oil for the local utility to maintain sufficient pressure for other users.

Component 24: Montana Correctional Enterprises (MCE)
Rating: Deficient

MCE Industries are primarily focused on teaching and training eligible inmates in trade crafts for them to learn marketable skills in order to have a higher likelihood of finding gainful employment upon release. They are responsible for vocational and technical training and work.

MCE operates the dog training and grooming program in one of the living pods (G-Pod). Dogs live in rooms with women. There is insufficient space to accommodate appropriate dog training activities. MCE has training and work programs in embroidery, screen printing, graphics design, and hygiene kit assembly. They also have a Fire Kitchen Crew program for eastern Montana.

FUNCTIONAL COMPONENT ASSESSMENTS – HOUSING AREAS

Direct supervision is used in all housing units except high security Pods C and F, which are intermittent supervision. The main control room is on Level 1, and there is the LAC Control Room on Level 2.

Component 25: Segregation/ Special Housing
Rating: Marginal

Based on the limited number of single cell housing, Segregation is incorporated in the Intake cells with other restricted housing population.

Component 26: Mental Health Housing
Rating: Deficient

There is no purposed-designed housing unit for acute mental health. Mental health inmates are housed throughout the facility based on their particular needs.

Component 27: High Security Housing
Rating: Marginal

In the Single cell housing is only provided in Pods C and F, with 11 single cells on each of two single level units. These are lock-down units with essentially no Dayroom area; they are outside cells with slit windows. A separate exterior yard is reached by going down a set of stairs.

Component 28: Medium Security Housing
Rating: Marginal

Double cell housing is provided in Pods A and D, with 13 cells each on two single level units. These are currently utilized for Close and Medium Custody inmates, with 30 beds each (over design capacity). They are outside cells with slit windows, with marginal Dayroom area.

Component 29: Low Security Housing
Rating: Adequate

Minimum Security cell housing is provided in Pods B and E, with 18 double cells plus 1 4-Person Cell each on two single level units. They are outside cells with slit windows, with marginal Dayroom area.

In the older (original) 2 Story Building, all of Pod G (two areas of 38 beds) and a portion of Pod H are used for Minimum Security inmates. This housing is multiple occupancy rooms and the doors are not locked. This housing is in close proximity to the Education program areas.

Component 30: Community-Based Housing
Rating: NA

Individuals that qualify for community-based treatment or reentry programs are transferred to other lower security facilities in the system.

Component 31: Guest Housing
Rating: NA

Not provided at MWP.

Component 41: Video Courtroom
Rating: NA

MWP should use this capability to reduce inmate travel off site for minor matters.

MONTANA WOMEN'S PRISON [MWP] FINDINGS AND RECOMMENDATIONS

Based on functional component assessments, the following findings and recommendations have been generated:

1. Additional bed capacity is required now and in the future, with a focus on purpose built special needs housing, especially for Acute Mental Health, Suicide Watch, and Substance Abuse programs.
2. A cost/benefit analysis needs to be done to compare having an in-house Infirmary vs. continuing the current hospital placement and the inherent security staffing required.
3. Major security electronics upgrades are required, especially in terms of the number of CCTV cameras.
4. Annual maintenance budgets need to be increased to gain on handling existing deferred maintenance work.
5. Warehouse and additional MCE space is required.

MASTER PLAN FINDINGS/ DIRECTION

FACILITY CHARACTER

From an operational perspective, the Montana State Prison (MSP) and Montana Women's Prison (MWP) are significantly different in terms of size and configuration.

- MSP is a very large site with a high total capacity and a campus arrangement. This configuration is often found in older state prison facilities, where the longer terms served got people in to a routine including movement to and from housing to other functional component areas (e.g. Industries, Education, Medical areas).

  To cope with the harder inmate population that has evolved over time, MSP has developed internal security perimeters to separate the high side housing from the low side housing units, with Support functions located between the two. Further internal separations have been developed for MCE/Maintenance, Food Factory, and the MDIU Central Reception Unit. For some security classifications on the High Side, movement has to be escorted.

  The large site is relatively isolated from urban areas, which has an impact on recruitment and retention of staff.
- MWP is almost the opposite – with a very limited site area in an urban part of Billings, surrounded by other destination functions (Post Office, Motor Vehicles, and a Refinery). As a practical matter there is no site area available for any addition of consequence. All functions are essentially integrated into a single facility structure, with the exception of having to go outside briefly to reach the Yard, Chapel, and MCE areas.

  The overall security perimeter is not as robust as desired, due to the proximity of public sidewalks on all sides, and City restrictions on fence height and exterior lighting. Therefore, MWP has to rely on the construction of the building walls as the primary security envelope. Originally a Youth Treatment Center, the older building area doesn't have quite the level of security construction that would be best. The 3 Story addition is better in this regard.

  MWP is viewed as a great place to work and staff are focused on interacting with inmates. Another consideration is that the average length of stay here is only 11 months. The small scale allows a positive "family" environment.

FACILITY NEEDS

From an operational perspective, the Montana State Prison (MSP) and Montana Women's Prison (MWP) are significantly similar in terms of overall needs.

- Both facilities are at their capacity limits and need additional capacity over time for their respective populations (secure male, female), MSP has a design capacity of 1,040 beds and currently houses approximately 1,600 inmates; MWP is almost as bad – putting 5 inmates in multiple occupancy rooms designed for three.
- Staffing at both facilities is lean. For example the staffing at MWP was established for an in-custody population of approximately 130; the current headcount is 230+ with no collateral adjustment in staffing.
- Both facilities need to increase their acute mental health capability.
- Both facilities need to upgrade their security electronics and number of CCTV cameras.
- Both facilities need to increase the use of technology to improve communications
- Both facilities have to deal with older buildings requiring a lot of maintenance work to keep them on line.

The operational assessments above will be considered in conjunction with the building physical assessments to determine highest and best use of each existing area – and whether to maintain, renovate, add onto, and/or replace physical structures in order to improve operational intent for the two facilities and the rest of the Montana Department of Corrections system.

Montana Correctional Enterprise Ranch

- SECTION 5.0 -

STRATEGIC ALTERNATIVES

PROJECTED NEEDS

In correctional facility master planning, the basic determinant defining overall needs are the number and type of beds required. For secure facilities, how they are operated and the associated service loads all flow from the total beds required over time. Typically, this is examined in 5 year increments to factor in potential phasing.

EXISTING RESOURCES

A key element in considering existing resources is examining what the current rated bed and operational capacities as they are today. In looking at the secure bed capacity at MWP and MSP, it also included the beds at MDIU (system reception), the Work Re-entry Center (WRC), and Riverside. In Phase 1 the significant buildings were assessed in terms of the condition of physical building system. Phase 1 also examined the functional/ operational capabilities of MSP and MWP for their adequacy by functional component. Physical and Functional/Operational assessments both need to be considered to determine relative viability as resources for meeting current and projected needs.

The information gathered in Phase 1 has been compiled to show the condition of both the physical and operational aspects of MSP and MWP. The summary of functional and physical conditions ratings indicates the buildings that should be considered suitable to be reused or continued to operate in the long term. The functional and physical conditions are intricately connected. A building in adequate physical condition that cannot functionally meet its intended use for the services MDOC strives to provide, the building may not be worth maintaining for that use. Similarly, a building that is functionally adequate, but is physically failing may or may not be worth the capital investment required to retain it.

In this first phase of evaluation, DLR Group/Cushing Terrell interpolated the information we were able to procure to create a baseline rating. These are identified on the summary of functional and physical conditions ratings tables.

Summary Evaluation Graphics are presented on the following pages:

PRELIMINARY INFORMATION

MSP 1,660 Beds		Functional Rating				Physical Condition Rating			
	Component	Adequate	Marginal	Deficient	Building(s)	Maintain	Renovate	Replace	Notes
0	Site Development								Water, Sanitary Waste at Limit of Capability
1	Facility Administration				B13A: Armory; B2: Wallace Building				
2	Staff Services / Training				B13A: Armory				
3	Central Control				B13A: Armory; B2: Wallace Building

STRATEGIC PLAN OPTIONS

Based on the conversations with all departments and the documentation of goals of the master plan, we have created four preliminary conceptual options were developed for consideration in the master plan. We are proposing that Phase 2 of the Master Plan work is required to ensure the support operations at the facilities outside MSP and MWP are sufficient to support the options in conjunction with the entire system. MDOC is a very comprehensive system where all the facilities rely on each other to be successful. The need to develop detailed implementation information in the context of the roles across the full system is important.

For an initial basis of planning, the target secure bed capacity in 2039 for males is 3,512 401 rated beds, and for females 345 rated beds, as shown in the following graphic:

Facility	Type	Current Rated Capacity	Rated Capacity as Evaluated
Montana State Prison			
Montana State Prison	Secure Facility	1,607	1,252
Missoula Assessment & Sanction Center (MASC)*	Assessment & Sanction Center	144	144
Riverside Special Needs Unit*	Secure Facility - Geriatiric	25	26
Subtotal - Montana State Priosn		1,776	1,422
Pine Hills Correctional Facility - Adult*	Secure Facility	64	64
Great Falls Regional Prison (Contract)*	Secure Facility	141	141
Crossroads Correctional Center (Contract)*	Secure Facility	550	550
Glendive Regional Prison (Contract*	Secure Facility	152	152
Other Contract Facilities		*Indeterminate*	
TOTAL CURRENT RATED CAPACITY - MALE		2,683	2,329
PROJECTED NEED RATED CAPACITY - MALE 2039		3,401	3,401
SHORTFALL - MALE BEDS 2039		718	1,072
Montana Women's Prison	Secure Facility	254	238
TOTAL CURRENT RATED CAPACITY - FEMALE		254	238
PROJECTED NEED RATED CAPACITY - FEMALE 2039		345	345
SHORTFALL - FEMALE BEDS 2039		91	107
TOTAL SYSTEM - CURRENT RATED CAPACITY		2,937	2,567
TOTAL SYSTEM PROJECTED NEED RATED CAPACITY - 2039		3,746	3,746
TOTAL SYSTEM SHORTFALL - RATED CAPACITY 2039		809	1,179

** These facilities were not included in the scope of the Phase I Master Plan*

The Phase 1 Report does not evaluate all MDOC system facilities, but rather focused on the secure beds related to the Montana State Prison (MSP) and Montana Women's Prison (MWP). Excluding secure beds contracted at Great Falls, Crossroads, and Glendive, the target rated bed capacity at MSP, Riverside, Pine Hills, and MASC would be 2,558 rated beds. [3401 – 843). The target capacity for female secure beds is 345 rated beds.

The four Conceptual Options for consideration range from maximum reuse to maximum replacement as indicated below

Option 1:
Maximum Reuse

Option 2:
New Female Facility + New Male Facility + Reuse

Option 3:
Multi-Facility Campus + Renovation of MSP

Option 4:
New Women's Prison + Expanding MSP

The Conceptual Options start with initial implementation actions to the system to create come additional capacity relatively quickly, to ensure safety and wellbeing of staff, officers, and inmates as the master plan is put into place. Subsequent phases of implementation actions are scaled over the following years to provide the capacity and operational capability required to meet future needs.

Priorities in the Conceptual Options are

1. Meet total bed capacity requirements over time;
2. Maintain system flow from security facility bed locations to community-based facilities;
3. Improve staff efficiency and efficacy.

The following summaries provide a synopsis of each option and its primary elements. Each Conceptual Option considered shows the configuration/capacities for projected 2039 needs; recognizing that a phased implementation would be required.

OPTION 1: MAXIMUM REUSE

This Option provides renovation/expansion of the Women's Prison in Billings and reuse / expansion of all other existing secure facilities for male capacity. This option is will reuse existing facilities and infrastructure as much as possible, but in some instances modifying the security level and use of the buildings. Some proposed capacity additions are at other existing male facilities/locations, including Pine Hills, Missoula, and Riverside.

RENOVATE/EXPAND WOMEN'S FACILITY

The existing Montana Women's Prison in Billings is confined by the construction and site boundary in an urban setting. Being undersized in terms of administration, program, and support space for the current rated bed capacity (254), the location is not very conducive to additions significant enough to increase the rated capacity for future needs (345 rated beds). The State does own contiguous additional property across the Alley to the east, which could be used as long as the utility easements within the Alley demarcation are maintained. Expansion of the existing facility would include additional gender specific program and MCE space, and address other current numerous shortfalls in terms of administration, program, and support space. While challenging, it is a feasible option.

MALE FACILITY CAPACITY

In this Option, male secure bed capacity to meet 2039 needs would require adding 630 new beds at MSP, 25 beds at Riverside for medically challenged, and 64 beds for acute and step down mental health beds at Pine Hills. MASC would remain unchanged

OPTION 1 IMPLEMENTATION ACTIONS:

1. Initial actions to alleviate current over-utilization.

   (Housing Unit Additions at Pine Hills, Riverside; or other location, potentially contracted.)

2. Expand Pine Hills.

   Two 32-bed Special Needs Housing Units would be developed at Pine Hills to consolidate male special needs offenders in one location. The new housing units would provide acute and step down mental health capacity.

3. Address urgent and code issues at MSP, MWP

4. Renovate / Expand MWP

   The reconfigured MWP would be expanded to 345 rated beds with some expansion capacity in the future as required. This would provide projected capacity needs through 2039, with that expansion in a single project. New areas would be constructed for Medical and Mental Health services, including an Infirmary; Visiting, including a Parole Hearing Room; Vocational and MCE program areas; and new Laundry, Warehouse, and Maintenance support areas. Vacated areas would be renovated to serve other needs. All existing rated beds would be reused.

5. Reconfigure/Renovate of MWP for Male Special Needs

   The MWP building will be repurposed as a Men's Special Needs Facility (240 rated beds). This would leave the offender population at the existing facility essentially the same as currently, which is somewhat higher than its real supportable capacity level. Some additional administration, program, and support space would be provided as part of overall renovation.

6. Renovate / Expand MSP

   Build new program and support improvements to MSP. The existing infrastructure at MSP requires escorted movement for high security inmates, especially in the High Security Side. Improvements would include a new entry/staff services area, adding direct housing support space to the high security housing, replacing/ renovating some MCE buildings, and site utility improvements as required to maintain their longer term viability. The addition of new capacity of 630 rated beds would bridge the shortfall between our assessment of existing rated capacity (1,250) and the current utilization level (1,607 beds).

Option 1 Capacity Distribution	rated	operational	actions
Montana State Prison (includes MDIU, WRC, Unit F)	2,240	2,016	630 new beds to take rated beds to 2,240.
Riverside	50	45	25 Bed Addition
Pine Hills	128	115	New 64 Bed Housing/Support Addition
Missoula	144	144	Maintain
males	2,562	2,320	
MWP Renovation/Expansion	345	311	Adds 107 beds, program, support.
females	345	311	

OPTION 2: NEW FEMALE & NEW MALE FACILITY + REUSE

This option takes the next step from Option 1. A new Women's Facility would be built with a rated capacity of 345 rated beds, meeting long term needs. From a construction perspective, it may be cost effective to build to the long term need as one construction project. In this Option, the existing MWP would be repurposed for Male Special Needs (254 rated beds) and another 380 rated male beds would be developed as a separate facility at the new female facility site.

The rated capacity at MSP would be increased to 1,800 rated beds, taking the utilization of 1,620 beds equal to current use population. This would allow the utilization rate at MSP to be the recommended level of 90% of rated capacity. Another change would be to discontinue use of Riverside and Pine Hills, moving those male populations to the vacated MWP facility and the new prison site near Billings. MASC would be retained.

OPTION 2 IMPLEMENTATION ACTIONS

1. Initial actions to alleviate current over-utilization

   (Housing Unit Additions at Pine Hills, Riverside; or other location (maybe contracted).

2. Address urgent and code issues at MSP, MWP

3. Build New Women's Facility + Male Facility

   The new female facility would be designed for 345 beds, with 90% utilization yielding 311 operational beds. Since there is little intervening difference between mid and long term needs, all system female capacity would be constructed as one project.

   In addition to the female capacity, Option 2 would also add a separate 380 rated male facility and an expandable central support area (Food Service, Laundry, Maintenance, and Warehouse) to service both facilities.

4. Reconfigure/Renovate MWP for Male Special Needs

   The existing MWP building will be repurposed as a Men's Special Needs Facility (254 rated beds). This would be in conjunction with aligning additional administration, program, and support space for the intended program.

5. Discontinue use at Riverside Special Needs, Pine Hills; maintain use at MASC.

6. Upgrade MSP

   In a variation from Option 1, a total of 550 new rated beds to existing housing at MSP, along with renovation/ replacement of administration, program, and support space improvements for an operational capacity for 1,600 offenders. Without increasing the current number of offenders at MSP, there would be less likelihood of major replacement/ expansion of existing primary site utilities and infrastructure (water, sanitary waste, roads, and the like).

Option 2 Capacity Distribution	rated	operational	actions
Montana State Prison (includes MDIU, WRC, Unit F)	1,800	1,620	Adding 550 new beds to take rated beds to 1800 from 1250. Major Renovations.
Riverside			Discontinue Use; Move to New Male Prison.
Pine Hills			Discontinue Use; Move to New Male Prison.
Missoula	144	144	Maintain
MWP Building	254	238	Conversion to Male Special Needs
Male Capacity at New Prison	380	342	Separate Facility at same site; expandable
males	2,578	2,200	
New Women's Prison (NWP)	345	311	Location near/in Billings
females	345	311	

OPTION 3: NEW MULTI-FACILITY CAMPUS + RENOVATION OF MSP

The main difference in this Option is discontinuing use of the existing MWP facility for any secure bed capacity. The existing MWP facility could be converted to a community based facility for PV's or community based re-entry focus and would no longer be part of the system's secure bed capacity. This change is accommodated by increasing male rated beds at the new site location in/near Billings.

The concept here remains to develop a two facility site with shared support areas serving both facilities. The support core for the initial capacity build out would be expandable to accommodate future male capacity expansion at this site, if necessary. This would be a new female facility of 345 rated beds and a new facility of 480 male rated beds, including male special needs housing. Option 3 continues use of an expanded Pine Hills facility and MASC is maintained, while use of Riverside is discontinued.

MSP's bed capacity would be taken up to 1,800 rated beds as in Option 2 through construction of 550 new rated beds, resulting in a 90% operational capacity of 1,600 offenders. More extensive renovation work and additions would be undertaken as an extension of what was done in Option 2 to improve operational efficiency. A high priority in the new housing would be a new acute mental health housing unit there.

OPTION 3 IMPLEMENTATION ACTIONS:

1. Initial actions to alleviate current over-utilization

   (Temporary Housing Unit Additions at Pine Hills, Riverside or Other location, maybe contracted)

2. As an extension of the concept Option 2, this Option would build two new facilities (one male, one female) on a consolidated site location in/near Billings. The capacities would be 345 female rated beds and 480 male rated beds. Each facility would be standards compliant in all respects and have direct supervision flexible housing units aligned with the offender classification profiles. The proximity to Billings will maintain connections to the urban resources for diverse support and treatments needed by each gender of offender. An integral part of this concept is developing an expandable free side support core of Food Service, Laundry, Maintenance, Warehouse, and Central Plant to accommodate further capacity expansion at this site, if necessary.

3. The existing MWP facility would be converted to a community based parole violations return or Re-entry facility for males or other use and not considered part of the secure bed capacity.

4. Secure beds at Riverside Special Needs would be discontinued; expanded capacity at Pine Hills and MASC as it is today would be maintained.

5. Provide new housing, administration, program and support improvements at MSP for an capacity of 1,800 rated beds. Long term upgrades will be proposed to bring MSP closer to fully adequate functional and physically adequate conditions over time. The existing utility systems and infrastructure will require repair and/or upgrading for long term continued use.

Option 3 Capacity Distribution	rated	operational	actions
Montana State Prison (includes MDIU, WRC, Unit F)	1,800	1,620	Adding 550 new beds to take rated beds to 1800 from 1250. Major Renovations.
Riverside			Relocate to New Prison, MSP
Pine Hills	128	115	New 64 Bed Housing/Support Addition
Missoula	144	144	Maintain
MWP Building			Discontinue Use
Male Facility at New Prison Site	480	432	Separate Facility at same site; expandable
males	2,552	2,167	
New Women's Prison	345	311	Separate Facility at same site.
females	345	311	

OPTION 4: NEW MULTI-FUNCTIONAL CAMPUS + MSP RENOVATION

This option takes the approach of having two main facility locations – one for females in/near Billings, and the main location for male secure beds increasing capacity significantly at MSP. By keeping the secure bed capacity of 128 rated beds at Pine Hills, and 144 rated beds at MASC, and the expanded special needs capacity of 128 rated beds at Riverside – the total capacity at MSP to meet 2039 needs would be 2,250 rated beds. This requires developing 1,000 new rated beds and the associated administration, program, and support space to handle a larger offender population. The major concept in this approach is not adding male capacity anywhere it doesn't exist already. Importantly, male special needs inmates would be consolidated at Riverside.

Secure bed capacity at the existing MWP facility would be discontinued, , and there would be no male capacity developed at the new Women's Facility site. Retaining existing capacities at Pine Hills and MASC, and the expanded capacity at Riverside for special needs reduces the total number of male secure beds that will need to be added at MSP.

Critical long term upgrades incorporated in Option 3 would be expanded to provide adequate functional and operational conditions for the entire facility at a larger offender population.

OPTION 4 IMPLEMENTATION ACTIONS:

1. Initial actions to alleviate current overutilization

   (Temporary Housing Unit Additions at Pine Hills, Riverside or Other locations (contracted?)

2. Design and Construction of the new Women's Prison with 345 rated secure female beds as a freestanding facility in/near Billings. As in Option 3, the new female facility would be standards compliant in all respects and have direct supervision flexible housing units aligned with the gender offender classification profiles. Administration, program, and support space would be designed to accommodate the projected in-custody population.

3. Utilization of the existing MWP facility would be discontinued; Pine Hills and MASC would be continued.

4. Riverside would be expanded by building two 32-bed mental health housing units (acute and step down) and associated support space

5. Phased addition of 1,000 rated beds would be initiated at MSP. Renovation/ Replacement of critical buildings and functions at MSP would be addressed first (e.g. 60 acute mental health beds), then continue to replace everything necessary to get to adequate standards compliant functional space in place for an expanded MSP. Detailed planning and programming would be needed to determine specific scope and phasing requirements, including upgrading site utilities and infrastructure

Option 4 Capacity Distribution	rated	operational	actions
Montana State Prison (includes MDIU, WRC, Unit F)	2,250	2,025	Adding 1,000 new beds to take rated beds to 2250 from 1250. Replace Existing Facility in Place.
Riverside	89	80	64 Bed Addition
Pine Hills	64	64	Maintain
Missoula	144	144	Maintain
MWP Building			Discontinue Use
males	2,547	2,169	
New Women's Prison	345	311	New Facility in Billings
females	345	311	4 kjm

All options need to have provision for future expansion, due to potential discontinuation of County Secure Bed Contracts.

Target Rated capacity by 2029 is 3,200 male, 320 female beds.

Target rated capacity by 2039 is 3,400 male, 350 female beds.

Montana Women's Prison Aerial

- SECTION 6.0 -

RECOMMENDED MASTER PLAN

RECOMMENDED MASTER PLAN

Renovation & expansion of existing facilities to support current and evolving program and treatment initiatives with limited increases in capacity.

Options 1 through 4 provided a framework for discussions with the Department of Corrections ranging from Maximum Reuse to Replacement, providing consideration of a wide range of actions based on continued projected growth of the system based on long-term historic trends.

A key consideration in developing the final master plan framework was the potential for reducing bed needs through policy actions by the legislature, criminal justice system stakeholders and the Department of Corrections. An analysis of long-term population trends for both the male and female population in secure facility resulted in a base projected need for planning to increase secure capacity from current 2019 requirements for total population (male and female) of 2,779 offenders requiring a rated capacity of 3,087, beds to a projected population of 3,372 offenders requiring a rated capacity of 3,746 beds in 2039, or an increased capacity need of 679 rated beds.

Overall, this projection results in an average annual increase over the 20 year projection period of just over 1% per year (1.06%) – which would even be less if calculated on a compounded basis. While the Department agreed that the projections in fact reflected modest growth, they believe that if the general trend is more reflective of the last 10-year historic period of a stabilizing population, with some exceptions, both admissions and average length of stay (ALOS) have declined. For example, ALOS peaked in 2011 for the male population at just under 35 months, and even with recent increases, is now at 18 months (though showing a slight increase over the past two years). Similarly, over the past ten years admissions have declined with slight blips in this trend in 2014, 2015 & 2019.

As a result, rather than plan for growth or a return to trends of the previous decades, the Department determined that for planning, it should be assumed the population will stabilize at current levels through increased programs and treatment, policy actions at the legislative level, and across the criminal justice system.

One example, the analysis showed over 50% of admissions in the past 10 years have been for technical violations of parole – not for new crimes or sentences. Return-to-custody for probation and parole violations is a topic of both local concern to Montana as well as a major focus of criminal justice reform on a national basis because it potentially results in loss of employment, loss of housing, and significant familial impacts – all for what many times is minor non-compliant behavior. Translating this into an impact on bed needs is a simple equation. Currently over 1,000 annual admissions are for technical revocations. Assuming that the ALOS for this group is relatively short, say six months, a 30% reduction in admissions would result in a savings of 164 beds – or a quarter of projected future need[1]. Additional actions to increase programs and treatment for better outcomes both in the correctional system and at the local level could result in further reduced demand.

Relative to planning capacity, this discussion with the Department determined that any considerations for capacity should be based on the following:

- Stabilization of the general population and capacity needs at current levels;
- Any expanded capacity should address the special needs population only – acute and chronic mental health needs – with an emphasis on focused treatment to move this population through a continuum of care that would support their return to the general population and eventually release with continued treatment at the community level;

1 Additional analysis will be required to analyze this and other options for population management that is beyond the scope limitations of Phase 1 of the Master Plan Effort.

- Replacement of aged and inefficient housing that impacts both delivery of programs, safety and security for staff and offender's alike, and facilitates current management policy of direct supervision in lieu of intermittent supervision. This is required due to the relatively small size and configuration of housing units, which economically precludes effective direct supervision management;
- Planning should eliminate current overcrowding and allow the Department to function at an operational capacity of 90% of rated capacity to allow for classification, facility maintenance, and limited surge capacity;[2]
- Planning should consider continued use of contract secure capacity with additional capacity options should contract capacity be reduced in the future.

Based on the foregoing, the Planning Team re-evaluated the projections and shortfalls for planning. The 2020 projected need for rated capacity was utilized as the baseline for planning based on stabilizing the population. This was then compared to the current rated capacity of secure beds in the system as provided by DOC for existing facilities and as analyzed by the planning team for the main compound at MSP and MWP[3].

---

2 Rated capacity refers to total beds available; operational capacity refers to the actual number of inmates housed. It is recommended that planning allow for a 10% "vacancy rate" to accommodate classification, maintenance, and population surges.

3 Other facilities were not included in the initial assessment scope for Phase 1 of the Master Plan.

As illustrated in the following table, that analysis resulted in a projected shortfall in capacity of 143 beds relative to current adopted rated capacity which increased to 512 beds based on the functional assessment of existing housing compared to accepted standards. (See table at the beginning of this section.) To a large extent, the increased shortfall is attributable to including provisions for double-bunking smaller cells (+/- 60 NSF) where by classification, offenders are secured in their cells for a period in excess of 10 hours per day at MSP. Since one of the key recommendations for MSP arising from the overall evaluation was the replacement of Housing Units A, B, C &D, it was assumed that implementation planning could consider how appropriate housing for these classifications could be provided in the future and the existing housing re-purposed to provide for double-celling and increased rated capacity in accordance with standards.

As a result, the low range of shortfalls – 143 male beds as illustrated on the following table – was adopted as a basis for planning, with the intent of addressing this shortfall through the provision of additional special needs housing as outlined above and as part of replacing existing inadequate and inefficient housing.

Based on this decision, the Planning Team working with the Executive Team developed the Recommended Master Plan, which is essentially a blend of Option 1 – Maximum Reuse and Option 3 which included rebuilding MSP in place. In addition to the capacity issue discussed above, the following observations were discussed with the Executive Team in developing a framework for the Recommended Master Plan:

- Regionalization of secure capacity operated directly by DOC is not a priority for DOC. The current contracted secure, treatment and re-entry facilities provide for localization relative to housing offenders in proximity to family and community;

Facility	Type	Current Rated Capacity	Rated Capacity as Evaluated
Montana State Prison			
Montana State Prison	Secure Facility	1,607	1,252
Missoula Assessment & Sanction Center (MASC)*	Assessment & Sanction Center	144	144
Riverside Special Needs Unit*	Secure Facility - Geriatiric	25	26
Subtotal - Montana State Priosn		1,776	1,422
Pine Hills Correctional Facility - Adult*	Secure Facility	64	64
Great Falls Regional Prison (Contract)*	Secure Facility	141	141
Crossroads Correctional Center (Contract)*	Secure Facility	550	550
Glendive Regional Prison (Contract*	Secure Facility	152	152
Other Contract Facilities		*Indeterminate*	
TOTAL CURRENT RATED CAPACITY - MALE		2,683	2,329
PROJECTED NEED RATED CAPACITY - MALE 2020		2,826	2,826
SHORTFALL - MALE BEDS 2020		143	497
Montana Women's Prison	Secure Facility	254	238
TOTAL CURRENT RATED CAPACITY - FEMALE		254	238
PROJECTED NEED RATED CAPACITY - FEMALE 2020		253	253
SHORTFALL - FEMALE BEDS 2020		(1)	15
TOTAL SYSTEM - CURRENT RATED CAPACITY		2,937	2,567
TOTAL SYSTEM PROJECTED NEED RATED CAPACITY - 2020		3,079	3,079
TOTAL SYSTEM SHORTFALL - RATED CAPACITY 2020		143	512

** These facilities were not included in the scope of the Phase I Master Plan*

- While DOC recognizes that there may be benefits in co-locating facilities such as a new men's and a new women's facility for economy of scale to serve more inmates in one location, these populations are very distinct, and the DOC prefers to not co-locate these populations. The women's prison programs are more trauma-based and therapeutic community type programs. The staffing levels, programming, services, vocational training, and other operational requirements vary significantly for the male and female populations.
- Currently, the female population is well served in Billings, where the facility is close to gender-appropriate services, and renovation and expansion is preferred over replacement. Prior consideration of reuse of Unit F for females for geographic distribution was eliminated from Options. We recommend a building expansion and facility remodel at MWP given the identified deficiencies noted regarding vocational and programming as well as staff offices, infirmary space, and the ability to better serve the serious mentally ill inmates. The Alley belongs to the DOC, so we believe we have the capacity to expand into this area following the easement restrictions and land use requirements. The resolution for the rights to the Alley has been included in the physical descriptions of Section IV.
- Renovation / reconstruction of MSP in place is a higher priority vs. building new facilities. As noted in the report, the existing campus was not built with the goal of providing the level of programming and services the DOC is now providing. This campus needs to be drastically altered through a replacement in place to minimize disruption and allow DOC to deliver a higher level of service, hopefully, with a design that maximizes or even potentially reduces the mandatory security posts required. The plan should address the programmatic deficiencies identified in the analysis related to the current emphasis of the Department including inmate programs, education and treatment. Additionally, improved facilities for staff services are needed to support staff in their day-to-day mission. For example, staff services should include provisions for overnight bunk rooms due to the remote location of the facility and accessibility during inclement weather.
- The provision of specialized housing for special needs inmates and acute and chronic care for the mentally ill as part of a broader program for continuum of care throughout their stay and subsequently in the community is of paramount importance. The existing Riverside campus in Boulder, Montana, is ideally located near two population centers for improved staffing and treatment options. Consideration should be given to the expansion of the Riverside campus to provide 1 to 2 housing units planned in accordance with current research related to best practices in a secure environment. These units could be developed via new construction or renovation of existing vacant buildings if adaptable to meet best practices.
- While the intent of the Master Plan should be maximum reuse of existing facility assets, it is recognized that portions of the existing housing have exceeded their useful physical life and, more importantly, are operationally inefficient, limiting the ability of the Department to fully implement direct supervision. Based on unit size and configuration, housing Units A, B & C at MSP can only be operated on an intermittent supervision basis. This not only impacts safety and security, but also limits options for on-housing unit programming and treatment. Similarly, while larger in size, Unit D is inappropriate relative to the current management and operational philosophy of DOC. This replacement could be either a direct replacement of lower security housing or could be a variation which includes staff efficient units for housing restrictive housing, mental health and higher custody inmates etc. Existing higher security housing could then be re-purposed for lower custody classifications, negating the issues raised in the evaluation relative to cell size, standards and capacity.
- The Master Plan should prioritize physical and security improvements identified at MSP and MWP based on the evaluation of existing conditions including security related improvements, building replacement and general maintenance requirements.
- The Planning Team also recommended as part of this review that the Department request a continuing biennial appropriation for ongoing maintenance in order to limit the need for future

major capital projects or building replacement due to conditions. The Building Owners and Managers Association (BOMA) typically recommends budgeting 3% - 5% annually for the continued maintenance and upkeep of facilities. Given that correctional facilities are heavily utilized on a 24/7 basis, the Planning Team would recommend an appropriation at the upper end of this range to protect the investments made through this capital program.

- The Master Plan should include a "safety valve" should conditions change or should the effort to stabilize the population achieve only limited success in reaching this goal. In this case, several alternatives will remain available to the Department:
  - Re-purpose Juvenile Beds at the Pine Hills facility for adult use;
  - In-place expansion at the Pine Hills Site;
  - Construction of a new Men's prison in the Billings area that would also consolidate the population currently at Pine Hills.

MASTER PLAN IMPLEMENTATION STRATEGY

The following narrative summarizes the elements of the recommended Master Plan on a facility by facility basis:

MONTANA STATE PRISON – RIVERSIDE UNIT

Note that the Riverside Unit was not included in the evaluation, but based on the overall review of the system and discussion above, it is recommended that it continue to act as an Annex to MSP focused on Special Needs Populations. Because it was not assessed during Phase I due to scope limitations, these recommendations do not address existing conditions, only recommended expansion.

- Construct two (2) Special Needs Housing Units of 32 beds each in single rooms; housing units should be subdivided into smaller treatment units consistent with best practices and include a wide range of program and treatment spaces including outdoor recreation, meditation/treatment and program areas such as gardening. In accordance with best practices, all areas should have abundant natural light and views to nature, including into individual rooms. Planning should allow for the subdivision of the housing unit during the day and potential to operate as a larger unit at night for staffing efficiency. Treatment staff and offices should be located on the unit, and policy and procedures should reinforce a collaborative approach to operation that balances care and custody with treatment programs. Overall campus should be planned to support a continuum of care that allows offender/patients to advance from acute to chronic care to general population. Each housing unit may include a mix of treatment levels to allow consistency in staff treatment and case management.
- As part of the initial Facility Program and Master Plan analysis, DOC will investigate the potential for adapting existing buildings to accommodate the proposed Special Needs Housing program for Acute Mental Health Treatment. This effort will include a comparative analysis of new construction vs. renovation costs, programmatic suitability relative to both correctional and mental health best practices, safety and security, operational implications and staffing and operational costs. Based on this analysis, DOC in conjunction with the Department of Administrative Services will make an informed decision as to the best approach – new construction or renovation – to accommodating the proposed specialized program.
-

This will reduce the shortfall in recommended operational capacity from 143 to 79 beds.

MONTANA STATE PRISON – MAIN COMPOUND

The following improvements are recommended for the Main Compound at MSP as part of an approach to reconstruction in-place:

Security Improvements: The following security improvements are recommended in support of continued operation and Master Plan implementation:

- Replace Security Cameras - Design, furnish, and install a campus wide high definition camera system on an isolated network capable of being monitored remotely from a central control location. This system will also be capable of being monitored from other points on the network such as local control stations, staff offices, or the MDOC. The camera system will be integrated with the facility locking control system to assist operators in the management of circulation throughout the facility. As events occur, the camera system will automatically display video of the event for control officers. This automation will improve response time and eliminate guess work from operations. The system will have an uninterruptable power supply (UPS) for back up to eliminate down time. The facility has already begun the installation of IP cameras in several buildings on campus. This project will be incorporating those cameras into the new facility wide system. The system will include IP network infrastructure, fiber optic cable, UPS power, an estimated 600 IP cameras, thirty viewing stations, and 90 days of video recording onsite.
- Locking Control Systems and Code Issues - Design, furnish, and install a code compliant campus wide locking control system. This system will be on an isolated network allowing remote control of door locks and intercoms from a central location at the facility. This system will have local control stations in the housing units, but central control can take over these stations when required. Central control will be able to release all of the doors on the campus in case of emergency, allowing the facility to meet section 408.4 of the International Building Code. The locking control system will be integrated with the video system as well as the duress (red light) system. As alarms occur, operators will be notified automatically, which will improve response time. This system will also include the addition of call buttons in every area where inmates are detained. These call buttons will allow inmates to call for help and allow the facility to meet Section 403.8 of the International Fire Code. The system will have UPS for back up to eliminate down time. The system will include an estimated thirty-seven stations that replace the existing control stations and hard graphic panels. The system will also include IP network infrastructure, fiber optic cable, UPS power, intercom amplifiers, some utility control, the addition of 450 call buttons, and the addition of monitoring exterior doors for all buildings on campus.
- Replace Perimeter Fence Detection System Design, furnish, and install a non-lethal electrified fence around the perimeter of the facility. This detection system provides both a visible/physical deterrent and a notification system for the facility. The system provides reliable perimeter security by limiting the amount of false alarms received in central control. It will be integrated with the camera system to provide visual notification when a zone is in alarm. This system will be similar to the perimeter system found in Shelby, Montana at the Crossroads Facility. Some of the components of the existing system will be re-purposed in the installation of this system. The system will include a notification station in Central Control, perimeter zone reset buttons, network infrastructure, fiber optic cable, a non-lethal electrified wire array mounted off the inner fence post, UPS power for back up to eliminate down time, and signage warning of electric shock. During design, alternative systems will also be considered including video/thermal detection as a supplementary system to monitor no-man's land.

Reconstruction-in-Place: The following items are recommended as part of the framework for reconstruction of MSP to better fulfill its current mission related to programs, operations and to increase operational effectiveness and staffing efficiency:

- Replace Housing Units A, B, C & D – As noted in the report, these units are inefficient to staff and preclude direct supervision and enhanced safety, supervision and treatment both due to unit size and configuration. A, B & C house 576 offenders in 36 small 8 cell/16 bed units, with limited program space. They can only be operated efficiently on an interim supervision basis – that is with only periodic supervision by custody staff making "rounds". Unit D is a larger unit housing 96 inmates but is also difficult to supervise due to its panopticon plan and overall size. All buildings have exceeded their life-expectancy and would require significant investment to upgrade to current standards. As a result it is recommended that these housing units be replaced with new construction based on 32 or 64 bed unit capacity.

  Based on housing configurations, 704 beds would be constructed for a net gain of 32 beds. This, in combination with planned expansion at Riverside, effectively resolves the projected shortfall in rated capacity.

  As noted below, it is recommended that the final scope be based on a more detailed analysis of MSP and the development of a facility specific program and master plan that can evaluate the cost benefits of simply replacing minimum/ medium security capacity in kind or developing an approach which provides for a mix of higher and lower security capacity. This would allow the existing high and close security housing to be re-purposed for a lower classification to maintain current rated capacity consistent with current standards. (See Facility Program and Master Plan below)

- Develop New Direct Housing Support Additions Develop new programs and support space to serve the current high security housing units. Development of improved program delivery both supports the Department's current emphasis on program services and enhances safety and security by reducing movement of offenders to other available facilities.

- Develop New Staff Services Facility – Staff recruitment and retention continues to be of concern to the Department. This option would provide improved facilities for the staff for training, briefing, physical conditioning and include bunk rooms for staff for use either when multiple shifts are required or when weather conditions affect access to the site.

- Develop New Correctional Industries Space The current Furniture Production Shop is in poor condition – structure, building enclosure, mechanical and electrical systems and perhaps most importantly relative to code and life safety requirements. It is recommended that it be replaced as part of a long-term plan for Correctional Industries Space. (See Appendix for Facility Program Space Requirements).

- Other associated project scopes (e.g. ADA Compliance through the facility would be identified in the detailed planning stage.

Physical Improvements: The following physical improvements are recommended as part of Master Planning based on the physical assessment completed for MSP Main Compound as part of the system-wide Master Plan.

- Roof Replacement – Roof replacement is recommended for the following buildings:
  - Restricted Housing Units (LHU1 & LHU2) - Removal of ballasted membrane, new single ply reinforced membrane system, insulation, flashings, and associated sealants.
  - Infirmary Unit(1) - New single ply reinforced membrane roofing system, direct to deck rigid insulation, flashings, and associated sealants.
  - Low Side Visiting (2)

- High Side Gym -Staff Gym (1) - Removal of foam over roof over metal building panel roof, new metal deck over metal building panel roof, vapor barrier, insulation, membrane, flashings, and sealants as applicable.
- Staff Gym - Removal of membrane and insulation system to deck, replace with new membrane, rigid insulation, vapor barrier, thermal barrier, flashings, and sealants.
- High Side Kitchen (1)
- Wallace Building (1) - Removal of single ply membrane assembly to metal deck, replacement with new single ply membrane , rigid insulation and flashings.
- B2 -Wallace
- Housing Unit F - Remove existing asphalt shingles. Replace with Asphalt shingles, slip sheet, ice and water shield, flashings and fascia trim.

- Unit F – Upgrade boiler controls & replace water well;

- Locked Housing units 1, 2, High Security Units 1,2 – Replace combination toilet units and related plumbing and controls;

- Low Security Kitchen and Support – Repair & upgrade building envelope;

- Auto Body Shop – Construct code compliant auto paint booth with ventilation, filtering and appropriate mechanical ventilation and heating;

- Furniture Factory Life Safety Upgrade – Life safety upgrades including fire suppression, alarm, HVAC, and ventilation. This upgrade is needed now due to code requirements, even if the building is to be replaced later.

- Work Release Center (WRC) - Envelope Repair The siding on the exterior walls is rotting out at juncture of concrete walls, openings and at soffit / exterior wall junctures. Snow build up at the juncture of the exterior berm perimeter walls and window sills causes water infiltration into the exterior wall assembly and thus deterioration of the materials / components of the assemblies.. Replacement of all siding, windows, flashings, soffit and fascia trim will be required.

- LHU1, LH2, Infirmary, Close 1 & 2, High Side Support - Resealing of all precast / tilt up panel joints, opening conditions. Removal, prep and reseal of panel joints, window openings, door openings, louvers, and other penetrations.

- Site Utilities - Site Infrastructure Improvements and upgrades are needed across the 140 acres of the main MT State Prison Compound for any expansion compacity. For masterplanning budgeting and long range building programming purposes, site underground infrastructure utilities improvements required include upgrading domestic potable water systems via wells, storage and treatment, fire suppression system water supply and service via a water loop, hydrants and potential fire pumps, sanitary sewer and storm systems lines, electrical power distribution and lighting, natural gas and communications and data infrastructure. Site infrastructure improvements above grade also will include roadway improvements and access improvements.

- Given the existing sewage lagoons are maximized on capacity for sewage treatment and being an antiquated system, infrastructure improvements masterplanning for the MSP campus also includes the provisions for a prepackaged on site sewage treatment plant to upgrade the sewage system and bring sewage system into DEQ compliance.

Develop Facility Specific Program & Master Plan: While the system-wide master plan is focused on establishing an overall framework for long-term needs and immediate improvements, further detailed study of MSP is recommended as part of implementing funded improvements. This analysis can look specifically at site organization, siting options for housing development and how to best phase the construction to maintain ongoing operations. Additionally, it will provide the opportunity to include the assessment and evaluation of the other facilities excluded from Phase I planning and validate Master Plan recommendations based on total cost of ownership including an objective assessment of impacts on staffing.

MONTANA WOMEN'S PRISON

The Recommended Master Plan is based on expanding and renovating the existing Montana Women's Prison in-situ. Expansion will occur on state owned land to the east of the existing site. There is a right-of-way along the east edge of the existing facility that has been vacated in favor of the state, but easements will be required for utility access. The following improvements at MWP are recommended as part of the Master Plan.

Security Improvements: The following security improvements are recommended in support of continued operation and Master Plan implementation:

- Replace Security Cameras/Communications Design, furnish, and install a campus wide high definition camera system. This camera system will be on an isolated network capable of being monitored remotely from a central control location. This system will also be capable of being monitored from other points on the network such as local control stations, staff offices, or MDOC. The camera system will be integrated with the facility locking control system to assist operators in the management of circulation throughout the facility. As events occur, the camera system will automatically display video of the event for control officers. This automation will improve response time and eliminate guess work from operations. The system will have a UPS for back up to eliminate down time. The facility has already begun the installation of IP cameras in several locations. This project will be incorporating the newer cameras into the system and replacing the older analog cameras. The system will include IP network infrastructure, fiber optic cable, UPS power, an estimated 120 IP cameras, three viewing stations, and 90 days of video recording onsite.

- Locking Control Systems and Code Issues Design, furnish, and install a code compliant campus wide locking control system. This system will be on an isolated network allowing remote control of door locks and intercoms from a central location at the facility. This system will have one central control station and one station at the front entry way. Central control will be able to release all of the doors on the campus in case of emergency, allowing the facility to meet section 408.4 of the International Building Code. The locking control system will be integrated with the video system as well as the duress system. As alarms occur, operators will be notified automatically. This automation will improve response time when emergencies occur. The system will have a UPS for back up to eliminate down time. This would include the addition of power supplies that will secure the magnetic locks at the facility. Currently these locks open when the facility loses power.

ANNEX EXPANSION & RENOVATIONS

- Construct New Annex – Plan, design and construct a new annex to provide program and treatment facilities consistent with the current mission of MDOC and improved housing for special needs populations. Addition to include:
  - New medical/mental health clinic & infirmary;
  - Expanded education and career technical education facilities;
  - Expanded Montana Correctional Industries ship area;
  - New visiting center;
  - Board of Probation/Parole hearing room;
  - Offender canteen/store with Honors Lounge;
  - Expanded counseling and treatment space;
  - Flexible special needs housing including (4) 8 bed single level housing units for acute mental health care, chronic mental health care, & high security housing;
    - Housing unit to include indoor and outdoor recreation space, program and treatment space and office space to co-locate custody and treatment staff on the unit;
  - Renovate and Re-purpose vacated space in the existing building for expanded program and treatment space.

Physical Improvements - The following physical improvements are recommended as part of Master Planning based on the physical assessment completed for Montana Women's Prison in the system-wide Master Plan.

- Main Building – Replace Roof - Replacement of existing low slope standing seam metal roof and insulation with new standing seam system, composite rigid insulation system, air barrier/protection sheet, ice water shield and appropriate flashings and drainage. Soffit and fascia panel replacement also to be completed with new ventilated prefinished metal soffit system and fascia system

- Chapel – Roof/Envelope Repairs - Removal of chapel EPDM membrane roof, insulation and flashings and EIFS systems 4' section from to below drain outlet points through wall of lower roof sections and removal of high wall EIFS system complete for repair of wall / roof junctures and parapet conditions. Replacement / repair of wall flashings/ wall envelope barrier, rework of drainage scuppers, rework of all high wall to roof junctures flashings and envelope sealing, replace with EPDM membrane, replace wet insulations, all flashings and sealants at junctures and openings.

- MCE Industries
  - Building B3 – complete Roof Replacement will be needed within 5 to 10 years. B2 industries roof section will need replacement.
  - HVAC equipment / controls will need complete replacement- We did not make these immediate- maybe they should have been.
  - Compressor failing in outdoor chiller, exhibiting fewer hours of operation
  - Kitchen MAU goes down for unknown reasons, often during high winds
  - Leaking heating water hydronic fitting in cafeteria ceiling
  - Medical Area has cold complaints and overly pressurized
  - Control Rm and adjacent Server Rm are too warm
  - Hydronic control valves have unstable operation, better with strainers and flushed
  - Return fan on HV&AC-5 not fully operational, running at low speed
  - Sanitary Piping leaks at fixtures inside.
  - Emergency lighting upgrades needed. All fluorescent light fixtures to be changed out as needed.

Develop Facility Specific Program & Master Plan – While the system-wide master plan is focused on establishing an overall framework for long-term needs and immediate improvements, as with MSP, further detailed study of MWP is recommended as part of implementing funded improvements. This analysis can look more specifically at site organization, siting opportunities options for housing development and how to best phase the construction program to maintain ongoing operations. Additionally, it will provide an opportunity to include the assessment and evaluation of the other facilities excluded from Phase I planning and validate Master Plan recommendations based on total cost of ownership including an objective assessment of impacts on staffing.

LONG TERM FUNDING

As noted in the discussion above, as part of Master Plan implementation it is recommended that the Department of Correction work with the Budget Office, Department of Administration and the Legislature to develop a plan to fund future maintenance requirements. As noted in the discussion above, BOMA typically recommends funding annual maintenance and upgrade for a typical office building at 3% - 5% of the value of the asset. Given the constant 24/7 utilization of correctional facilities we would recommend an allocation at the upper end of the range. Planning for maintenance funding on an annual (or biennial basis) will allow the state and Department to better protect the taxpayers investment in the assets and reduce the need for physical condition or age based major capital programs in the future.

Montana Correctional Enterprise

- SECTION 7.0 -

FUNDING

Page intentionally left blank.

RECOMMENDED MASTER PLAN PROPOSED ACTIONS

Included in this report is the funding request for the 2021-2023 biennium. This funding is broken into three components - MSP, MWP, and Riverside Special Needs Facilities. Each component includes the immediate actions and deferred maintenance that should be included. A factor for ongoing funding for deferred maintenance at approximately 5% is recommended in the final costing.

By completing the recommended master plan, MDOC will have the potential to meet their goal of no new housing capacity throughout the system. Should this not be achieved over the next twenty years, the provided options may be considered "safety valves" to release pressure on the overall system. These include increasing capacity at Pine Hills, providing an additional or expanding Men's facility, or increasing the contracted bed support throughout the state.

RECOMMENDATIONS

MDOC to confirm Range of Options to be defined and evaluated. Each Conceptual Option requires additional investigation for detailed analysis, particularly in terms of fit within the system for MDOC to determine the preferred approach and phasing.

Convene a Task Force to review and develop initiatives to deal with Parole Violators in the interest of reducing impact on secure bed capacity.

CURRENT STEPS

In this report, we performed the following actions:

1. Define immediate actions for funding.
2. Compile and submit supporting documentation for the Budget Request
3. Complete the Phase 1 Report in terms of projected needs, existing conditions, and shortfall analysis.
4. Support the Budget Request process as needed to fund the balance of the Master Plan Work and Immediate Priorities, Actions.

FUTURE STEPS

1. Perform due diligence and planning for immediate needs;
2. Adopt a long term Master Plan Strategy
3. Implement any approved actions from the master plan options.
4. Perform urgent/immediate physical improvements as funding allows.
5. Undertake phased implementation actions

2021-2023 BIENNIUM FUNDING REQUEST

The following tables outline the funding request for implementation of the recommended Master Plan. The frst step in implementation will be the development of a specifc facility Program and Master that will look more specifcally at site organization, siting opportunities options for housing development and how to best phase the construction program to maintain ongoing operations and the integration of various improvements planned. Additionally, it will provide an opportunity to include the assessment and evaluation of the other facilities excluded from Phase I planning and validate Master Plan recommendations based on total cost of ownership including an objective assessment of impacts on staffing.

Montana Department of Corrections Facility Assessment/Strategic Master Plan Supplement	Summary Scope	Construction Cost*	Project Costs at 30%
Complete Physical, Functional & Operational Assessment for other State Owned Facilities	Assessment & Planning - Pine Hills, Riverside, Missoula Intake; Integrate Contract Facilities; Identify Population Management Initiatives and Alternative Sanctions	$400,000	$400,000

Montana Department of Corrections Strategic Development Master Plan	Budget Summary	Construction Cost*	Project Costs at 30%
Montana State Prison Riverside Unit	**Special Needs Housing**	**$18,400,000**	**$23,920,000**
Montana State Prison Main Compound	**TOTAL BUDGET**	**$114,285,000**	**$148,473,000**
MSP Main Compound Security		$8,250,000	$10,725,000
MSP Main Compound Reconstruct In-Place/Functional Needs		$80,104,400	$104,135,720
MSP Main Compound Physical Improvements		$25,605,600	$33,287,280

Montana State Department of Corrections
Strategic Master Plan

Estimated Project Implementation Budget Requirements

Montana State Prison Riverside Unit	Summary Scope	Construction Cost*	Project Costs at 30%
1 **New Special Needs Housing**	**Plan, Design & Construct 2- 32 Bed Special Needs Housing Units**	**$18,400,000**	**$23,920,000**
This addresses a critical deficiency noted in the evaluation of the facility to provide appropriate treatment housing for individuals with acute mental health issues in a prison population with increasing mental health issues. Riverside was identified as the primary resource for this program as the existing Riverside campus in Boulder, Montana, is ideally located near two population centers for improved staffing and treatment options.	**Key Characteristics** Single Level, No Mezzanine; Single Cells Subdivided into smaller treatment units; Glazed Cell Fronts Includes Counseling Space on the Unit. Joint Management - Security & Treatment Staff **Cost Basis** 32,000 CGSF; 36,800 BGSF @ $500/sf *all costs current 2020 dollars, no escalation.		
Subtotal - MSP Riverside Unit	*Refer to Recommended Master Plan and Appendix 3 for additional information*	**$18,400,000**	**$23,920,000**

Montana State Prison Main Compound	Summary Scope	Construction Cost*	Project Costs at 30%
Security Related			
1 **Replace Security Cameras**	**Design, furnish, and install a campus wide high definition camera system.**	**$2,750,000**	**$3,575,000**
Critical Security & Operational Need	**Key Characteristics** The system will include IP network infrastructure, fiber optic cable, UPS power, incorporate existing IP cameras an provide an estimated 600 additional IP cameras, thirty viewing stations, and 90 days of video recording. **Cost Basis** Lump Sum Allowance *all costs current 2020 dollars, no escalation.		
2 **Locking Control Systems, Code Issues, Intercoms**	**Design, furnish, and install a code compliant campus wide locking control system.**	**$3,000,000**	**$3,900,000**
Critical Security & Operational Need	**Key Characteristics** This system will be on an isolated network allowing remote control of door locks and intercoms from a central location at the facility. This system will have local control stations in the housing units, but central control can take over these stations when required. The system will also include IP network infrastructure, fiber optic cable, UPS power, intercom amplifiers, some utility control, the addition of 450 call buttons, and the addition of monitoring exterior doors for all buildings on campus. **Cost Basis** Lump Sum Allowance *all costs current 2020 dollars, no escalation.		
3 **Replace Perimeter Fence Detection System**	**Design, furnish, and install a Non-Lethal Electrified Fence around the perimeter of the facility.**	**$2,500,000**	**$3,250,000**
Critical Security & Operational Need	**Key Characteristics** The system will include a notification station in Central Control, perimeter zone reset buttons, network infrastructure, fiber optic cable, a non-lethal electrified wire array mounted off the inner fence post, UPS power, and signage warning of electric shock. **Cost Basis** Lump Sum Allowance *all costs current 2020 dollars, no escalation.		
Subtotal - MSP Main Compound Security	*Refer to Recommended Master Plan and Appendix 3 for additional information*	**$8,250,000**	**$10,725,000**

	Montana State Prison Main Compound	Summary Scope	Construction Cost*	Project Costs at 30%
Reconstruction in-Place/Functional Needs				
4	**Replace Housing Units A, B, C & D**	**Plan, design & construct replacement Housing for Existing inefficient, outmoded housing units with new housing to accommodate direct supervision and enhanced safety, security and treatment.**	**$62,836,000**	**$81,686,800**
	A, B & C house 576 offenders in 36 small 8 cell/16 bed units, with limited program space and can only be operated efficiently on an interim supervision basis – that is with only periodic supervision by custody staff making "rounds". Unit D is a larger unit housing 96 inmates but is also difficult to supervise due to its panopticon plan and overall size. All buildings have exceeded their life-expectancy and would require significant investment to upgrade to current standards.	**Key Characteristics** Construct 704 beds in 64 bed Housing Units Net gain of 32 beds Two-tier configuration Security Glazed Cell Fronts Program & Treatment space on each housing unit **Cost Basis** 118,800 CGSF; 136,600 BGSF; @ $460/sf *all costs current 2020 dollars, no escalation.		
5	**New Multi-Purpose Programs Building**	**Develop new programs and support building to serve the current high security compound (or lower security if repurposed in the future) to include program, treatment, education and related support space.**	**$6,182,400**	**$8,037,120**
	Evaluation noted a significant shortfall in program space serving the current high Security compound. Development of improved program facilities both supports the Department's current emphasis on program services and enhances safety and security by reducing movement of offenders to other available facilities.	**Key Characteristics** 2 - Multi-purpose programs buildings **Cost Basis** Max Type Units (2) 5,600 cgsf; 6,440 bgsf; $480/sf Close Type Units (2) 5,600 cgsf; 6,440 bgsf; $480/sf *all costs current 2020 dollars, no escalation.		
6	**Entry/Staff Services Addition**	**Plan design & Construct new Staff Services Building**	**$8,740,000**	**$11,362,000**
	Evaluation indicated significant shortfalls in staff support facilities; Staff recruitment and retention continues to be of concern to the Department. This options would provide improved facilities for the staff for training, briefing, physical conditioning and include bunk rooms for staff for use either when multiple shifts are required or when weather conditions affect access to the site.	**Key Characteristics** Staff Lockers Training/Briefing Physical Fitness Overnight accommodations **Cost Basis** 20,000 CGSF; 23,000 BGSF @ $380/sf *all costs current 2020 dollars, no escalation.		
7	**New Correctional Industries Space**	**Plan design & Construct new Correctional Industries Building**	**$2,346,000**	**$3,049,800**
	The current Furniture Production Shop is in poor condition – structure, building enclosure, mechanical and electrical systems and perhaps most importantly relative to code and life safety requirements.	**Key Characteristics** New Pre-engineered Industrial building Ventilation, Dust Collection, Finishing spaces **Cost Basis** 6,900 BGSF @ $380/sf *all costs current 2020 dollars, no escalation.		
	Subtotal - MSP Main Compound Reconstruct In-Place/Functional Needs	*Refer to Recommended Master Plan and Appendix 3 for additional information*	**$80,104,400**	**$104,135,720**
Physical Improvements				
8	**Replace Roofs**	**Restricted Housing Units (LHU1_LHU2), Infirmary Unit(1), Low Side Visiting (2), High Side Gym -Staff Gym (1), High Side Kitchen (1), Wallace Building (1), (B2 -Wallace), Housing Unit F.**	**$3,810,000**	**$4,953,000**
9	**MCE Furniture Factory Life Safety Upgrades**	**Fire Suppression, Alarm, HVAC, Ventilation upgrades required and recommended on interim basis even if replacement building funded Fire Suppression, Alarm, HVAC, Ventilation**	**$875,600**	**$1,138,280**
10	**Unit F - Boiler System /Controls**		**$100,000**	**$130,000**
11	**Unit F - Water Well Replacement**		**$285,000**	**$370,500**
12	**Replace Fixture - cell combo units**	**Locked Housing units 1, 2, High Security Units 1,2**	**$675,000**	**$877,500**
13	**Envelope Repairs**	**Low Side Support / Low Side Kitchen**	**$150,000**	**$195,000**
14	**Motor Vehicle Auto Body Shop Paint Booth**	**No paint booth currently: Proposed Large vehicle side draft with Air units and heat.**	**$110,000**	**$143,000**
15	**Site Infrastructure**	**Upgrade site utilities - water, sewer, gas, power, emergency power & provide package sewage treatment plant; 140 acres +/- @ $115,000 + $3.5M for treatment plant**	**$19,600,000**	**$25,480,000**
	Subtotal - MSP Main Compound Physical Improvements	*Refer to Recommended Master Plan and Appendix 3 for additional information*	**$25,605,600**	**$33,287,280**
15	**Develop Facility Specific Program & Master Plan**	**Further detailed study of MSP is recommended as part of implementing funded improvements. This analysis can look more specifically at site organization, siting opportunities options for housing development and how to best phase the construction program to maintain ongoing operations and validate Master Plan recommendations based on total cost of ownership including an objective assessment of impacts on staffing**	**$325,000**	**$325,000**
	Subtotal - MSP Main Compound TOTAL SCOPE OF IMPROVEMENTS	*Refer to Recommended Master Plan and Appendix 3 for additional information*	**$114,285,000**	**$148,473,000**

Montana Women's Prison Main Compound	Summary Scope	Construction Cost*	Project Costs at 30%
Security Related			
1 Replace Security Cameras	**Design, furnish, and install a campus wide high definition camera system**	$700,000	$910,000
Critical Security & Operational Need	**Key Characteristics** The system will include IP network infrastructure, fiber optic cable, UPS power, an estimated 120 IP cameras, three viewing stations, and 90 days of video recording. **Cost Basis** Lump Sum Allowance *all costs current 2020 dollars, no escalation.		
2 New Door Control System	**Design, furnish, and install a code compliant campus wide locking control system.**	$400,000	$520,000
Critical Security & Operational Need	**Key Characteristics** This system will be on an isolated network allowing remote control of door locks and intercoms from a central location at the facility. This system will have one central control station and one station at the front entry way. Central control will be able to release all of the doors on the campus in case of emergency. The locking control system will be integrated with the video system as well as the duress system. As alarms occur, operators will be notified automatically. The system will have an uninterruptable power supply for back up to eliminate down time. This would include the addition of power supplies that will secure the magnetic locks at the facility. Currently these locks open when the facility loses power. **Cost Basis** Lump Sum Allowance *all costs current 2020 dollars, no escalation.

HVAC SYSTEMS CONDITION (6)

PIC	P/A	% of Whole	Sub-Component	Condition Observed and Action to Fix	Location & Note
Heating (A)					
			Controls		Schneider wall sensors in Admin
			BMS		MTI BMS Controls located in Industries
			Boiler/Furnace		Boiler system (HW) fed from new housing B3 building
			Room Units		Radiant heat, VAV terminals
			Hydronic Piping		New heating water booster pumps in 2015
			Alternative Fuel		
Ventilating (B)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Air Handler	Four air handlers (AHU-1 thru -4) in reasonable condition.	Four AHUs replaced in 2015 project.
			Ductwork	Ductwork appears to be in reasonable condition. Being 37 years old, there are likely leaks. Insulation should be repaired and added per current Energy Codes.	Return duct left mostly original in 2015 project, only SA and EA replaced.
			Specialized Exhaust	Crawlspace/tunnel needs ventilation.	Exhaust fans added in 2015 project.
			Room Ventilators		VAV terminals added in 2015 project
Cooling (C)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Non Detention Central AC / HVAC	A18 Storage/IT Room: No cooling in sever space. Add a dedicated split system cooling unit.	A18 Storage/IT Room: No dedicated cooling, only a small return air flex duct w no t'stat
			Detention: HVAC Ventilation / AC	Four air handlers (AHU-1 thru -4) in reasonable condition.	Four AHUs replaced in 2015 project.
			Hydronic Piping	Miscellaneous piping leaks in building; several stained ceiling tiles, as well as utility tunnel. Full review and repair should be performed.	Chiller, boiler and domestic water plant now fed from 2005 project in new building mech room

Plumbing Systems Condition (7)

Fixtures (A)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Non Detention: Sinks/Toilets/Showers	Fair and operational. Some fixtures do not meet current ADA.	
			Detention: Sinks / toilets Showers	Need to confirm point of use mixing valves for anti-scalding at public fixtures.	Did not get access to living quarters in this building.
			Specialty Fixtures: Kitchens / Food Service (N/A). Laundry	Repair insulation behind commercial washers. Exposed belts on commercial dryers, noisy; possibly bad bearing or loose belts.	Laundry room, D3 Kitchen
			Plant Hot Water Generation		Now comes from Mech Room in new building. Problems with recirc
			Alternative Fuel		
Supply Piping (B)					
PIC	**P/A**	**% of Whole**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Piping	Misc leaks. Field review for repair and insulation replacement.	Tunnel, ceiling, fire riser room, mechanical rooms
			Pumps	Long recirc times. Review hot water recirc pump and piping connections for quicker HW tap recirc.	
Waste Piping (C)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Piping		
			Pump		

Fire Protection Condition (8)

Extinguishing System (A)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Non Detention: Sprinkler: Wet / Dry	Repair insulation around meter.	Fire riser room in D8 Meter Room.
			Detention: Sprinkler: Wet / Dry		
			Non Detention: Hose Stations / Cabinet Systems

Basic Site Information

Location/Address: 701 South 27th Street

Building Area: 27,054

Billings | MT | 59101

General Building Information

Initial Construction Date: 1982 | Facility Age: 38 | No of Floors: 1+Mezz | ☐ Modular/ Temporary

General Facility Description:

This is a multi level building structure that has been added onto several times with attached and separate functional building areas.

Building renovated in 1994.
Addition in 1999

Major Renovations/Expansion Projects

Facility Completely Renovated? ☐ | If yes, Date of Last Major Renovation: 1994

1 Year
2 Year
3 Year

1: General Building Condition

General Condition of the Building: | Condition (0-5): 1

Relatively new construction.

The core shell and structure of this building is in good condition although the roof and some large components are in need of moderate to major renovation.

Comments on Overall Building Condition:

Building being maintained in spite of hard use.

The building has been used for administrative, detention and other various uses. The building is in good condition although it is in need of a large amount of normal maintenance issues as well as several major renovations and replacement of equipment.

Building Physical Data Entry Form | Montana Women's Prison | January 15, 2020

B

2: Strucuture: Steel Frame/ Concrete Floors | Condition (0-5): 1

Building Frame Type:
- Wood Frame
- Steel Frame
- Concrete or CMU
- Concrete Moment Frame
- Unreinforced Masonry Wall
- Other/Indeterminate

Description of Structure: Structure is steel frame with steel stud infill. Metal bar joist roof structure. Concrete slab on grade.

Structure Condition Comments: The primary structure of the building is in great shape.

3. Exterior Envelope: Exterior Material Type: B | Condition (0-5): 2

Level A= Tilt-Up,Dryvit, or Painted CMU
Level B= Precast, Brick, or Middle of the Road Curtain Wall
Level C= High End Curtain

Brick masonry

Brick masonry with HM doors and windows.

Comments on Condition of Exterior Envelope:

Exterior brick envelope is in great shape. Condition 1.
HM windows and doors are in good condition, with several (approximately 20% of exterior) need replaced due to rust and deterioration. Condition 3.
All exterior doors are in need of new seals. Most are worn or well past their useful life. Condition 3.
Soffit has water damage in multiple locations and in need of renovation. Condition 3.

Level A= Modular or Shingles
Level B= Built-Up/Single Ply
Level C= Ornamental Metal,Tile

4: Roof Type Material (Level A, B, C) B | Condition (0-5): 4

Roof Description and Comments: Metal slope roof is in fair condition and in need of renovation of replacement. Condition 4
Gutters are in poor condition and a potential cause of soffit damage. Condition 4.
Membrane roof is in good condition but will need normal maintenance in 5 to 10 years. Condition 2.

5: Interior Finishes: Condition (0-5): 2

Administrative and program spaces are mostly painted gypsum board walls and ACT or gypsum ceilings which are in good condition.
The cells are painted CMU and cementitious detention grade painted ceilings.
The majority of the building finishes are in realitively good condition. But will need normal maintenance.

Rating Codes
0= Not Applicable
1= Normal Maintenance
2= Minor Renovation
3= Moderate Renovation
4= Major Renovation
5= Replacement Required

Interior Finishes Comments: Hard use will necessitate reneweal of interior finishes in near futurre

Interior finishes are in good to fair condition. The majority of wear is on the paint. Just normal wear on the paint surfaces. Condition 1
The door hardware in the Administrative area is knob lever which is outdated. As well as door hardware through out the facility is at it life expectancy. Condition 2.

6: HVAC Systems Condition (0-5):

Four AHUs were replaced in 2015 are in fair/good condition.	0
No cooling in the IT Storage	5
Portions of return ductwork original to building, likely cleanliness and leak issues	3
Crawlspace needs a ventilation system	5
Leaks in hydronic piping in several locations, stained tiles	3
Pipe insulation missing or damaged in crawlspace	2
Loose belts and possible bearing failure on commercial dryers in Laundry Room	2

HVAC Evaluation Comments:

Four 1983 AHUs were replaced in 2015 project
Chiller, boilers and domestic water plant replaced in 2005 project
VAV, AHU, EF, and HW/CW pumps systems upgraded in 2015 project
Building has a DDC web based temperature control system

7: Building Plumbing Systems: Condition (0-5)

Poor domestic water recirculation, needs revise piping and pump	1
Pipe insulation missing or damaged in crawlspace and water entrance room	2
Portions of fixtures are not ADA compliant	4
Anti-scald fixtures and mixing valves required in restrooms and showers	4

Plumbing System Evaluation Comments: New domestic HW boilers installed in 2005 project
Plumbing fixture upgrades in 1994 project

8: Building Fire Protection Systems: Condition (0-5)

General Life Safety and Fire Suppression Review for updated compliance	3

Fire Protection Evaluation Comments: Fire suppression upgrades in 1994 project

9: Building Electrical Systems: Condition (0-5) 2

Existing generator is nearing end of life expectancy.	4
Electrical GE gear is showing signs of age and has mismatched circuit breakers.	4
Lighting was observed to be mostly fluorescent. Lighting controls were not observed.	4
Electrical wiring was observed in conduits and industrial grade devices.	1

Building Electric Evaluation Comments: Transformer and meter are utility owned.

10: Vertical Transportation Condition (0-5) 2

Concrete pan filled steel stairs.

Vertical Transportation Comments: Stairs are in great condition.

of Elevators: 0 # of Stairs: 1 # of Floors: 1 + Mezz # of Escalators: 0

11: ADA Compliance Condition (0-5) 2

ADA parking and accessibility to building is good.	2

Life Safety Evaluation Comments:

12: Life Safety Systems: Condition (0-5) 2

Fire alarm system and smoke/duct detection in good condition.	1
Emergency lighting mainly fluorescent and should be replaced to LED type.	4
Exit signs were in fair condition. Should be replaced to newer LED type.	2

Life Safety Evaluation Comments: Warden indicated with the loss of utility and no generator, inmate doors are not fail secure.

13: Comm/Tech Distribution Condition (0-5): 2

Intercom is dated and should be upgraded.	3
Rack had UPS and space for future. Cabling should be reorganized.	2
Telephone termination board in good condition.	2
Clock system was not observed. Warden indicated that it no longer worked.	5

Comm/Tech Evaluation Comments: IT room temperature seemed high, should be cooled.

14: Electronic Security Distribution Condition (0-5): 4

Security Electronics Evaluation Comments: Security system is outdated, needs majjor upgrade.

Expandability/Adaptability

This building has a low level of adaptability and very little to no expandability.

15. Site Conditions

Wrought iron fencing around dog area falling over (Poor)	5
Sallyport intake gate fails to open high enough and fails in winter.	4
Sayllport for food deliveries not long enough for large delivery trucks.	3
Perimeter fence is too short to provide adequate security. (Fair)	4
Sidewalks, parking areas in good condition.	2
Storm drainage system in good condition. All catch basins requiring cleaning to prolong life of system.	2

NUMBER OF STORIES 1

Assumed this was gym, visitors center, etc.

ADDRESS: 701 27th Street South, Billings Montana

YEAR BUILT 1994 remodel, 1999 addition, RECREATION / PROGRAMS

DATE: 5/27/2020

BUILDING TYPE Group I-3, Prison Occupancy, TYPE II FR

Montana Department of Corrections- Facilities Condition Inventory:

HVAC SYSTEMS CONDITION (6)

Heating (A)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Controls		
			BMS		MTI BMS Controls located in Industries
			Boiler/Furnace		Boiler system (HW) fed from new housing B3 building
			Room Units		Dedicated AHU-5 for gym, AHU-6 with VAVs for Common and Vistor's
			Hydronic Piping		New heating water booster pumps in 2015
			Alternative Fuel		
Ventilating (B)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Air Handler	AHU-6 beyond functional life. Not enough air in Visitors Entrance. Add min-split DX heat pump for additional heating and cooling.	Visitor's entrance on south
			Ductwork	Detached supply duct at AHU-5. All existing ductwork should be leak tested	AHU-5 north of gym on mezzanine. Gym duct original in
			Specialized Exhaust	Exhaust fans are past their functional life and should be replaced.	Visitor's Entrance
			Room Ventilators	Radiant panels (RP) and CUHs approaching their functional life and should be replaced.	Visitor's Entrance
Cooling (C)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Non Detention Central AC / HVAC	HVAC unit AHU-6 does not enough air in Visitors Entrance and is beyond its useful life. Add min-split DX heat pump for additional heating and cooling.	Visitor's entrance on south
			Detention: HVAC Ventilation / AC		
			Hydronic Piping		Revised hydronic piping to existing coils in 1997

Plumbing Systems Condition (7)

Fixtures (A)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Non Detention: Sinks/Toilets/Showers	Non ADA sink trap covers in public toilets.	Visitor's Entrance, public toilets
			Detention: Sinks / toilets Showers		
			Specialty Fixtures: Kitchens / Food Service.		
			Plant Hot Water Generation	No HW recirc piping to Visitors Center. Add recirc pipe and pump to Public bathrooms in Visitor's Entrance	Visitor's Entrance
			Alternative Fuel		

Supply Piping (B)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Piping	Electric water heater past its functional life	Mezzanine AHU RM
			Pumps		
Waste Piping (C)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Piping	Roof drains should have overflow provisions such as overflow drain bowls and piping	Did not confirm on-site, but OFL not indicated on plumbing schedule
			Pump		

Fire Protection Condition (8)

Extinguishing System (A)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Non Detention: Sprinkler: Wet / Dry		
			Detention: Sprinkler: Wet / Dry		Drawings show vandal resistant heads in new addition and dry pipe connection from the existing riser system in old building
			Non Detention: Hose Stations / Cabinet Systems		
			Detention: Hose Stations / Cabinet Systems

Montana Department of Corrections- Facilities Condition Inventory:

Electrical Systems Condition (9)

Building Service/Controls (A)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Transformer	Fair condition.	Utility Owned.
			Meter Base	Fair condition.	Utility Owned.
			Generator	Poor. Existing Generac 52 KVA Genset needs to be replaced.	South side of building.
			Alternative Source	N/A	N/A
Lighting (B)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Non Detention: Fixtures	Fair. Fluorescent type except in gym where it is LED.	Lighting should be replaced to LED type.
			Detention: Fixtures	Fair. Fluorescent type.	Lighting should be replaced to LED type.
			Light Level Controls	None Observed.	
			Occupancy/Daylight Sensor	None Observed.	
			Wiring	Good. All wiring was observed in conduit,	
Distribution (C)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Switchgear	Poor. Existing GE panelboards.	Electrical gear is existing to the original construction.
			Service Panels	Poor. Existing GE panelboards.	Electrical gear is existing to the original construction.
			Devices	Fair. Industrail Grade.	
			Wiring	Good. All wiring was observed in conduit.	

Life/Safety Systems Conditions (12)

Egress (A)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Exit Systems	Fair condition.	Warden indicated with the loss of utility and no generator, inmate
Exit/Emergency Lighting/Alarms (B)					
PIC	**P/A**	**% of Whole**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Exit Lights	Fair. Should be replaced with a newer LED type exit sign.	
			Emergency Lighting	Poor. Fluorescent type which should be replaced with LED type.	
			Smoke/Heat Detection	Good condition.	Smoke detectors observed throughout the building. Duct
			Fire Alarm System	Good. Edwards Fire Alarm Control panel serves entire facility.	

Communications / IT Systems (13)

Voice/Data (A)					
PIC	**P/A**	**% of Whole Bldg**	**Sub-Component**	**Condition Observed and Action to Fix**	**Location & Note**
			Intercom	Poor condition.	Valcom system located in IT room. Room temperature was high.
			Clock	Poor condition.	Does not work per Warden.
			Telephone	Good condition.	TTB located in IT room. Room temperature was high.
			Data	Good condition.	Rack located in IT Room with UPS located at the bottom of the rack.

Basic Site Information

Location/Address: 701 South 27th Street

Building Area: 1,800

Billings | MT | 59101

General Building Information

Initial Construction Date: 1983 | Facility Age: 37 | No of Floors: 1 + Mezz | ☐ Modular/ Temporary

General Facility Description:

This is a gymnasium and visitation addition on to the MWP building.
One level plus a mechanical mezzanine and balcony level for the main gymnasium floor.

Major Renovations/Expansion Projects

Facility Completely Renovated? ☐ | If yes, Date of Last Major Renovation:

1 Year: 1997 — Visitation center added.

2 Year:

3 Year:

1: General Building Condition

General Condition of the Building: | Condition (0-5): 2

Relatively new construction.

The building addition constructed in 1999. Main components of the shell are concrete and CMU with brick facade. Concrete slab on grade foundation. Roof is sloped metal on visitation side and low slope membrane on the gymnasium side.

Comments on Overall Building Condition:

Building being maintained in spite of hard use.

Building is used for the gymnasium facility and visitation. Building is CMU and brick masonry construction. The condition of the building is in good condition with only several maintenance and renovations needed. The building has been maintained well with typical wear and tear.

2: Strucuture: Steel Frame/ Concrete Floors — Condition (0-5): 1

Building Frame Type:
- Wood Frame
- Steel Frame
- Concrete or CMU
- Concrete Moment Frame
- Unreinforced Masonry Wall
- Other/Indeterminate

Description of Structure:
Foundation is concrete slab on grade.
Walls are CMU with brick facade
Roof is 1/2 concrete tees for gymnasium side and 1/2 metal bar joist for visitation side.

Structure Condition Comments:
The structure is in great condition, no anticipated work other than general maintanance.

3. Exterior Envelope: Exterior Material Type: B — Condition (0-5): 2

Level A= Tilt-Up,Dryvit, or Painted CMU
Level B= Precast, Brick, or Middle of the Road Curtain Wall
Level C= High End Curtain

CMU with brick facade envelope.
HM doors. Aluminum doors and windows at visitation.

Comments on Condition of Exterior Envelope:

Brick facade in good condition. Condition 1
HM and Aluminum exterior doors need seal replaced. Condition 2

Level A= Modular or Shingles
Level B= Built-Up/Single Ply
Level C= Ornamental Metal,Tile

4: Roof Type Material (Level A, B, C) B — Condition (0-5): 4

Roof Description and Comments:
Roof is 1/2 sloped metal roof over visitation and 1/2 membrane roofing over gymnasium. The membrane roof is at its life expectancy and should be replaced, condition 3. The majority of the metal roof is still performing, but the soffits and gutters are causing water issues and should be renovated, condition 4.

5: Interior Finishes: Condition (0-5): 3

Gymnasium finishes are paint on CMU walls, rubber flooring and carpet tiles.
Visitation finishes are paint on gypsum board walls and carpet tiles.

Rating Codes
0= Not Applicable
1= Normal Maintenance
2= Minor Renovation
3= Moderate Renovation
4= Major Renovation
5= Replacement Required

Interior Finishes Comments:
In general the finishes in this building are in good condition but will need general maintenance, condition 1.
The ceiling in the visitation room has water damage. It is believed from a leak in a water heater. This will require moderate renovation, condition 3.

6: HVAC Systems — Condition (0-5):

AHU-6 past functional life.	5
Radiant terminals including CUH and RH past useful life	4
Not enough conditioning air in Visitor's Entrance, complaints of hot and cold temps	4
Detached supply duct off AHU-5	5
Portions of ductwork original to building, likely cleanliness and leak issues	3

HVAC Evaluation Comments:
Gym part of 1983 project
Visitor's Entrance Addition HVAC added in 1997 project

7: Building Plumbing Systems: Condition (0-5)

Electric water heater in mezzanine past its functional life	5
Portions of fixtures are not ADA compliant, no trap protectors on public sinks	4
No DHW recirculation piping in Visitor's Addition	3
No overflow drains or OFL piping indicated on drawing schedule	2

Plumbing System Evaluation Comments:

Gym in 1983 project
New domestic HW boilers installed in 2005 project
Plumbing fixture upgrades in 1994 project

8: Building Fire Protection Systems: Condition (0-5)

General Life Safety and Fire Suppression Review for updated compliance	3

Fire Protection Evaluation Comments:

Visitor's Entrance Addition fire suppression added in 1997 project; tied into (ex) riser
Vandal resistant, dry type sprinkler heads in Common area

9: Building Electrical Systems: Condition (0-5) 2

Existing generator is nearing end of life expectancy.	4
Electrical GE gear is showing signs of age and has mismatched circuit breakers.	4
Lighting was observed to be mostly fluorescent. Lighting controls were not observed.	4
Electrical wiring was observed in conduits and industrial grade devices.	1

Building Electric Evaluation Comments:

Transformer and meter are utility owned.

10: Vertical Transportation Condition (0-5) 1

Steel stringer, concrete pan filled.

Vertical Transportation Comments:

Stairs in great condition no work needed. Condition 1.

of Elevators: 0 # of Stairs: 1 # of Floors: 1 + Mezz # of Escalators: 0

11: ADA Compliance Condition (0-5) 0

No issues identified.

Life Safety Evaluation Comments:

12: Life Safety Systems: Condition (0-5) 2

Fire alarm system and smoke/duct detection in good condition.	1
Emergency lighting mainly fluorescent and should be replaced to LED type.	4
Exit signs were in fair condition. Should be replaced to newer LED type.	2

Life Safety Evaluation Comments:

Warden indicated with the loss of utility and no generator, inmate doors are not fail secure.

13: Comm/Tech Distribution Condition (0-5): 2

Intercom is dated and should be upgraded.	3
Rack had UPS and space for future. Cabling should be reorganized.	2
Telephone termination board in good condition.	2
Clock system was not observed. Warden indicated that it no longer worked.	5

Comm/Tech Evaluation Comments:

14: Electronic Security Distribution Condition (0-5): 4

Security Electronics Evaluation Comments: Security system is outdated, needs majjor upgrade.

Expandability/Adaptability

Gymnasium has a low to minimal level of adaptability, and very little to no room for expandability. Visitation has a moderate level of adaptability of low level detention use. And very little to no room for expandability.

15. Site Conditions

Old delivery gate does not work (Poor).	5
Perimeter fence is too short to provide adequate security. (Fair)	4
Sidewalks, parking areas in good condition.	2
Storm drainage system in good condition. All catch basins requiring cleaning to prolong life of system.	2

Basic Site Information

Location/Address: 701 South 27th Street

Building Area: 6,400

Billings MT 59101

General Building Information

Initial Construction Date: 1999 | Facility Age: 21 | No of Floors: 1 | ☐ Modular/ Temporary

General Facility Description:

This building is three parts:
Industries, maintenance and chapel.
Industries and maintenance share a concrete slab on grade, CMU walls, with metal bar joist roof building.
The chapel is a concrete slab on grade metal stud walls, bar joist roof building.
The entire building has an exterior facade of brick masonry to approximately 10' and them EIFS above.
The roof system is low slope membrane.

Major Renovations/Expansion Projects

Facility Completely Renovated? ☐ | If yes, Date of Last Major Renovation

1 Year

B

2: Strucuture: Steel Frame/ Concrete Floors — Condition (0-5): 1

Building Frame Type:
Wood Frame
Steel Frame
Concrete or CMU
Concrete Moment Frame
Unreinforced Masonry Wall
Other/Indeterminate

Description of Structure: Concrete slab on grade, CMU walls, metal bar roof joist.

Structure Condition Comments: No evidence of structure issues. Condition 1.

3. Exterior Envelope: Exterior Material Type: B — Condition (0-5): 2

Level A= Tilt-Up,Dryvit, or Painted CMU
Level B= Precast, Brick, or Middle of the Road Curtain Wall
Level C= High End Curtain

Brick masonry to approximately 10' then EIFS above.
HM doors and frames. HM windows.

Comments on Condition of Exterior Envelope:

EIFS is showing signs of cracking and degradation. Somewhat unusual but will need some minor renovation work. Condition 2.
HM door to the chapel needs replaced. Condition 4.
Multiple glazing units need replaced in the chapel due to breakage or seal failure. Condition 3.

4: Roof Type Material (Level A, B, C) B — Condition (0-5): 4

Level A= Modular or Shingles
Level B= Built-Up/Single Ply
Level C= Ornamental Metal,Tile

Roof Description and Comments: Roof membrane system is failing on the chapel and need significant work. A lot of water damage has occurred inside the chapel due to roof leaks. Condition 4.
Roof membrane over the industries and maintenance is still performing well, but is part its expected life and should be replaced soon. Condition 3.

5: Interior Finishes: Condition (0-5): 3

Industries and maintenance is concrete floors, painted CMU walls and ACT ceilings.
Chapel is carpet tile flooring, painted gypsum walls and act or gypsum ceilings.

Basic Site Information

Location/Address: 701 South 27th Street

Building Area: 40,191

Billings | MT | 59101

General Building Information

Initial Construction Date: 1997 | Facility Age: 23 | No of Floors: 3 | ☐ Modular/ Temporary

General Facility Description:

This is a multi level building structure that has been added onto several times with attached and separate functional building areas.

Major Renovations/Expansion Projects

Facility Completely Renovated? ☐ | If yes, Date of Last Major Renovation

1 Year

2 Year

3 Year

1: General Building Condition

General Condition of the Building: | Condition (0-5)

The structure and core of this building are in great condition. No evidence of movement or deterioration of the major structural or core elements.
The roof membrane is at its life expectancy and should be replaced.
The interior finishes of this building are seeing typical wear and tear and need normal maintenance.

Comments on Overall Buildling Condition:

Building being maintained in spite of hard use.

Need to review MEP + Civil and then make stmt.

Montana Correctional System Master Plan

Building Physical Data Entry Form | Montana Women's Prison | January 15, 2020

B

2: Strucuture: Steel Frame/ Concrete Floors — Condition (0-5): 1

Building Frame Type:
Wood Frame
Steel Frame
Concrete or CMU
Concrete Moment Frame
Unreinforced Masonry Wall
Other/Indeterminate

Description of Structure: Concrete slab, CMU walls, steel support structure, metal deck.

Structure Condition Comments: All structure was in great condition with one exception. The concrete roof deck on 3rd floor north west wing had substantial cracking. Moderate renovation work is required. Condition 3.

3. Exterior Envelope: Exterior Material Type: B — Condition (0-5): 2

Level A= Tilt-Up,Dryvit, or Painted CMU
Level B= Precast, Brick, or Middle of the Road Curtain Wall
Level C= High End Curtain

Brick masonry on the exterior facade for 1st level.
EIFS for the exterior facade on the 2nd and 3rd level.
HM doors and frames.

Comments on Condition of Exterior Envelope:

Brick masonry is in good condition. Condition 1.
EIFS is in good shape with several small areas of cracking. Condition 2.
HM doors are in good condition but need new seals. Condition 1.

Level A= Modular or Shingles
Level B= Built-Up/Single Ply
Level C= Ornamental Metal,Tile

4: Roof Type Material (Level A, B, C) B — Condition (0-5): 4

Roof Description and Comments: No evidence of roof leaks, but membrane is at the end of its life. Condition 4.
Roof drains do not have overflow drains. Condition 4.

5: Interior Finishes: Condition (0-5):

Carpet or concrete floors.
Paint on gypsum board or CMU for walls.
Paint on gypsum or cementitious detention grade ceilings.
Pneumatic controls for cells are problomatic and in need of replacement.

Rating Codes
0= Not Applicable
1= Normal Maintenance
2= Minor Renovation
3= Moderate Renovation
4= Major Renovation
5= Replacement Required

Interior Finishes Comments: Hard use will necessitate reneweal of interior finishes in near futurre

Carpet in the day room areas is worn and in need of replacement. Condition 1.
Paint on HM doors and walls has seen normal wear. Condition 1.
Pneumatic controls for cell doors are in poor condition and need major renovation, condition 4.

6: HVAC Systems Condition (0-5):

Compressor failing in outdoor chiller, exhibiting fewer hours of operation	5
Kitchen MAU goes down for unknown reasons, often during high winds	5
Leaking heating water hydronic fitting in cafeteria ceiling	4
Medical Area has cold complaints and overly pressurized	4
Control Rm and adjacent Server Rm are too warm	4
Hydronic control valves have unstable operation, better with strainers and flushed	3
Return fan on HV&AC-5 not fully operational, running at low speed	5

HVAC Evaluation Comments:

Montana Womens' Prison Expansion 2000 project
Upgrade Heating System, MWP 2005 project
Upgrade Secure Housing Control MWP 2017 project

7: Building Plumbing Systems: Condition (0-5)

Sanitary pipe leaks over De-Brief Room, stained tiles	5
No roof overflow provisions (pipe or OFL drain bowls)	4

Plumbing System Evaluation Comments:

Montana Womens' Prison Expansion 2000 project
Upgrade Heating System, MWP 2005 project
Upgrade Secure Housing Control MWP 2017 project

8: Building Fire Protection Systems: Condition (0-5)

General Life Safety and Fire Suppression Review for updated compliance	3

Fire Protection Evaluation Comments:

Montana Womens' Prison Expansion 2000 project
6" fire riser in Boiler Room

9: Building Electrical Systems: Condition (0-5) 2

Existing generator is in good condition.	2
Electrical Cutler Hammer gear is in fair condition.	2
Lighting was observed to be mostly fluorescent. Lighting controls were not observed.	4
Electrical wiring was observed in conduits and industrial grade devices.	1

Building Electric Evaluation Comments:

Transformer and meter are utility owned.

10: Vertical Transportation Condition (0-5) 1

Metal stairs with concrete pan infill, steel pipe handrails painted.
Key operated elevator.

Vertical Transportation Comments:

Stairs and elevator are in good shape. No issues identified or indicated. Condition 1.

of Elevators 1 # of Stairs 5 # of Floors 3 # of Escalators 0

11: ADA Compliance Condition (0-5) 0

No issues identified.

Life Safety Evaluation Comments:

12: Life Safety Systems: Condition (0-5) 2

Fire alarm system and smoke/duct detection in good condition.	1
Emergency lighting mainly fluorescent and should be replaced to LED type.	4
Exit signs were in fair condition. Should be replaced to newer LED type.	2

Life Safety Evaluation Comments:

Warden indicated with the loss of utility and no generator, inmate doors are not fail secure.

You created this PDF from an application that is not licensed to print to novaPDF printer (http://www.novapdf.com)

4= Major Renovation
5= Replacement Required

13: Comm/Tech Distribution Condition (0-5): 2

Intercom is in fair condition.	2
Rack had UPS and space for future. Cabling should be reorganized.	2
Telephone termination board in good condition.	2
Clock system was not observed. Warden indicated that it no longer worked.	5

Comm/Tech Evaluation Comments:

14: Electronic Security Distribution Condition (0-5): 4

Security Electronics Evaluation Comments: Security system is outdated, needs majjor upgrade.

Expandability/Adaptability

Very limited to no room for expandability.
Very little ability for adaptability.

15. Site Conditions

Storm drainage system in good condition. All catch basins and dry wells requiring cleaning to prolong life of system.	2
Sewer and water services (Good).	2
Need additional detention areas for building.	2
Cannot open lock from inside detention area walkways. Requires personnel to open lock from outside only.	2

000A1	Anaconda Readiness Center	READINESS CENTER	D3020 HEAT GENERATING SYSTEMS	D302001 BOILERS	Gas, Hot Water - 500-650 MBH	1961	5/7/2019	80	[07May19-AECOM-EWS] [Leakage] Adjacent heating supply piping was corroded and showed signs of leaks.
000A2	Anaconda Readiness Center	ORGANIZATIONAL STORAGE	D5010 ELECTRICAL SERVICE & DISTRIBUTION	D501005 ENCLOSED CIRCUIT BREAKERS	Enclosed Circuit Breaker, 30-100 Amp	1961	5/7/2019	61	[07May19-AECOM-JMM] [Deteriorated] No deficiencies observed but asset is beyond its intended service life.
000A2	Anaconda Readiness Center	ORGANIZATIONAL STORAGE	B2030 EXTERIOR DOORS	B203001 SOLID DOORS	Steel	1961	5/7/2019	71	[07May19-AECOM-EWS] [Capability | Capacity Deficient] The door did not shut properly due to a damanaged skid plate.
00M13	Belgrade Rc - Fms05	READINESS CENTER	B3010 ROOF COVERINGS	B301002 LOW SLOPE ROOF SYSTEMS	Single Ply Membrane	2003	5/9/2019	71	[09May19-AECOM-SIC] [Deteriorated] Roof is discolored and seam sealant is deteriorated.
00M13	Belgrade Rc - Fms05	READINESS CENTER	C3020 FLOOR FINISHES	C302005 CARPETING	General	2003	5/9/2019	71	[09May19-AECOM-SIC] [Deteriorated] The majority of the carpet is heavily worn with minor staining.
00M13	Belgrade Rc - Fms05	READINESS CENTER	D3020 HEAT GENERATING SYSTEMS	D302001 BOILERS	Gas, Hot Water - 1200-1800 MBH	2003	5/9/2019	71	[09May19-AECOM-EWS] [Leakage] Signs of leaks at base of boiler. Verify leaks have been resolved.
00M13	Belgrade Rc - Fms05	READINESS CENTER	D3020 HEAT GENERATING SYSTEMS	D302001 BOILERS	Gas, Hot Water - 1200-1800 MBH	2003	5/9/2019	71	[09May19-AECOM-EWS] [Leakage] Signs of leaks at base of boiler. Verify leaks have been resolved.
00M13	Belgrade Rc - Fms05	READINESS CENTER	D3040 DISTRIBUTION SYSTEMS	D304003 HOT WATER DISTRIBUTION SYSTEMS	Circulating Pump - 1 HP	2003	5/9/2019	71	[09May19-AECOM-EWS] [Leakage] Pump has signs of leaks. Verify leak has been fixed.
00M13	Belgrade Rc - Fms05	READINESS CENTER	B3010 ROOF COVERINGS	B301001 STEEP SLOPE ROOF SYSTEMS	Formed Metal - Metal Standing Seam	2003	5/9/2019	80	[09May19-AECOM-SIC] [Deteriorated] At least one seam cap has slid down. Most snow guards have detached.
00M13	Belgrade Rc - Fms05	READINESS CENTER	B3010 ROOF COVERINGS	B301002 LOW SLOPE ROOF SYSTEMS	Single Ply Membrane	2003	5/9/2019	80	[09May19-AECOM-SIC] [Ponding] Roof is approaching end of design life. moderate ponding present.
00M13	Belgrade Rc - Fms05	READINESS CENTER	D2010 PLUMBING FIXTURES	D201001 WATERCLOSETS	General	2003	5/9/2019	80	[09May19-AECOM-EWS] [Operationally Impaired] One water closet in men"s room 166 was not functional.
00M13	Belgrade Rc - Fms05	READINESS CENTER	D2010 PLUMBING FIXTURES	D201006 DRINKING FOUNTAINS AND COOLERS	Water Cooler	2003	5/9/2019	80	[09May19-AECOM-EWS] [Non-Functional | Broken] The water cooler in the drill hall had a broken spout.
00M13	Belgrade Rc - Fms05	READINESS CENTER	D2040 RAIN WATER DRAINAGE	D204002 ROOF DRAINS	General	2003	5/9/2019	80	[09May19-AECOM-EWS] [Clogged] Roof drains were clogged and not receiving maintenance.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	B3010 ROOF COVERINGS	B301002 LOW SLOPE ROOF SYSTEMS	Single Ply Membrane	1999	4/11/2019	30	[11Apr19-AECOM-SIC] [Deteriorated] Roof leaks reported throughout. Replacement project pending at time of assessment.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	D3040 DISTRIBUTION SYSTEMS	D304007 EXHAUST SYSTEMS	Garage Exhaust Systems - Single exhaust, 3" outlet, 1 bay	1999	4/11/2019	30	[11Apr19-AECOM-JCR] [Operationally Impaired] The vehicle exhaust was not functional at the time of the assessment.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	B1010 FLOOR CONSTRUCTION	B101001 STRUCTURAL FRAME	General	1999	4/11/2019	50	[11Apr19-AECOM-SIC] [Corrosion | Rust] Water tanks and cleaning fluids are corroding concrete and metal deck.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	D3050 TERMINAL & PACKAGE UNITS	D305001 UNIT VENTILATORS	Make-Up Air Unit - 10,000 CFM, 838 MBH, includes standard controls	1999	4/11/2019	61	[11Apr19-AECOM-JCR] [Corrosion | Rust] The exterior coating was blistering and coming off exposing bare metal which was rusting. Refinish the exterior of the unit if it is not scheduled for replacement.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	D3050 TERMINAL & PACKAGE UNITS	D305006 PACKAGE UNITS	Rooftop Unit - 7-1/2 ton	1999	4/11/2019	71	[11Apr19-AECOM-JCR] [Damaged] The coil fins on the condenser are damaged which will reduce the efficiency of the unit. Additionally the condenser is charged with R-22 refrigerant.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	B2030 EXTERIOR DOORS	B203004 OVERHEAD AND ROLL-UP DOORS	Steel Sectional, Electric, 20'x14'	1999	4/11/2019	80	[11Apr19-AECOM-SIC] [Operationally Impaired] User reported definitional door closer motor.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	B3010 ROOF COVERINGS	B301006 ROOF OPENINGS AND SUPPORTS	Skylights	2005	4/11/2019	80	[11Apr19-AECOM-SIC] [Leakage] Occupants reported leaks.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	C3020 FLOOR FINISHES	C302005 CARPETING	Carpet Tile	1999	4/11/2019	80	[11Apr19-AECOM-SIC] [Deteriorated] Carpet in admin and office areas is worn, stained, and beyond its design life.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	D2010 PLUMBING FIXTURES	D201004 SINKS	Laundry Sink	2017	4/11/2019	80	[11Apr19-AECOM-JCR] [Missing] One of the sinks was missing a faucet.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	D3030 COOLING GENERATING SYSTEMS	D303001 CHILLED WATER SYSTEMS	Chiller, Reciprocating, Air Cooled - 40 TN	2004	4/11/2019	80	[11Apr19-AECOM-JCR] [Damaged] The louvers for the coils are damaged which is restricting airflow. Repair or straighten the damaged blades.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	D3040 DISTRIBUTION SYSTEMS	D304006 CHILLED WATER DISTRIBUTION SYSTEMS	Circulating Pump, End Suction - 2-1/2" size, 3 HP, to 150 GPM	2004	4/11/2019	80	[11Apr19-AECOM-JCR] [Corrosion | Rust] The flexible lines were corroded at the flanges likely due to sweating in the summer months. Wrap the exposed chilled water lines with insulation.
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	D3040 DISTRIBUTION SYSTEMS	D304007 EXHAUST SYSTEMS	Fan System, Roof Exhaust - 500 CFM	1999	4/11/2019	80	[11Apr19-AECOM-JCR] [Noise | Vibration Excessive] The exhaust fan is making a thumping noise that sounds like it is [illegible]
02915	Billings Afrc	ARMED FORCE RESERVE CENTER	D3040 DISTRIBUTION SYSTEMS	D304007 EXHAUST SYSTEMS	Fan System, Roof Exhaust - 800 CFM	1999	4/11/2019	80	[11Apr19-AECOM-EWS] [Noise | Vibration Excessive] The fan made excessive noise and was vibrating when in use. Service fan.
00001	Billings Fms 06	SIMULATOR BLDG NON-MOTION	D3040 DISTRIBUTION SYSTEMS	D304007 EXHAUST SYSTEMS	Garage Exhaust Systems - Single exhaust, 3" outlet, 1 bay	1987	4/9/2019	30	[09Apr19-AECOM-JCR] [Operationally Impaired] The vehicle exhaust was not functional at the time of the assessment.
00001	Billings Fms 06	SIMULATOR BLDG NON-MOTION	B3010 ROOF COVERINGS	B301001 STEEP SLOPE ROOF SYSTEMS	Asbestos Cement Shingles	2004	4/9/2019	61	[09Apr19-AECOM-SIC] [Leakage] Signs of roof leaks on interior side of exterior walls.
00001	Billings Fms 06	SIMULATOR BLDG NON-MOTION	C3020 FLOOR FINISHES	C302004 RESILIENT FLOOR FINISHES	Vinyl Tile	1987	4/9/2019	71	[09Apr19-AECOM-SIC] [Deteriorated] VCT is heavily worn and scraped with moisture stains.
00001	Billings Fms 06	SIMULATOR BLDG NON-MOTION	B2010 EXTERIOR WALLS	B201001 EXTERIOR CLOSURE	Concrete Block	1987	4/9/2019	80	[09Apr19-AECOM-SIC] [Moisture | Debris Contaminated] Evidence of moisture infiltration and flaking paint.
00001	Butte Afrc	BUTTE READINESS CENTER	B2010 EXTERIOR WALLS	B201001 EXTERIOR CLOSURE	Concrete Block	1961	5/7/2019	71	[07May19-AECOM-SIC] [Deteriorated] Moderate step cracking present in multiple areas. Significant evidence of moisture infiltration, most significant in southeast corner.
00001	Butte Afrc	BUTTE READINESS CENTER	B2020 EXTERIOR WINDOWS	B202001 WINDOWS	General	1961	5/7/2019	71	[07May19-AECOM-SIC] [Deteriorated] Heavily weathered and cracked caulking
00001	Butte Afrc	BUTTE READINESS CENTER	B2020 EXTERIOR WINDOWS	B202001 WINDOWS	General	1985	5/7/2019	71	[07May19-AECOM-SIC] [Deteriorated] Windows are heavily weathered.
00001	Butte Afrc	BUTTE READINESS CENTER	C1010 PARTITIONS	C101005 INTERIOR WINDOWS	General	1961	5/7/2019	71	[07May19-AECOM-SIC] [Deteriorated] Interior clerestory windows in assembly hall are beyond their design lives with flaking paint and cracking glazing caulk.
00001	Butte Afrc	BUTTE READINESS CENTER	C3020 FLOOR FINISHES	C302003 WOOD FLOORING	General	1985	5/7/2019	71	[07May19-AECOM-SIC] [Deteriorated] Heavily worn.
00001	Butte Afrc	BUTTE READINESS CENTER	D3050 TERMINAL & PACKAGE UNITS	D305003 FAN COIL UNITS	Cab Mount, Two Pipe - 2 ton	1961	5/7/2019	71	[07May19-AECOM-EWS] [Noise | Vibration Excessive] Facility manager states the FCU had excessive vibrations. The access panel was removed to help alleviate the issue.
00001	Butte Afrc	BUTTE READINESS CENTER	B3010 ROOF COVERINGS	B301001 STEEP SLOPE ROOF SYSTEMS	Asphalt Shingles	2010	5/7/2019	80	[07May19-AECOM-SIC] [Leakage] Leaks reported when ice dam causes water to back up the roof slope,
00001	Butte Afrc	BUTTE READINESS CENTER	B3010 ROOF COVERINGS	B301002 LOW SLOPE ROOF SYSTEMS	Single Ply Membrane	2005	5/7/2019	80	[07May19-AECOM-SIC] [Ponding] Roof appears to have been patched in areas. Significant ponding occurring [illegible]
00001	Butte Afrc	BUTTE READINESS CENTER	C3020 FLOOR FINISHES	C302004 RESILIENT FLOOR FINISHES	Vinyl Tile	1995	5/7/2019	80	[07May19-AECOM-SIC] [Deteriorated] VCT is moderately scuffed and beyond its design life.
00001	Butte Afrc	BUTTE READINESS CENTER	C3020 FLOOR FINISHES	C302005 CARPETING	General	2000	5/7/2019	80	[07May19-AECOM-SIC] [Deteriorated] Carpet is worn.
00001	Butte Afrc	BUTTE READINESS CENTER	C3030 CEILING FINISHES	C303001 ACOUSTICAL CEILING TILES & PANELS	General	1995	5/7/2019	80	[07May19-AECOM-SIC] [Stained | Dirty] Many ceiling tiles in the building are water stained.
00002	Butte Afrc	ARNG ANNEX (1ST & 2ND FLOORS)	B2020 EXTERIOR WINDOWS	B202001 WINDOWS	General	2000	5/7/2019	80	[07May19-AECOM-SIC] Windows are heavily weathered with failing sealant and possible broken seals between panes.
00004	Butte Afrc	VEHICLE MAINTENANCE SHOP	D3060 CONTROLS & INSTRUMENTATION	D306004 INSTRUMENT AIR COMPRESSORS	General	1983	5/7/2019	30	[07May19-AECOM-EWS] [Operationally Impaired] The facility manager stated the air compressor was in the process or being decommissioned due to it being out of compliance.
00004	Butte Afrc	VEHICLE MAINTENANCE SHOP	D5020 LIGHTING & BRANCH WIRING	D502002 LIGHTING EQUIPMENT	Exterior Lighting - High pressure sodium, wall pack, 70 W	1983	5/7/2019	61	[07May19-AECOM-JMM] [Deteriorated] No deficiencies observed. The asset is beyond its intended service life.
00004	Butte Afrc	VEHICLE MAINTENANCE SHOP	B2020 EXTERIOR WINDOWS	B202001 WINDOWS	General	1983	5/7/2019	71	[07May19-AECOM-SIC] [Deteriorated] Heavily weathered

Deficiency Detail by Building

Def. Categories: ☑ 1 ☑ 2 ☑ 3 ☑ 4 ☑ 5 ☑ 6 ☐ 7

Site: General Services- Complex
Building: Cogswell
Building Type/ Age Class: General Classroom/Office (3B)
Const. Date: 1955

Area Correction: 0.94
Gross Area: 108,868 Sq Ft
Cost/Sq Ft: $219.58
Replacement Cost: $23,905,235

Last Audit Date: 8/17/2017
Report Renewal Cost: $6,323,513
Deficiency Ratio: 26.5%

Entry #	Component	Initial Entry	Last Update	Def. Cat.	Def %	Unit Cost	Comp. Renew Cost	System Replace Cost	Description
System: Foundations (1)						***Totals:***	***$5,661***	***$555,227***	
269	Exterior Steps/Retaining Walls (B)	07-07-2014	07-07-2014	2	5%	$1.04	$5,661		Patch cracking and peeling east/north entrance steps.
System: Envelope (2)						***Totals:***	***$774,411***	***$2,177,360***	
832	Exterior Walls (A)	07-07-2014	07-07-2014	2	1%	$5.38	$5,857		Reseal/replace plaster wall surface. Replace in areas where there are chipped out seals. At this time this item was reduced from 10 to 1% percent. In August 2017 the building exterior was painted. Prev. Record 261.
263	Exterior Windows (B)	07-07-2014	07-07-2014	2	90%	$7.31	$716,243		Replace windows on the west and south facing sides of the building. New weather strips or seals should be installed in windows with leaks. 2017 update- also take care of solar screen removal where required.
264	Exterior Windows (B)	07-07-2014	07-07-2014	2	5%	$7.31	$39,791		Paint metal sunscreens on windows in C-Wing.
267	Exterior Doors/Hatches (C)	07-07-2014	07-07-2014	2	10%	$1.15	$12,520		Replace Broadway entrance door/frame/handicap south entrance.
System: Floor System (3)						***Totals:***	***$20,467***	***$2,668,355***	
291	Floor Structure (A)	07-07-2014	07-07-2014	3	1%	$18.80	$20,467		Fire seal floor penentrations.
System: Roof System (4)						***Totals:***	***$235,645***	***$781,672***
