

AI Help Desk

Real educators, real answers. The first-of-its-kind AI Help Desk gives Montana teachers on-demand support to solve problems, spark ideas, and put emerging tech to work right away.

ai.help@mtda.org

Professional Learning

The Frontier Learning Lab provides professional development that helps to integrate AI and emerging tools into schools through hands-on workshops, webinars, and pop-up labs.

Vetted Access

Trusted tools, shared buying power, and hands-on pilots —bringing AI and VR into Montana schools through mobile labs and locally designed innovations that work where you teach.

Our Approach

At the Frontier Learning Lab (FLL), we help bring cutting-edge educational technology into K-12 schools across Montana in a way that's accessible, grounded, and practical.

Guidelines for AI Use

Before you begin prompting, it's important to understand the basic guidelines for responsible AI integration in your practice.

- **DO Keep Humans Central:** Prioritize AI tools that complement human interaction and strengthen the educator-student relationship. The goal is to start with human inquiry, use AI for production, and end with human reflection and empowerment.
- **DO Start Small:** Begin with a single assignment or idea in one course to gauge the impact and fine-tune your approach before expanding.
- **DO Set Clear Learning Objectives:** Define what specific knowledge and skills you want students to acquire through the use of AI. This transparency provides a roadmap for students, ensuring the technology serves a pedagogical purpose.
- **DON'T Rely Solely on AI:** Avoid replacing essential human interactions or your professional judgment with technology. AI should support teaching, not replace it.
- **DON'T Trust Unverified Claims:** Be cautious of AI tools that lack independent, evidence-based research backing their effectiveness.
- **DON'T Overlook Ethics:** Never compromise on data privacy, student autonomy, or transparency for the sake of convenience.
